Heritage, Nationhood, and Language Neriko Doerr, 2014-01-02 The notion of heritage has become one of the global tropes in recent years. At the heart of heritage politics are three questions: what heritage is, who decides what it is, and for whom is the decision made. However, existing work on heritage language has rarely tackled these questions, assuming that teaching children of migrants their heritage language empowers them. This book challenges this assumption, situating the notion of heritage language in the host society's involvement in social justice, nation-building efforts, (superficial) celebration of diversity, and investment on global links the migrants offer as well as the migrants' fear of discrimination and desire for belonging, social status, and economic gain. Based on ethnographic research in Bolivia, Peru, the United States, and Japan, the book illuminates the complexity and political nature of determining what constitutes heritage language for migrants with connections to Japan. This volume opens up a new field of investigation in heritage language studies: the complex linkage between heritage language and social justice for migrants. This book was published as a special issue of Critical Asian Studies.

Dual-Language Learners Angèle Sancho Passe, 2012-11-06 Teach young children English, maintain their home language, and develop the early literacy skills necessary for school readiness and success.

The Native Speaker Concept Neriko Musha Doerr, 2009-12-22 The native speaker is often thought of as an ideal language user with a complete and possibly innate competence in the language which is perceived as being bounded and fixed to a homogeneous speech community and linked to a nation-state. Despite recent works that challenge its empirical accuracy and theoretical utility, the notion of the native speaker is still prevalent today. The Native Speaker Concept shifts the analytical focus from the second language acquisition processes and teaching practices to daily interactions situated in wider sociocultural and political contexts marked by increased global movements of people and multilingual situations. Using an ethnographic approach, the volume critically elucidates the political nature of (not) claiming the native speaker status in daily life and the ways the ideology of native speaker intersects and articulates, supports, subverts, or complicates various relations of dominance and regimes of standardization. The book offers cases from diverse settings, including classrooms in Japan, a coffee shop in Barcelona, secondary schools in South Africa, a backyard in Rapa Nui (Easter Island), restaurant kitchens, a high school administrator's office, a college classroom in the United States, and the Internet. It also offers a

genealogy of the notion of the native speaker from the time of the Roman Empire. Employing linguistic, anthropological and educational theories, the volume speaks not only to the analyses of language use and language policy, planning, and teaching, but also to the investigation of wider effects of language ideology on relations of dominance, and institutional and discursive practices.

Writing peace Cattelain, Eric, 2017-12-25 What is the word for 'peace' in Thai or in Arabic? In Hausa or in Maori? And how is it written? The answers to these questions confront us to the specific languages we have learned or will be able to learn - and which help build our own identity - just as much as to those languages we have no access to

Children Crossing Borders Joseph Tobin, Jennifer Keys Adair, Angela Arzubaiaga, 2013-10-31 In many school districts in America, the majority of students in preschools are children of recent immigrants. For both immigrant families and educators, the changing composition of preschool classes presents new and sometimes divisive questions about educational instruction, cultural norms and academic priorities. Drawing from an innovative study of preschools across the nation, Children Crossing Borders provides the first systematic comparison of the beliefs and perspectives of immigrant parents and the preschool teachers to whom they entrust their children. Children Crossing Borders presents valuable evidence from the U.S. portion of a landmark five-country study on the intersection of early education and immigration. The volume shows that immigrant parents and early childhood educators often have differing notions of what should happen in preschool. Most immigrant parents want preschool teachers to teach English, prepare their children academically, and help them adjust to life in the United States. Many said it was unrealistic to expect a preschool to play a major role in helping children retain their cultural and religious values. The authors examine the different ways that language and cultural differences prevent immigrant parents and school administrations from working together to achieve educational goals. For their part, many early education teachers who work with immigrant children find themselves caught between two core beliefs: on one hand, the desire to be culturally sensitive and responsive to parents, and on the other hand adhering to their core professional codes of best practice. While immigrant parents generally prefer traditional methods of academic instruction, many teachers use play-based curricula that give children opportunities to be creative and construct their own knowledge. Worryingly, most preschool teachers say they have received little to no training in working with immigrant children who are still learning English. For most young children of recent immigrants, preschools are the first and most profound context in which they confront the conflicts between their home culture and the United States. Policymakers and educators, however, are still struggling with how best to serve these children and their parents. Children Crossing Borders provides valuable research on these questions, and on the ways schools can effectively and sensitively incorporate new immigrants into the social fabric.
