Aristotle's Physics Book I Diana Quarantotto,2018-01-11 This book provides a comprehensive and in-depth study of Physics I, the first book of Aristotle's foundational treatise on natural philosophy. While the text has inspired a rich scholarly literature, this is the first volume devoted solely to it to have been published for many years, and it includes a new translation of the Greek text. Book I introduces Aristotle's approach to topics such as matter and form, and discusses the fundamental problems of the study of natural science, examining the theories of previous thinkers including Parmenides. Leading experts provide fresh interpretations of key passages and raise new problems. The volume will appeal to scholars and students of ancient philosophy as well as to specialists working in the fields of philosophy and the history of science.

Medieval Greek Commentaries on the Nicomachean Ethics Charles E. Barber,David Todd Jenkins,2009 Given the enduring importance of Aristotle's Nicomachean Ethics, it is remarkable to find that there is no extensive surviving commentary on this text from the period between the second century and the twelfth century. This volume is focused on the first of the medieval commentaries, that produced in the early twelfth century by Eustratios of Nicaea, Michael of Ephesus, and an anonymous author in Constantinople. This endeavor was to have a significant impact on the reception of the Nicomachean Ethics in Latin and Catholic Europe. For, in the mid-thirteenth century, Robert Grosseteste translated into Latin a manuscript that contained these Byzantine commentators. Both Albertus Magnus and Bonaventure then used this translation as a basis for their discussions of Aristotle's book. Contributors are George Arabatzis, Charles Barber, Linos Benakis, Elizabeth Fisher, Peter Frankopan, Katerina Ierodiakonou, David Jenkins, Anthony Kaldellis and Michele Trizio.

The Wiley International Handbook of Educational Foundations Alan S. Canestrari,Bruce A. Marlowe,2018-11-20 Promotes a model of critique for teachers, scholars, and policy makers to challenge established educational practice in a global context. The Wiley International Handbook of Educational Foundations features international scholars uniquely qualified to examine issues specific to their regions of the world. The Handbook provides readers with an alternative to the traditional

texts in the foundations of education by taking aim at the status quo, and by offering frameworks from which teachers and scholars of education can critically evaluate schools and schooling. Throughout, the essays are grounded in a broad historical context and the authors use an international lens to examine current controversies in order to provoke the kinds of discussion crucial for developing a critical stance. The Handbook is presented in six parts, each beginning with an Introduction to the subject. The sections featured are: Part I. Challenging Foundational Histories and Narratives of Achievement; Part II. Challenging Notions of Normalcy and Dominion; Part III. Challenging the Profession; Part IV. Challenging the Curriculum; Part V. Challenging the Idea of Schooling; and Part VI. Challenging Injustice, Inequity, and Enmity. The Wiley International Handbook of Educational Foundations offers unique insight into subjects such as: Educational reform in India, Pakistan, and China The global implications of equity-driven education Teacher education and inclusionary practices The Global Educational Reform Movement (G.E.R.M.) Education and the arts Maria Montessori and Loris Malaguzzi Legal education in authoritarian Syria The Wiley International Handbook of Educational Foundations is an important book for current and aspiring educators, scholars, and policy makers.

Educational Review Nicholas Murray Butler, Frank Pierrepont Graves, William McAndrew, 1917 Vols. 19-34 include Bibliography of education for 1899-1906, compiled by James I. Wyer and others.

Education and the Education of Teachers (International Library of the Philosophy of Education Volume 18) R.S. Peters, 2010-02-25 This collection of important and significant papers examines a wide range of issues with R S Peter's customary incisiveness and clarity. One of the author's main concerns is to clarify the meaning of 'education' and 'quality in education' - a phrase often used in public debate but seldom scrutinized. Long-standing ambiguities latent in the concept of 'liberal education' are also exposed, and Herbert Spencer's question 'What knowledge is of most worth?', vital in the light of the recent vast development of knowledge, is considered.

Religious Education John Sealey, 2019-08-13 The majority of books on religious education are written by those who are themselves adherents of particular religious beliefs and such books almost invariably reflect their authors' religious inclinations. Therefore a critical look at certain key aspects in religious education from a secular point of view was long overdue when this title was f

Changing the Educational Landscape Jane Roland Martin, 2017-09-29 Changing the Educational Landscape is a collection of the best-known and best-loved essays by the renowned feminist philosopher of education, Jane Roland Martin. Trained as an analytic philosopher at a time before women or feminist ideas were welcome in the field, Martin brought a philosopher's detachment to her earliest efforts at revolutionizing the curriculum. Her later essays on women and gender further showcase the tremendous intellectual energy she brought to the field of feminist educational theory. Martin explores the challenges and contradictions posed by the very concept of women's education, and also recognizes how the presence of

women necessitates the rearticulation of not only the curriculum but also the standard ideologies in education.
