Los sistemas nacionales de evaluación en América Latina y el Caribe. ¿Impacto pedagógico u obediencia institucional?

Fabio, Jurado Valencia,2009-08-31 A partir de la década de 1990 se fundaron en todos los países del mundo sistemas nacionales de evaluación con el propósito de identificar una relación de equivalencia entre lo que ofrece la escolaridad y los aprendizajes alcanzados por los estudiantes. Sin embargo, son muy pocas las iniciativas para lograr el enlace entre los resultados de las pruebas y la formación de los docentes. Este libro presenta algunos aspectos del problema y resalta lo que se hace al respecto en países latinoamericanos que han insistido en la constitución paulatina de sus sistemas nacionales de evaluación.

Procesos de acompañamiento en la formación inicial y continua de profesores en matemática Natalia

Sgreccia,2018-08-20 Esta obra propende a socializar con la comunidad de educadores matemáticos de manera sintetizada nuestros aportes relativos a la construcción de conocimiento matemático para la enseñanza (MKT) desde los ejes en los que hemos aventurado en el Proyecto de Investigación «Procesos de acompañamiento en la formación inicial y continua de profesores en Matemática» (1ING445, 2014-2017). Son cinco: la Biografía escolar en la formación del profesor en Matemática, entendida como el cúmulo de experiencias que los docentes han tenido siendo alumnos; las Narrativas pedagógicas como dispositivos en la formación docente, en tanto relatos subjetivos y dinámicos que posibilitan reconstruir el pasado; la Geometría que el profesor va configurando en su formación, como la tradicional rama de la Matemática que estudia las figuras y sus propiedades; el GeoGebra, como software paradigmático que conjuga diversas ramas de la Matemática y cuyas posibilidades didácticas dependen del profesor; los Materiales didácticos de los que puede valerse un profesor para su tarea de enseñanza de la Matemática. Esperamos que los resultados de nuestras investigaciones contribuyan a la formación de profesores en Matemática tanto en su etapa inicial como continua. Consideramos que si se estudian los procesos de acompañamiento en los que se construye el conocimiento propio de esta profesión y se generan propuestas fundamentadas desde los resultados de la investigación se está materializando una contribución superadora.
