It Hurts When I Poop! Howard J. Bennett, 2021-12-03 iParenting Media Award Winner Ryan is scared to use the potty. He is afraid to have a poop, because he's afraid it's going to hurt. He does NOT want to go. This story, along with Ryan's poop program, will help young children gain the confidence they need to overcome this common problem and establish healthy habits. Includes a Note to Parents by the author, From the Note to Parents: The book includes a “poop program” that I use with children between the ages of 3 and 6. While the program is ostensibly for the main character, my hope is that your child will want to follow these steps as well. How you approach the program will vary somewhat depending on your child's age. Most 3- to 4-year-olds do not need to do the program in a formal way. Instead, you can incorporate parts of the program into your daily routine—make the needed dietary changes, reward successful pooping with stickers, and consider reviewing how poops come out of the body. Most 5- to 6-year-olds are interested in doing the full program, though it is still important to be flexible. For example, if a 5-year-old does not want to do Potty Practice, I would adjust things accordingly.

If Your Kid Eats This Book, Everything Will Still Be Okay Lara Zibners,2009-06-17 As an Emergency Room pediatrician, Dr. Lara Zibners has seen it all. She's cared for a portion of the 25 million children in the U.S. who are taken to the ER each year-and she knows that more than 50% of these visits may be unnecessary. If Your Kid Eats this Book, Everything Will be Okay shows parents when they may need to take action, and when they might be able to just go back to bed and call their doctor in the morning. With sections such as In the Diaper and His Noggin and the Nervous System, Dr. Zibners covers every part of the body and offers sound advice (for example, did you know that oil is the best remedy for dissolving superglue between body parts?), all while maintaining a lively and often hilarious tone. To the question, What if she chokes on her vomit? Zibners answers, A healthy child will not choke on her own vomit, unless she is drunk or high on Grandma's sleeping pills. Finally, no more frantic late-night searches through the why to buy, how to diaper, or what to feed him sections found in other childcare books to find out if little Franny needs to go to the ER. This book focuses on the truly important questions, like how to keep her from electrocuting herself in the first place. Not every child has a pediatrician with specialized emergency room experience living in her home. But this book just might be the next best thing. Lara Zibners, MD, is a former Assistant Professor of Pediatric Emergency Medicine at Mount Sinai Hospital in New York City. Currently, she divides her professional time between New York and London.

Potty Training For Dummies Diane Stafford,Jennifer Shoquist,2002-06-25 If you could remember your own potty training, you'd probably recall a time filled with anxiety and glee, frustration and a sense of accomplishment, triumphal joy and shamed remorse. You'd remember wanting so much to make mommy and daddy happy, and at the same time to make them pay for being so darned unreasonable. And you'd recall feeling incredibly grown up once you got it right. Maybe if we could remember our own potty training, it wouldn't be so tough when it came our turn to be the trainers. But as it is, most of us feel like we can use all the expert advice and guidance we can get. Potty Training For Dummies is your total guide to the

mother of all toddler challenges. Packed with painless solutions and lots of stress-reducing humor, it helps you help your little pooper make a smooth and trauma-free transition from diapers to potty. You'll discover how to: Read the signs that your tot is ready Motivate your toddler to want to give up diapers Kick off potty training on the right foot Foster a team approach Deal with setbacks and pee and poop pranks Make potty training a loving game rather than a maddening ordeal Mother and daughter team, Diane Stafford and Jennifer Shoquist, MD separate potty-training fact from fiction and tell you what to expect, what equipment you'll need, and how to set the stage for the big event. They offer expert advice on how to: Choose the right time Use a doll to help model behavior Say the right things the right way Reinforce success with praise and rewards Switch to training pants Get support from relatives Cope with special cases Train kids with disabilities And they offer this guarantee: "If your child is still in diapers when he makes the football team or gets her college degree, you can send him or her off to us for a weekend remedial course—and ask for a refund of the cost of this book."
