**Serving Library Users from Asia** John Hickok,2019-06-12 Asian populations are among some of the fastest growing cultural groups in the US. While books on serving other target groups in libraries have been published (e.g., disabled, Latino, seniors, etc.), few books on serving library users of Asian heritage have been written. Thus the timely need for this book. Rather than a generalized overview of Asians as a whole, this book has 24 separate chapters—each on 24 specific Asian countries/cultures of East, Southeast, and South Asia—with a wealth of resources for understanding, interacting with, outreaching to, and serving library users of each culture. Resources include cultural guides (both print and online), language helps (with sample library vocabulary), Asian booksellers, nationwide cultural groups, professional literature, and more. Resources and suggestions are given for all three types of libraries—public, school, and academic—making this book valuable for all librarians. The demographics of each Asian culture (numbers and distribution)—plus history of immigration and international student enrollment—is also featured. As a bonus, each chapter spotlights a US public, school, and academic library providing model outreach to Asian library users. Additionally, this book provides a detailed description and analysis of libraries in each of the 24 Asian countries. The history, development, facilities, conditions, technology, classification systems, and more—of public, school, and academic libraries—are all discussed, with detailed documentation. Country conditions influencing libraries and library use are also described: literacy levels, reading cultures, languages and writing systems, educational systems, and more. Based on the author's 15 years of research and travels to Asia, this work is a must-have for all librarians.

Media Linguistics in South Asia Ali R Fatihi,2022-09-30 The tone and texture of the language of media have changed considerably due to the rapid expansion of media in recent times and advancements in communication technologies. This book examines new ways to conduct linguistic explorations into the myriad of forms news is being presented and consumed. The volume contributes to the emerging field of media linguistics by measuring and analysing the associations between linguistics and the news discourse. It extends the conceptualization of language-media relations in sociolinguistics beyond

the notions of 'influence' and 'effect' and broadens the theoretical and empirical scope of the discipline. The author discusses different perspectives of media linguistics; issues of variation in language of media; question of plurilingual resources; parallel language use in media and textuality of news genres He further analyses the dynamics of news reportage by studying the coverage of conflicts, violence and dissent in South Asian media in recent decades along with the reportage of cricket headlines and news. Comprehensive and topical this volume will be useful for scholars and researchers of linguistics, media linguistics, applied linguistics, media studies, media sociology, sociology, cultural studies and South Asian studies.

**Competition Law in South Asia** Amber Darr,2023-02-23 In the last twenty years, South Asian countries have increasingly engaged with modern competition legislation. Yet, apart from India and Pakistan, the countries in this region have had little success enforcing these laws. *Competition Law in South Asia* analyses the mechanisms and institutions through which Bangladesh, Bhutan, India, Pakistan, Maldives Nepal, Sri Lanka, and Afghanistan have engaged with modern competition legislation. The book argues that the success (or failure) of competition reform in these countries is inextricably linked to the unique interplay of mechanisms and legal and political institutions through which these countries have engaged with competition legislation. The book provides an in-depth comparative analysis of the adoption and implementation continuum in India and Pakistan, the compatibility and legitimacy generated by the adoption process, and its impact on implementation. Taking a far-reaching, comparative approach, the book draws lessons not only for countries in South Asia but also for emerging economies across the globe.
