**Humans at Work** Anna Tavis, Stela Lupushor, 2022-03-03 Is your organization strategically prepared for the digital and distributed workplace? Technology, data analytics and artificial intelligence already impact how people work and engage with organizations. A dispersed workforce, greater transparency, social change, generational shift and value chain disruptions are driving new behaviors and expectations from the workplace. Together, these trends are shaping a new era of distributed and digitally enabled network of workers where the work comes to workers instead of the workers going to work. In Humans at Work, employee and workplace experience experts Anna Tavis and Stela Lupushor advocate for the adoption of human-centric practices as a critical and necessary part of adapting work and workplaces to the future of work. Outlining the four factors (digitization of work, distributed workplaces, organizational redesign and changing workforce) driving the dramatic changes in the workplace, each chapter provides examples of how innovative companies are building workplace infrastructure and reshaping norms, serving new markets and adopting new technologies. Filled with examples from both start-ups and established companies, Humans at Work is the workplace leader's guide to building a workplace that creates market value by making work more human.

Mindfulness, Mind-body Exercises, and Health Promotion Guodong Zhang, Yang Cao, Zi Yan, 2025-02-14 High-intensity sports and physical exercise have been linked to various health benefits. However, when it comes to increasing longevity, these activities may not be an ideal option for the general population. Mind-body exercise, which combines physical exercise with mindfulness, may be more effective in promoting and restoring health, especially for those with chronic symptoms or poor health conditions. Many mind-body exercises, such as Taichi, Qigong, Chan-Chuang, and Yoga, have their roots in Eastern cultures. They have gained popularity around the world and became a new fashion in the post COVID-19 era. These exercises typically help practitioners shift their focus from the outside world, past, or future to the present moment through gentle body movements. Mind-body exercises emphasize the body's innate ability to heal itself. By disconnecting from the "noisy" outside world, the body is given the opportunity to heal. This aligns with the classic belief in Chinese medicine that "the body itself is the best medicine".

The Psychology of Compassion and Cruelty Thomas G. Plante Ph.D., 2015-03-03 This thoughtful book brings together some of the best psychological and spiritual thinkers to ponder evidence-based reflections about the development and nurturance of compassion. In an effort to alter behavior, scientists have conducted research to better understand the factors that contribute to both caring and cruel behavior among individuals and groups. This uplifting volume reviews evidence collected from experts across disciplines and explains how certain psychological, spiritual, and religious factors spur compassion and deter cruelty. The work extols the importance of religion and psychology as tools for better understanding

and influencing behavior. With deep reflection combined with research-based insights, the book considers the various avenues for creating kinder human beings. Expert contributors examine empirical evidence to learn if engagement in particular activities results in benevolent behavior, while chapters present the many ways in which kindness touches all aspects of life—from racial harmony, to child rearing, to work environments. Topics include exploring the healing effects of prayers and meditation, integrating compassion into higher education, and parenting with greater mindfulness and care.

It replays conversations you had years ago, or suddenly, you're fixated on that minor mistake at work. Annoying, right? You're not alone in this mental circus. According to research, a mind-blowing 73% of 30-year-olds overthink like it's a full-time job. But wait, it's not just the younger crowd. Picture this: You're trying to enjoy a simple dinner with loved ones, but instead, you're mentally composing an email that doesn't even need to be sent until next week. Or how about when you're so caught up in the what-ifs that you miss out on the what-is happening right before you? This isn't just a pesky little problem; it's like having a stone in your shoe on a never-ending hike. Life's too short to waste it in what could be or what was.
