History of Construction Cultures Volume 1 João Mascarenhas-Mateus, Ana Paula Pires, 2021-08-01 History of Construction Cultures Volume 1 contains papers presented at the 7ICCH – Seventh International Congress on Construction History, held at the Lisbon School of Architecture, Portugal, from 12 to 16 July, 2021. The conference has been organized by the Lisbon School of Architecture (FAUL), NOVA School of Social Sciences and Humanities, the Portuguese Society for Construction History Studies and the University of the Azores. The contributions cover the wide interdisciplinary spectrum of Construction History and consist on the most recent advances in theory and practical case studies analysis, following themes such as: - epistemological issues; - building actors; - building materials; - building machines, tools and equipment; - construction processes; - building services and techniques ; - structural theory and analysis ; - political, social and economic aspects; - knowledge transfer and cultural translation of construction cultures. Furthermore, papers presented at thematic sessions aim at covering important problematics, historical periods and different regions of the globe, opening new directions for Construction History research. We are what we build and how we build; thus, the study of Construction History is now more than ever at the centre of current debates as to the shape of a sustainable future for humankind. Therefore, History of Construction Cultures is a critical and indispensable work to expand our understanding of the ways in which everyday building activities have been perceived and experienced in different cultures, from ancient times to our century and all over the world.

Undersea Vehicles and National Needs National Research Council, Division on Engineering and Physical Sciences, Commission on Engineering and Technical Systems, Committee on Undersea Vehicles and National Needs, 1996-12-19 The United States faces decisions requiring information about the oceans in vastly expanded scales of time and space and from oceanic sectors not accessible with the suite of tools now used by scientists and engineers. Advances in guidance and control, communications, sensors, and other technologies for undersea vehicles can provide an opportunity to understand the oceans' influence on the energy and chemical balance that sustains humankind and to manage and deliver resources from and beneath the sea. This book assesses the state of undersea vehicle technology and opportunities for vehicle applications in science and industry. It provides guidance about vehicle subsystem development priorities and describes how national research can be focused most effectively.

Technologies and Innovations for Sustainable Development Anjana Pandey,Rakesh Kumar,Ashutosh

Pandey,2025-03-13 Technologies and Innovations for Sustainable Development offers a comprehensive exploration of cutting-edge solutions that can help us build a greener, more equitable future. Too often, technologies are either not developed for a sufficiently profitable market, or if developed, are not accessible or well-adapted to end-user needs. This edited book seeks to advance knowledge and understanding of how to equitably improve the functioning of the “global innovation system” for sustainable development of technologies. This volume aims to examine specific cases of “system interventions” (e.g., policy interventions, institutional innovations, new approaches to shaping the innovation process, etc.) intended to strengthen the global innovation system, with the broader aim of developing policy recommendations and are generalizable across multiple sectors. This book brings together contributions from leading experts across diverse fields, showcasing the latest advancements in technology and innovative practices that address pressing sustainability issues. From hydrogen production and fuel blending to waste management and additive manufacturing process and application of emerging technologies such as machine learning, deep learning, and CFD simulation, this book provides a roadmap for harnessing innovation to achieve global sustainability goals. Key features include: An integrative overview of emerging and cutting-edge solutions to sustainable development Discussion on policy framework to address global environmental and public health challenges Forward-looking insights into emerging trends and future directions in sustainable development. Whether you are a policymaker, researcher, industry professional, or student, Technologies and Innovations for Sustainable Development is an essential resource for understanding the pivotal role of technology in creating a sustainable future. Join us in exploring the innovations that hold the key to a better world for generations to come.
