Solutions and Other Problems Allie Brosh, 2020-09-22 For the first time in seven years, Allie Brosh—beloved author and artist of the extraordinary #1 New York Times bestseller *Hyperbole and a Half*—returns with a new collection of comedic, autobiographical, and illustrated essays. *Solutions and Other Problems* includes humorous stories from Allie Brosh's childhood; the adventures of her very bad animals; merciless dissection of her own character flaws; incisive essays on grief, loneliness, and powerlessness; as well as reflections on the absurdity of modern life. This full-color, beautifully illustrated edition features all-new material with more than 1,600 pieces of art. *Solutions and Other Problems* marks the return of a beloved American humorist who has "the observational skills of a scientist, the creativity of an artist, and the wit of a comedian" (Bill Gates). Praise for Allie Brosh's *Hyperbole and a Half*: "Imagine if David Sedaris could draw....Enchanting." —People "One of the best things I've ever read in my life." —Marc Maron "Will make you laugh until you sob, even when Brosh describes her struggle with depression." —Entertainment Weekly "I would gladly pay to sit in a room full of people reading this book, merely to share the laughter." —The Philadelphia Inquirer "In a culture that encourages people to carry mental illness as a secret burden....Brosh's bracing honesty is a gift." —Chicago Tribune

The William Lowell Putnam Mathematical Competition 1985-2000: Problems, Solutions, and Commentary Kiran S. Kedlaya, Bjorn Poonen, Ravi Vakil, 2020-01-16 This third volume of problems from the William Lowell Putnam Competition is unlike the previous two in that it places the problems in the context of important mathematical themes. The authors highlight connections to other problems, to the curriculum and to more advanced topics. The best problems contain kernels of sophisticated ideas related to important current research, and yet the problems are accessible to undergraduates. The solutions have been compiled from the American Mathematical Monthly, *Mathematics Magazine* and past competitors. Multiple solutions enhance the understanding of the audience, explaining techniques that have relevance to more than the problem at hand. In addition, the book contains suggestions for further reading, a hint to each problem, separate from the full solution and background information about the competition. The book will appeal to students, teachers, professors and indeed anyone interested in problem solving as a gateway to a deep understanding of mathematics.

Exploring Solutions and Opportunities to Address Dropout and Out-of-School Children Nasreen, Khalida,Afzal, Muhammad Tanveer,2025-11-11 The issue of dropout and out-of-school children remains a pressing global challenge when trying to achieve inclusive and equitable education. Millions of children, particularly in low-income and marginalized communities, face barriers such as poverty, conflict, gender discrimination, and inadequate infrastructure that prevent them from completing their education. Addressing this problem requires a multifaceted approach that tackles the root causes while creating opportunities for re-engagement in learning. Further exploration of innovative solutions and strategic interventions, ranging from policy reforms and community-based programs to technological advancements, may help reduce dropout rates and ensure every child has access to continuous, meaningful education. *Exploring Solutions and Opportunities to Address Dropout and Out-of-School Children* explores the causes that lead to children dropping out of school, such as poverty, social inequality, and systemic barriers. It examines effective solutions and opportunities, including policy changes, community initiatives, and educational innovations, to engage children and support their return to learning. This book covers topics such as interactive learning, education counseling, and sustainable development, and is a useful resource for educators, business owners, policymakers, academicians, researchers, and scientists.
