Innovation and Trends in the Global Food Systems, Dietary Patterns and Healthy Sustainable Lifestyle in the Digital Age, 2nd edition Maha Hoteit,Reema Fayez Tayyem,Radwan Qasrawi,Haleama Al Sabbah,2023-07-31 All aspects of feeding and nourishing people: growing, harvesting, packaging, processing, transporting, marketing, and consuming food are part of the food system. Even before the COVID-19 pandemic, food systems faced many challenges such as hunger increases, which affected up to 811 million people as of 2020, while healthy diets were unaffordable for at least 3 billion people. More than 80% of the population affected by hunger and 95% of people unable to afford a healthy diet were found in Asia and Africa. Transformation of the global food system is clearly needed if we wish to embed equity, sustainability, and health as priorities in food provision and consumption. Some of these transformations will be facilitated through new technologies, while others will require public policy shifts, changes in the private agro-food industry, actions by civil society, and behavioral changes by individuals. In this dynamic context, technology actors and the consumers they serve sit at an important nexus within the food system, and have the potential to make decisions that cut across the challenges and opportunities to improve sustainable food system outcomes. Although food security has improved in developed countries, many countries, particularly low- to middle-income countries (LMIC), suffer from significant food insecurity challenges. In addition, food production, accessibility, and availability have been further impacted due to the COVID-19 outbreak, causing growing global concerns regarding food security, especially within the most vulnerable communities. Moreover, the transformation of food systems for addressing healthy nutrition, food insecurity, and public health issues is a global concern. Food security and nutrition systems are directly related to human well-being and global stability, particularly in a time when diets transition toward increased reliance upon processed foods, increased fast-food intake, high consumption of edible oils, and sugar-sweetened beverages, lack of physical activities, and increased lifestyles worldwide. These changes in lifestyle continue to contribute to the growing pandemic of non-communicable diseases such as obesity, diabetes, hypertension, and cardiovascular diseases are clearly noticed across the globe. The study of nutrition systems, food security, and the roles of technological advances,

especially in LMIC, is considered the major factor in understanding food transition and population health. Physical inactivity threatens LMIC public health as it is a prime behavioral risk factor associated with major non-communicable diseases such as coronary heart disease, type 2 diabetes, and breast and colon cancer. Its long-term impacts increasingly burden national economies. Decreasing its prevalence is paramount toward decreasing premature mortality and restoring healthy populations. In its most recent iteration of a global action plan for the prevention of non-communicable diseases, the World Health Organization established voluntary global targets to reduce physical inactivity by 10%. Currently, limited published systematic analysis of physical inactivity prevalence among Muslim-majority countries exists. Existing literature is concentrated on Arab countries, which represent less than half of all Muslim nations. To date, however, pan-Islamic physical inactivity data have not been reported. Doing so can potentially galvanize religion-specific agencies (e.g., Islamic Relief Worldwide, Organization of Islamic Cooperation) to support efforts aimed at decreasing physical inactivity.

Operation Cleeves, SOEs Forgotten Wartime Tragedy in Thailand Kathleen Reid-Smith, 2025-01-30 Uncovers a daring SOE mission in 1941 Southern Thailand, where civilians and soldiers bravely fought Japan's invasion. Southern Thailand, 1941. This is the story of Operation Cleeves. A daring and long forgotten SOE Far East mission, where a handful of tin miners risked their lives fighting against the onslaught of Japan on the eve of World War Two in Southeast Asia. Using declassified documents, previously undiscovered records and extensive original research, Kate Reid-Smith provides an intimate yet harrowing look into a most secret and turbulent operation shrouded in mystery. Where vivid and powerful accounts of tremendous courage in the face of resilience and redemption, uncovers how an eclectic mix of European civilians and Indian soldiers all marooned amid danger, violence and bloodshed, were suddenly confronted by unspeakable survival choices, as the circumstances of war catapulted them into an unimaginable world of horrific atrocities. Some of their stories are told for the very first time in this revelatory book, uncovering perilous undertakings requiring daring and sang-froid bravery, and how using only their wits for survival, all bore the full brunt of Japan's initial invasion.
