**The Murderers' Club** P.D. Martin,2012-11-15 Six months ago, a case nearly cost Sophie her life. So when a detective friend asks her to visit Arizona, she welcomes the break. But her vacation ends abruptly when bodies are found at a university and she gets pulled into the case. The horrifying methodology--deliberate body positioning, a distinctive red heart scrawled on each victim--indicates to Sophie that a new serial killer has claimed the area. Oddly, though, certain signature elements differ between killings. Fortunately, the FBI database has a record of many of the signatures--but each belongs to a different serial killer. As the bodies continue to appear, Sophie must hone her terrifying skills and suffer the horrors in her head in order to stop this killer.

**A Guide to College Success for Post-traditional Students** Henry S. Merrill,2017-08-01 The purpose of this book is to

assist post-traditional students to achieve success in the Occupational, Workforce, and Leadership Studies (OWLS) Department and develop their individualized pathway to earn the interdisciplinary Bachelor of Applied Arts and Sciences (BAAS) degree at Texas State University. Applied baccalaureate degrees incorporate higher-order thinking skills and advanced technical knowledge and skills with applied coursework. BAAS students may also earn college-level credits through prior learning assessment (PLA), evaluating and credentialing knowledge and skills gained outside the classroom. The organization and content of this book provides adult degree program faculty and leaders an example of how one required textbook develops and supports the outcomes and activities in all the core courses of an interdisciplinary degree program designed for post-traditional adult learners. The majority of the students earning the BAAS degree are post-traditional students. They are often defined with some or all of these characteristics: over age 25 years old when starting or returning to college, may not have a traditional high school diploma, enroll part-time, work full-time, are financially independent, have dependents other than a spouse and may be a single parent. These students juggle multiple roles and responsibilities in the family, workplace, and community. Post-traditional students bring rich work/life experiences, may be experiencing personal and/or professional transitions, have clear career goals, and often finance their education. They seek flexible programs including online education, PLA, and accelerated course formats. Thus, post-traditional students want active, collaborative, and interactive learning relevant to career and other roles and goals.

*Making Sense of Beliefs and Values* Craig N. Shealy,2015-12-18 Social psychologists have studied beliefs and values, and related constructs such as attitudes and prejudice for decades. But as this innovative and interdisciplinary book convincingly demonstrates, the scientific examination of beliefs and values now influences research and practice across a range of disciplines. Specifically, this edited volume explores the many cutting edge implications and applications of Equilintegration or EI Theory and the Beliefs, Events, and Values Inventory (BEVI). Grounded in twenty years of research and practice, EI Theory seeks to explain the processes by which beliefs, values, and worldviews are acquired and maintained, why their alteration is resisted, and under what circumstances they are modified. Based upon EI Theory, the BEVI is a comprehensive analytic tool which examines how and why we come to see ourselves, others, and the larger world as we do as well as the influence of such processes on multiple aspects of human functioning. Edited by the developer of the EI model and BEVI method, and informed by contributions from leading U.S. and international scholars, this book features captivating research findings and pioneering practice applications. Research-focused chapters explain how the EI model and BEVI method

increase our conceptual sophistication and methodological capacity across a range of areas: Culture, Development, Environment, Gender, Personality, Politics, and Religion. Practice-oriented chapters demonstrate how the BEVI is used in the real world across a range of applied domains: Assessment, Education, Forensics, Leadership, and Psychotherapy. Written in an accessible and engaging manner, this fascinating and timely volume speaks to many of the most pressing issues of our day, by illuminating why we believe what we believe, and demonstrating how our beliefs and values may be assessed, explained, and transformed in the real world. Key Features: Presents an interdisciplinary theoretical model and innovative assessment method derived from two decades of work on the etiology, maintenance, and transformation of beliefs and values Features contributions from leading scholars from the U.S. and internationally, demonstrating the many implications and applications of this cutting edge approach for research and practice Demonstrates the importance of making sense of beliefs and values in addressing many of the most pressing issues of our day

**Cultural Pressures and Mental Health Challenges in Gen Z's Digital World** Hassan, Viana,Singh, Amrik,2025-11-10 The rise of influencer culture and constant digital connectivity has profoundly shaped how young people view themselves and the world around them. For Generation Z, growing up immersed in curated online realities has intensified pressures around identity, beauty, success, and authenticity, often leading to heightened anxiety, depression, and self-comparison. Understanding these dynamics is crucial for addressing the broader mental health challenges facing today's youth and for fostering healthier digital environments. Examining this intersection also sheds light on shifting cultural values and the long-term societal implications of living in a world mediated by social platforms. Cultural Pressures and Mental Health Challenges in Gen Z's Digital World explores the intersection of digital culture, influencer, media, and mental health among Generation Z. It reveals the hidden costs of constant connectivity from rising anxiety and depression to shifting cultural norms around authenticity, beauty, and success. Covering topics such as academic pressure, influencer marketing, and social media, this book is an excellent resource for educators, mental health professionals, researchers, academicians, and more.
