Eugene Louis Colichman

Salter's Higher Chemistry, 1999 This work provides coverage of the content statements in the arrangements for Higher Chemistry, organized by the three units in the course: Energy Matters; the World of Carbon; and Chemical Reactions. At the start of each unit students are given guidance on what they need to know and understand.

Physical Science Experiments Pam Walker, Elaine Wood, 2010 Presents new, tested experiments related to the intriguing field of physical science. The experiments are designed to promote interest in science in and out of the classroom, and to improve critical-thinking skills.

Chemistry in the Community. American Chemical Society, 2002 This volume has relevance to a wide number of courses, giving a hands-on introduction to chemistry in relation to community issues rather than around specific chemical concepts.

Illustrated Guide to Home Forensic Science Experiments Robert Bruce Thompson, Barbara Fritchman Thompson, 2012-08-08 Have you ever wondered whether the forensic science you've seen on TV is anything like the real thing? There's no better way to find out than to roll up your sleeves and do it yourself. This full-color book offers advice for setting up an inexpensive home lab, and includes more than 50 hands-on lab sessions that deal with forensic science experiments in biology, chemistry, and physics. You'll learn the practical skills and fundamental knowledge needed to pursue forensics as a lifelong hobby—or even a career. The forensic science procedures in this book are not merely educational, they're the real deal. Each chapter includes one or more lab sessions devoted to a particular topic. You'll find a complete list of equipment and chemicals you need for each session. Analyze soil, hair, and fibers Match glass and plastic specimens Develop latent fingerprints and reveal blood traces Conduct drug and toxicology tests Analyze gunshot and explosives residues Detect forgeries and fakes Analyze impressions, such as tool marks and footprints Match pollen and diatom samples Extract, isolate, and visualize DNA samples Through their company, The Home Scientist, LLC (thehomescientist.com/forensics), the authors also offer inexpensive custom kits that provide specialized equipment and supplies you'll need to complete the experiments. Add a microscope and some common household items and you're good to go.

Degradation of Ascorbic Acid in Different Temperatures. The Influence of Temperature on Vitamin C Maciej

Nodzyński, 2021-08-27 Scientific Essay from the year 2021 in the subject Chemistry - Food Chemistry, grade: 7 (IB), , language: English, abstract: This paper aims to investigate how different temperatures influence the degradation of vitamin C as well as to clarify the preconception about this vitamin. More specifically, the relationship between the temperature and the concentration of vitamin C will be researched. The research suggests that vitamin C degrades in elevated temperatures so it is highly probable that it also degrades in hot tea and other hot beverages. Consequently, vitamin C is rather not the component of hot tea with lemon juice that provides curative properties, opposite to what many people believe. The subject is important because it extends the knowledge about how vitamin C degrades in different temperatures and how to handle this vitamin properly. The research shows at which temperature vitamin C is most effective and this information could be useful for pharmaceutical companies when improving the effectiveness and medicinal properties of drugs where vitamin C is the main constituent. The investigation uses the method of redox titration of vitamin C with iodine solution and the detailed information about this process is presented.
