Leadership Styles and Spiritual Traits of Catholic Priests Rev. Fr. Francis Aning Amoah, . Industrial PhD, Organizational Psychology, 2022-07-26 Aning Amoah's Leadership Styles and Spiritual Traits of Catholic Priests explore the relationship between leadership styles (transformational, transactional, and laissez-faire) and spiritual traits (self-directedness (SD), cooperativeness (CO), and self-transcendence (ST)). The quantitative correlational study sampled 93 catholic priests from Ghana in active ministry. The results showed a statistically significant correlation between transformational leadership and spiritual traits, a nonstatistical correlation between transactional leadership and spiritual trait variables, a negative statistically significant correlation between laissez-faire leadership style with self-directedness and cooperativeness, and a positive statistically significant correlation between laissez-faire leadership style and self-transcendence. Thus, the more catholic priests provide guidance, counseling, teaching, and shepherding among congregation as a transformational leader, the more likely they will be reliable, mature, effective, helpful, compassionate, and spiritual.

Contrary, the more catholic priests become laissez-faire leader, the more likely they will be weak, blaming, ineffective, emotionally unstable, lacking internal organizational principles (low SD), self-absorbed, intolerant, critical, revengeful and self-regarding (low CO), and absorbed in what they do, spiritual and capable of adapting to situation of pain and suffering (high ST).

Medical Leadership Jill Aylott, Jeff Perring, Ann Chapman, Ahmed Nassef, 2018-10-17 Today's health care systems need doctors and consultants to act as leaders, within the multi-disciplinary team, in addition to carrying out their clinical role. This book identifies the key elements of successful leadership through 'medically led' service development and systems transformation and shows how this benefits patient care, particularly when patients become partners in the process. The authors provide a conceptual framework of medical leadership and a set of scientific methods and tools that make a significant contribution to advancing quality and transforming services in healthcare. On top of this, they present analytical tools which medical professionals can use to support their own improvement or system transformation strategy, including ways of measuring improvement and the returns on investment of medical leadership. Woven throughout the book are real-life case studies from medical leaders across the world, providing students with valuable practical insights. Chapter summaries and reflections are provided to support learning. *Medical Leadership* will be essential reading for students on medical and clinical leadership courses internationally as well as for all practising doctors, consultants and General Practitioners.

Social Awareness and Leader Influence ,2007 A leader's ability to influence others is likely related to the leader's level of social awareness (knowing how one is perceived by others in that environment). Based on perceptions of the social environment, a leader must also alter his/her behaviors as needed to more effectively relate to others, a process that has been termed interpersonal adaptability. Interpersonal adaptability is central to the role of the leader, who must use influence and persuasion to successfully accomplish the mission through the work of subordinates. The objectives of this research are to develop a model of social influence, to propose training, and to pilot-test the concepts. To meet these objectives, the authors first provide an overview of the relationship between social awareness and influence. Second, they describe a model of social awareness and influence. Third, they describe how these concepts link to the leader competencies defined in FM 6-22. Fourth, they discuss the implications of this research for training leaders to enhance their social awareness and influence skills, and present the concepts that were developed for training these skills. Finally, they describe how these concepts were pilot-tested, and present the results and conclusions from the pilot test.--Stinet.

History is littered with stories of many great leaders. Some are recognized for their dexterity in the battlefields, some perhaps for their business acumen or for inspiration for their employees. Whatever the reasons for fame, humans have recognized that the capability of an individual to make others take action and achieve goals makes them stand out in society. However, the question still remains - what is it that makes them different? Hence the purpose of this theoretical paper is to provide a review of the definition of leadership and of the three main theories of leadership, namely Trait, Behaviour, and Contingency Theory. The author then chooses a particular focus on Contingency Theory, which is analysed further.

The historical importance of leadership traits. From trait theory to charismatic leadership Lea Graeser, 2021-09-29 Seminar paper from the year 2021 in the subject Business economics - Business Management, Corporate Governance, grade: 1,3, University of Applied Sciences Düsseldorf, course: Intercultural Management and Leadership, language: English, abstract: This paper focusses on the trait approach on leadership, whereby this theory concentrates on the personal traits of leaders. The trait theory was one of the first ones to study leadership. Different developments within the past and present, as well as a future outlook are explained and analysed. The approach developed from the assumption that great leaders are born to the hypothesis that great leaders can be made when there is a need for that. Successful leadership is extended to an interaction between the traits of a leader and the situation itself. Today's relevant aspects of the theory are the Big Five, Emotional Intelligence and Skills Leadership. In this light, this paper investigates future developments of leadership, focussing on charismatic and visionary leadership. Then, it presents an evaluation of the trait approach, its strengths and weaknesses and the importance of leadership traits for the future.

Well, the definition itself has been researched for so long which is evident by number of leadership definitions and theories of leadership that are presented by numerous research scholars. One of the definition of leadership is to be attributed to (Bavelas, 1969) who defined leadership as process and leadership is a personal attribute.
