**The Significance of Aspect Perception** Avner Baz, 2020-06-24 In this volume, Baz offers a wide-ranging discussion of Wittgenstein's remarks on aspect-perception, with special focus on Wittgenstein's method. Baz starts out with an interpretation of Wittgenstein's remarks on aspects and continues with attempts to characterize and defend Wittgenstein's approach to the understanding and dissolution of philosophical difficulties. Baz ends with attempts to articulate—under the inspiration of Merleau-Ponty's phenomenology—certain dissatisfactions, both with Wittgenstein's remarks on aspect perception, and with his philosophical approach more generally. On the way, Baz explores connections between Wittgenstein's remarks on aspects and Kant's aesthetics. He examines ways in which the remarks on aspects may be brought to bear on contemporary philosophical work on perception. He discusses some of the implications of Wittgenstein's work on aspect perception for issues in moral philosophy and the philosophy of action.

*Theoretical and Crosslinguistic Approaches to the Semantics of Aspect* Susan D. Rothstein, 2008-03-20 The papers in this volume investigate the semantics of aspect from both a theoretical and a crosslinguistic point of view, in a wide range of languages from a number of different language families. The papers are all informed by the belief that a thorough exposure to the expression of aspect crosslinguistically is crucial for progress in understanding how the semantics of aspect works and what the semantic basis of aspectual distinctions is. The languages discussed include Russian, English, Dutch, Hebrew, Mandarin, Japanese and Kalaallisut. The issues discussed in this volume include the centrality of measuring and counting in an understanding of telicity; the importance of the singular/plural distinction in the study of aspect; the importance of homogeneity as a property of event types; the flexibility of lexical classes; and the interaction between expressions of aspect and the particular morphosyntactic structure of a language.
