**Rich Country Interests and Third World Development** Robert Cassen, Richard Jolly, John W. Sewell, Robert Wood, 2025-04-01 First published in 1982, *Rich Country Interests and Third World Development* adds breadth and specificity to the exploration of the interests in Third World development of eleven “rich” countries—the United States, Canada, Japan, Australia, the United Kingdom, the Federal Republic of Germany, The Netherlands, Denmark, Sweden, Norway, and France. The authors analyze a spectrum of Northern economic, political, and security interests in development in the South. They also examine how national experiences, political traditions, humanistic values, and changing attitudes have influenced perceptions of and relationships with Third World countries over three decades of dramatic change in the North-South environment. This book helps lay a foundation for negotiated solutions to North-South issues by offering a greater appreciation of differences as well as commonalities in interests both among and within industrial and developing countries. An overview chapter points to issues broader than those raised in the country studies and addresses a critical question: On what terms is it in the interests of the North and South to pursue and fashion interdependence between them in the 1980s?

**Technological Innovation and Third World Multinationals** Paz Estrella Tolentino, 2003-09-02 This examines the relationship between technological growth and outward direct investment from firms in Asia and Latin America which has become increasingly significant as these countries develop.

**Human Rights and Migrant Domestic Work** Maria Deanna P. Santos, 2005-09-01 On a general level, this research project concerns ways in which the domestic and international laws relating to the situation of migrant domestic workers (MDWs) are shaped by broader socio-political and economic factors. More specifically, this dissertation examines the human rights situation of Filipina MDWs who participate in Canada’s Live-in Caregiver Program (LCP). It attempts to meet these objectives, in part, by undertaking a limited comparison of the situation of these Filipina MDWs and the Filipina MDWs in Hong Kong. The comparison is meant to further test and validate the arguments and proposals presented in this dissertation

regarding the socio-legal status of Filipina MDWs under Canada's LCP. This is done through an analysis of existing data on Filipina MDWs, and a consideration of the ways in which the relevant laws and policies in these two jurisdictions affect, create and/or perpetrate the status quo in this area of social life. The main explanatory theoretical framework that is deployed is the Third World Approaches to International Law (the TWAIL theory).

**Night Owl: A Nationbuilder's Manual: 2nd Edition** Anna Mae Yu Lamentillo, 2023-06-19 Night Owl Second Edition offers a comprehensive look at the Build Build Build Program – President Rodrigo Duterte's medium term development strategy to effectively usher in Philippines' Golden Age of Infrastructure. It follows and provides a firsthand narrative of the daunting details of task, reforms, and projects undertaken by Department of Public Works and Highways Secretary Mark Villar. Night Owl sheds light into the difficult challenges, critiques, and difficult decisions faced by the Build Build Build team and dives into the consequences subsequently. Witness heartwarming stories of Filipinos whose lives have improved with the completion of roads, bridges, rail, flood control projects, airports, seaports and classrooms. There is no question that physical infrastructure impacts on the quality of human life. Every new road or bridge that connects a remote barangay to the town proper opens new opportunities for a hundreds to sell and buy goods and interact with other communities; every schoolroom built brings literacy and a chance to improve the lives of thousands of Filipino children; every health center put up or potable water source developed makes numerous lives healthier; and every seaport or airport constructed or improved connects communities around it to the rest of the world. Public investment in physical infrastructure is an imperative. "Night Owl" documents the making of the physical infrastructure projects that the Duterte administration completed in six years under its Build, Build, Build program. But beyond this, it expounds on the vision of an administration determined to take bold steps to close the country's infrastructure gap and the key persons who pushed hard to realize this ambitious program. This book reveals the strong political will of President Rodrigo Duterte and his people to uplift the quality of our countrymen's lives. "Night Owl" is as much an undisputable record of what President Duterte and his team have achieved to upgrade our country's physical infrastructure as it is a well-documented tribute to the sacrifices of the men and women of this administration — both the early birds and the night owls — who toiled day and night to deliver on their commitments. For the next set of technocrats who want to know what must come with political will to accomplish such a tremendous undertaking; the doubters who won't believe unless presented with figures and photos; the armchair travelers who wish to experience our provinces vicariously; and the families and friends of the people who took part in constructing these school buildings, evacuation and health centers, roads, bridges, flood control projects seaports, and airports, this book is a good read. — HON. GLORIA MACAPAGAL-ARROYO 14th President of the Philippines Night Owl is a compelling visual and informative storytelling of Philippine's journey of change and transformation as it rally Philippines from a tiger cub economy to first world country. Anna Mae Lamentillo's book, "Night Owl," provides a bird's eye view of the government's Build, Build, Build

program. It's her finishing touches, her additional contribution to her work as the project's chairperson while she was with the DPWH. Inside the pages of "Night Owl," one can read about and see the developments that have helped move the country forward, even during the most challenging years brought by the Covid-19 pandemic. — EMILIO YAP III President and Vice Chairman, Manila Bulletin Publishing Corporation

Third World Dimensions in Conflict Resolution Abby J. Nalwanga-Sebina, 1989

**Airpower in Small Wars** James S. Corum, Wray R. Johnson, 2003 The use of airpower in wartime calls to mind the massive bombings of World War II, but airplanes have long been instrumental in small wars as well. Ever since its use by the French to put down rebellious Moroccan tribes in 1913, airpower has been employed to fight in limited but often lengthy small conflicts around the globe. This is the first comprehensive history of airpower in small wars-conflicts pitting states against non-state groups such as insurgents, bandits, factions, and terrorists-tracing it from the early years of the twentieth century to the present day. It examines dozens of conflicts with strikingly different scenarios: the Greek Civil War, the Philippine Anti-Huk campaign, French and British colonial wars, the war in South Vietnam before the American escalation, counterinsurgency in southern Africa, Latin American counter guerrilla operations, and counterinsurgency and counterterrorist campaigns in the Middle East over the last four decades. For each war, the authors describe the strategies employed on both sides of the conflict, the air forces engaged, and the specific airpower tactics employed. They discuss the ground campaigns and provide the political background necessary to understand the air campaigns, and in each case they judge the utility of airpower in its broadest sense. In their historic sweep, they show how forms of airpower evolved from planes to police helicopters, aircraft of the civilian air reserve, and today's unmanned aircraft. They also disclose how small wars after World War II required new strategies, operational solutions, and tactics. By taking this broad view of small-war airpower, the authors are able to make assessments about the most effective and least effective means of employing airpower. They offer specific conclusions ranging from the importance of comprehensive strategy to the need for the United States and its allies to expand small-wars training programs. *Airpower in Small Wars* will be invaluable for educating military professionals and policy makers in the subject as well as for providing a useful framework for developing more effective doctrine for employing airpower in the conflicts we are most likely to see in the twenty-first century.

**Martial Law in the Philippines** Robert E. Klitgaard, 1972 Martial law occurred at a bleak time in the history of the Philippines and in the career of President Ferdinand Marcos. The populace was apparently united in only one thing--the need for drastic action, and it appears that martial law was accepted calmly by the overwhelming majority of Filipinos. After one month of martial law, President Marcos seemed in control of a civilian government, with strong military presence, that was implementing a series of well-planned, detailed reforms, was cracking down on dissidents, and was as yet not brutal in everyday application. Why all this occurred is open to a number of different interpretations. Three are offered in the report.
