David Noel Freedman,Michael J. McClymond

Artificial Intelligence Governance and the Blockchain Revolution Qiqi Gao,Jiteng Zhang,2024-03-19 This is the first professional academic work in China to discuss artificial intelligence and blockchain together. Artificial intelligence is a productivity revolution, and its development has a significant and profound impact on global changes. However, at the same time, its development also brings a series of challenges to human society, such as privacy, security, and fairness issues. Therefore, the significance of blockchain is even more prominent. Blockchain is a revolution in production relations, which will propose important solutions to the challenges of privacy, security, and fairness that arise after the development of artificial intelligence. The book not only discusses the problems currently faced by the development of artificial intelligence, as well as the new opportunities and challenges that artificial intelligence brings to future global governance, but also explains the further development direction of the intelligent revolution from the perspective of blockchain.

Year's Best SF 11 David G. Hartwell,Kathryn Cramer,2009-10-20 This is the best short form science fiction of 2005, selected by David Hartwell and Kathryn Cramer, two of the most respected editors in the field. The short story is one of the most vibrant and exciting areas in science fiction today. It is where the hot new authors emerge and where the beloved giants of the field continue to publish. Now, building on the success of the first nine volumes, Eos will once again present a collection of the best stories of the year in mass market. Here, selected and compiled by David G. Hartwell and Kathryn Cramer, two of the most respected editors in the field, are stories with visions of tomorrow and yesterday, of the strange and the familiar, of the unknown and the unknowable. With stories from an all-star team of science fiction authors, Year's Best Sf 11 is an indispensable guide for every science fiction fan.

The Year's Best Science Fiction: Thirty-Second Annual Collection Gardner Dozois,2015-07-07 The thirty-six stories in this collection imaginatively take us far across the universe, into the very core of our beings, to the realm of the gods, and the moment just after now--Page 4 of cover.

The Rivers of Paradise David Noel Freedman,Michael J. McClymond,2001 A fascinating look at the founders of the world's main religions. The major religious traditions of the world owe their existence to the vision of an ancient founder. This important volume explores the lives of the five founders of major world religions-Moses, Buddha, Confucius, Jesus, and Muhammad-chronicling what is actually known of these charismatic men and introducing readers to the cultural and

religious worlds that heard their messages. Readers in predominantly Christian lands, in addition to learning about the lives of Confucius, Buddha, and Muhammad- whom they might not be familiar with- will also be introduced to modern research now casting fresh light on the careers of Moses and Jesus. Whether studied individually or in comparison with one another, these biographies, together with a chapter on the characteristics of religious leadership, chart the spiritual rivers that continue to feed the diversity of religious expression today.
