A Descriptive Grammar of Ket (Yenisei-Ostyak) Stefan Georg, 2007-03-22 Linguists and specialists on Siberia are generally familiar with the name Ket, which designates a small ethnic group on the Yenisei and their language, widely regarded as a linguistic enigma in many respects. Ket is a severely endangered language with today less than 500 native speakers. Together with Yugh, Kott, Arin, Assan and Pumpokol, all of which are completely extinct, it forms the Yeniseic family of languages, which has no known linguistic relatives. This Grammar of Ket constitutes the first book of its kind in English and is structured as follows: (1) Introduction; (2) The Kets and their Language; (3) Phonology; (4) Morphology; (5) References. A second volume is planned on Ket syntax, supported by a collection of original texts with translations and annotations.

Studies in Ditransitive Constructions Andrej Malchukov, Martin Haspelmath, Bernard Comrie, 2010-12-23 This rich volume deals comprehensively with cross-linguistic variation in the morphosyntax of ditransitive constructions: constructions formed with verbs (like give) that take Agent, Theme and Recipient arguments. For the first time, a broadly cross-linguistic perspective is adopted. The present volume, consisting of an overview article and twenty-odd in-depth studies of ditransitive constructions in individual languages from different continents, arose from the conference on ditransitive constructions held at the Max Planck Institute for Evolutionary Anthropology (Leipzig) in 2007. It opens with the editors' survey article providing an overview of cross-linguistic variation in ditransitive constructions, followed by the questionnaire on ditransitive constructions, compiled by the editors in order to elicit various properties of these patterns. The editors' overview discusses formal properties of ditransitive constructions as well as behavioral (or syntactic) and lexical properties (i.e., the extension of ditransitive constructions across different verb classes). The volume includes 23 contributions describing properties of ditransitive constructions in languages from all over the world, written by leading experts. Care has been taken that the contributions to the volume will be representative of structural, geographic and genealogical diversity in the domain of ditransitive constructions. Thus the present volume provides a unique source of information on typological diversity of ditransitive constructions. It is expected that it will be of central interest to all scholars and advanced students of linguistics, especially to those working in the field of language typology and comparative syntax.

The Unofficial Vocabulary, Words & Grammar Practice Exercises for Cambridge English LanguagePRESS, 2016-08-31 You want to know that there is a Vocabulary List (and an accompanying Topic List) for the KET exam. However, the list is not exclusive and you may see words outside of this list in the real exam. This product comes with several modules with contents we develop for covering words in the Word List as well as some related words outside of the list. The goal is to get you adequately prepared for the exam. Some questions are pure textual, while some are graphical. There are quite many questions on grammar. There are reading comprehensions with right/wrong/doesn't say options. And there are many fill-the-gap questions based on conversations/notes taking/mail messages! There are 130 questions included in this product. To make it easy for you, choices will be provided initially. As you progress, some questions will require that you spell out the entire word expected.

Clause Linkage in Cross-Linguistic Perspective Volker Gast, Holger Diessel, 2012-10-01 The volume is a collection of thirteen papers given at the "Third Syntax of the World's Languages" conference, complemented with four additional papers as well as an introduction by the editors. All contributions deal with clause combining, focusing on one or both of the following two dimensions of analysis: properties of the clauses involved, types of dependency. The studies are data-driven and have a cross-linguistic or typological orientation. In addition to survey papers the volume contains in-depth studies of particular languages, mostly based on original data collected in recent field work.
