**Multiculturalism and Democracy in North Africa** Moha Ennaji, 2014-04-16 Investigating the connections between multiculturalism, minorities, citizenship, and democracy in North Africa, this book argues that multiculturalism in this region- and in the Arab world at large - has reached a significant level in terms of scale and importance. In the rest of the world, there has been a trend - albeit a contested one - toward a greater recognition of minority rights. The Arab world however, particularly North Africa, seems to be an exception to this trend, as Arab states continue to promote highly unitary and homogenizing ideas of nationhood and state unity, whilst discouraging, or even forbidding, minority political mobilization. The central theoretical premise of this book is that North Africa is a multicultural region, where culture is inherently linked to politics, religion, gender, and society, and a place where democracy is gradually taking root despite many political and economic hurdles. Addressing the lacuna in literature on this issue, this book opens new avenues of thought and research on diversity, linking policy based on cultural difference to democratic culture and to social justice. *Multiculturalism and Democracy in North Africa* will be of use to students and researchers with an interest in Sociology, Cultural Studies, and Political Science more broadly.

**The World as a Global Agora** Soumia Boutkhil, Larbi Touaf, 2009-03-26 In the current postmodern reality where society is no longer viewed as a totality but as a collection of individual interests, public space both as a physical and symbolic space, has no determined contours and the public sphere is likely to take new forms. Yet as a crucial principle of democracy, public space will continue to feed discussions as long as models of participatory democracy represent the guarantor of good governance and the preservation of the public good. Ranging from architecture, sociology, to literary criticism and women and gender studies, the essays that compose this collection have as a common denominator the idea of public space as a vital aspect of public life in modern as well as in developing and traditional societies. Placing themselves beyond the relentless theoretical debates around the concept of public space, the authors agree that no matter what forms it takes, public space remains a fundamental aspect of even those societies that until recently were viewed as hermetically sealed. What emerges from the different perspectives included in this book is a general consensus that the symbolic value of the physical public space is grounded in the collective socio-political consciousness as the basis for a general sense of civic action.

*Modern Arabic* Clive Holes, 2004 The revised and updated edition of *Modern Arabic* takes this authoritative, concise

linguistic description of the structure and use of modern Arabic to an invaluable new level. Clive Holes traces the development of the Arabic language from Classical Arabic, the written language used in the 7th century for the Qur'an and poetry, through the increasingly symbiotic use of Modern Standard Arabic or MSA (the language of writing and formal speech) and dialectal Arabic (the language of normal conversation). He shows how Arabic has been shaped over the centuries by migration, urbanization, and education--giving us a balanced, dispassionate, and accurate picture of the structures, functions, and varieties of the contemporary Arabic language. Holes explains the structural characteristics--phonology, morphology, syntax, semantics, and lexical and stylistic developments--that the majority of the dialects share, as distinguished from Modern Standard Arabic. He also shows how native speakers use both types of Arabic for different purposes, with MSA being the language of power and control as used on television and in political speeches, and the dialects serving as the language of intimacy and domesticity. He further shows how MSA and spoken dialects are not as compartmentalized as one might be led to believe. Modern Arabic illustrates the use of the Arabic language in real life, whether in conversation, news bulletins and newspaper articles, serious literature, or song. This new edition takes into account research published in several areas of Arabic linguistics since the first edition was published in 1995. It includes more extensive comment on the North African Arabic vocabulary of Modern Standard Arabic, more information about mixed varieties of written Arabic that are not in MSA (especially in Egypt), updated references, explanations, and many new examples. All Arabic is transcribed, except for an appendix presenting the Arabic alphabet and script. Students of the Arabic language will find Modern Arabic without peer--as will those general linguists who are interested in discovering how Arabic compares structurally and sociolinguistically with European languages.

The Bloomsbury Handbook of Linguistic Landscapes Robert Blackwood, Stefania Tufi, Will Amos, 2024-06-29 Presenting a detailed examination of the origins, evolutions, and state-of-the-art of linguistic landscape research, *The Bloomsbury Handbook of Linguistic Landscapes* is a comprehensive guide to the burgeoning field of linguistic landscapes and the study of meaning and interpretation in public spaces and settings. Providing a thorough synopsis of the theories, methodologies, and objects of study which inflect linguistic landscape research across the world, this book is the ideal companion for both new and experienced readers interested in the processes of communication in public spaces across diverse settings and from a broad range of perspectives. Through a wide selection of case studies and original research, the handbook highlights the global reach of linguistic landscape theories and practices. Scrutinising an array of qualitative, quantitative, and mixed methodological approaches for analysing a wide spectrum of meaning-making phenomena, it investigates semiosis in contexts ranging from graffiti and street signs to tattoos and literature, visible across a variety of sites, including city centres, rural settings, schools, protest marches, museums, war-torn landscapes, and the internet.

**Women in Policing around the World** Venessa Garcia, 2021-03-24 *Women in Policing around the World* is a historical,

legal, political, and social examination of women in policing. The book opens with a comparison of cultural definitions of gender and how this affects women's work in general and policing specifically. The book then takes the reader through women in policing in the Eastern and Western Hemispheres, featuring several countries within the major regions of the world. Major commonalities and differences are identified in the areas of recruitment, training, deployment, promotion, and violence against women. Among the key features of this book is a balanced coverage of historical and timely events that led to the current status of women police in their respective countries. The book identifies the commonalities that women police experience throughout the world, relying on the most current research. The book also dedicates coverage of policing violence against women in society as well as within the police organization itself. The author includes tables to allow for national comparisons throughout the book, as well as current and historical photos. This book is intended for researchers and students of police culture and women in policing. It does not rely heavily on one country or region, thus allowing for an enlightening international comparison.

**Indigenous Grammar Across Cultures** Hannes Kniffka, 2001 This book deals with various «indigenous» traditions of grammatical thought across the globe. Its main perspective is a cross-cultural sociolinguistic and anthropological linguistic account of «Indigenous Grammar». The concept (relating to Bruno Liebich's term 'Einheimische Grammatik') is taken in its widest sense here to account for a continua of forms and ways of language-oriented research, various degrees of systematic reflection on language structure and use, the culture-specific ingredients of different grammatical «schools», linguistic and folk-linguistic speculation, language awareness, linguistic ideologies and similar endeavours. Some assumptions underlying the central hypotheses of this book are: - Linguistics, every grammatical description, has a strong cultural binding. - It is worthwhile to describe the culturally bound differences in a systematic fashion. - There are indigenous grammars and

grammarians of entirely different denominations than what Western linguists are accustomed to dealing with. - A heuristic continua of indigenous grammar can be set up which is worth being studied by linguists in a cross-cultural comparative fashion.

**Language and Gender in the Mediterranean Region** Moha Ennaji, 2008

**French in and Out of France** Kamal Salhi, 2002 This book examines policy planning and implementation and language variation in the realm of intercultural communication in France, Europe, the Americas, Australia, North and Sub-Saharan Africa and the Middle East. The book aims to discern trends in the development of the capacity of Francophone speakers to engage in dialogue across linguistic boundaries. Each study in the volume seeks to evaluate and analyse the antagonistic situations that have resulted from colonial culture and the post-independence hegemonic cultures. These situations are investigated through their expression in the French language and the languages with which it coexists in the countries considered here. The expertise of linguists and language specialists in this volume provides formalist and structural insights and an innovative phenomenology of language and newly available quantitative and qualitative studies of synchronic language. These methodologies are applied to a wide range of subject areas: law, history, literature, politics and society. Taken as a whole the book offers a fresh perspective on the issues surrounding French within and beyond France in the post-colonial and Francophone contexts.
