

Parc De La Villette Bernard Tschumi

Graham Cairns

Parc de la Villette Collin Mickey, 2013

Bernard Tschumi: Parc de la Villette Samantha Hardingham, Kester Rattenbury, 2012 This title addresses the groundbreaking public space with art installations. Supported by an extensive illustrated section, this innovative text is an invaluable resource for any architecture student and an inspiring record of this fascinating project.

Tschumi Parc de La Villette Bernard Tschumi, Jacques Derrida, Anthony Vidler, 2014 Tschumi Parc de la Villette is the first publication to document comprehensively Bernard Tschumi's first, and arguably still most celebrated project. With new and republished writing including a text by Bernard Tschumi and Anthony Vidler's Trick-Track originally published in 1986, alongside a newly-commissioned essay assessing the Parc from a contemporary and historical perspective, this book documents Parc de la Villette from its conception, through the 30 years of its existence, to the present. Tschumi Parc de la Villette includes drawings, concept sketches, models and photographs showing the development of the Parc over three decades, brought together in a single volume for the first time since the 1980s. One of the Grands Projets commissioned by the French Government in the 1980s, Parc de la Villette set a benchmark for urban parks in the latter part of the twentieth century and into the twenty-first. Tschumi constructed a series of follies across the site, creating what he called the largest discontinuous building in the world. Published to coincide with the 30th anniversary of the Parc, Tschumi Parc de la Villette broadly celebrates the project, and particularly the way in which it has been embraced by generations of Parisians and a diverse international public.

Bernard Tschumi, Cinégramme Folie : Le Parc de la Villette Tschumi, 1987-12

The Architecture of Paris Andrew Ayers, 2004 The author here presents an architectural history of Paris, stretching from the 3rd century BC up until the end of the 20th century.

Architectural Drawings as Investigating Devices Marianna Charitonidou, 2023-07-10 Architectural Drawings as Investigating Devices explores how the changing modes of representation in architecture and urbanism relate to the transformation of how the addressees of architecture and urbanism are conceived. The book diagnoses the dominant epistemological debates in architecture and urbanism during the 20th and 21st centuries. It traces their transformations, paying special attention to Le Corbusier and Ludwig Mies van der Rohe's preference for perspective representation, to the

diagrams of Team 10 architects, to the critiques of functionalism, and the upgrade of the artefactual value of architectural drawings in Aldo Rossi, John Hejduk, Peter Eisenman, and Oswald Mathias Ungers, and, finally, to the reinvention of architectural programme through the event in Bernard Tschumi and the Office for Metropolitan Architecture (OMA). Particular emphasis is placed on the spirit of truth and clarity in modernist architecture, the relationship between the individual and the community in post-war era architecture, the decodification of design process as syntactic analogy and the paradigm of autonomy in the 1970s and 1980s architecture, the concern about the dynamic character of urban conditions and the potentialities hidden in architectural programme in the post-autonomy era. This book is based on extensive archival research in Canada, the USA and Europe, and will be of interest to architects, artists, researchers and students in architecture, architectural history, theory, cultural theory, philosophy and aesthetics.

Large-Scale Urban Parks on Post-Industrial Sites in Contemporary Urban Landscape Conceptions Mengyixin Li, 2023-08-09 The theme is related to “Large Parks on Post-industrial Sites in Contemporary Urban Landscape Conceptions”, which is expounded in the fields of landscape architecture, landscape ecology and urban planning. A worldwide perspective is created so as to conduct cross-cultural research on the theories and practices of large-scale urban parks in North America, Germany and China. Through the scientific approach of ‘critical rationalism’, three design paradigms of large parks in different conceptions of contemporary urban landscapes are formulated based on quantitative and qualitative analysis, which are classified as the organic parks of North American ‘landscape urbanism’, the structural parks of German ‘landscape structuralism’ and the large parks of Chinese ‘urban inventory renewal’. By means of critical thinking in diverse cultural interpretations, the research aims to reveal remarkable similarities and differences between the cultures in the Western world according to their understanding of landscapes (coherent vs. creative), landscape and ecology (representation vs. metaphor), and landscape and life (diversity vs. unpredictability). Through theoretical analysis and case studies, it demonstrates that the international park paradigms characterised by complexity, diversity, sustainability, appropriation and identity can influence various socio-cultural, ecological, and aesthetic developments. Finally, the analytical results of the two park paradigms in Western countries are adopted in the examination of landscape architectural park models and urbanistic theoretical frameworks in China. This monograph is written primarily for scholars, professionals and students in the fields of landscape architecture, urban planning and architecture. The book, involving in-depth analysis about urban parks, green open spaces, green infrastructure and post-industrial landscapes, will have international appeal. It will appeal to readers at different levels. Above all, it may be of interest to professionals who are concerned with the topics urban parks and post-industrial landscapes, as well as Chinese scholars and experts, particularly those looking at China’s urban renewal and the ongoing transformation of post-industrial sites at different scales. This book will have strong implications for relevant urban landscape practices in China. Furthermore, it will be supported by the author’s colleagues from various countries such as

Germany, Italy, USA, Canada, Brazil and China. Moreover, students to whom the author teaches courses of Landscape Architecture History and Theory and Landscape Planning and Design at BUCEA, as well as the international students at Collaborative Classes organized by BUCEA, TUM, and POLIMI (Politecnico di Milano, Italy), are encouraged to read this book.

Urban Design Jon Lang, 2017-03-31 Urban Design: A Typology of Procedures and Products, 2nd Edition provides a comprehensive and accessible introduction to urban design, defining the field and addressing the controversies and goals of urban design. Including over 50 updated international case studies, this new edition presents a three-dimensional model with which to categorize the processes and products involved: product type, paradigm type, and procedural type. The case studies not only illuminate the typology but provide information that designers can use as precedents in their own work. Uniquely, these case study projects are framed by the design paradigm employed, categorized by procedural type instead of instrumental or land use function. The categories used here are Total Urban Design, All-of-a-piece Urban Design, Plug-in Urban Design, and Piece-by-piece Urban Design. Written for both professionals and those encountering urban design in their day-to-day life, Urban Design is an essential introduction to the field and practice, considering the future direction of the field and what can be learned from the past.

Architecture Competitions and the Production of Culture, Quality and Knowledge Jean-Pierre Chupin, Carmela Cucuzzella, Bechara Helal, 2015-01-26 [Winner of the 2016 Bronze medal in Architecture, Independent Publisher Book Awards] This book comprises a series of 22 case studies by renowned experts and new scholars in the field of architecture competition research. In 2015, it constitutes the most comprehensive survey of the dynamics behind the definition, organization, judging, archiving and publishing of architectural, landscape and urban design competitions in the world. These richly documented contributions revolve around a few questions that can be summarized in a two-fold critical interrogation: How can design competitions - these historical democratic devices, both praised and dreaded by designers - be considered laboratories for the production of environmental design quality, and, ultimately, for the renewing of culture and knowledge? Includes 340 illustrations, bibliographical references and index of over 200 cited competitions. Keywords: Architecture / International competitions / Architectural judgment / Design thinking / Digital archiving (databases) / Architectural publications / Architectural experimentation / Landscape architecture / Urban studies

The Routledge Handbook of Teaching Landscape Karsten Jørgensen, Nilgöl Karadeniz, Elke Mertens, Richard Stiles, 2019-03-04 Written in collaboration with the European Council of Landscape Architecture Schools (ECLAS) and LE: NOTRE, The Routledge Handbook of Teaching Landscape provides a wide-ranging overview of teaching landscape subjects, from geology to landscape design, reflecting different perspectives and practices at university-level landscape curricula. Focusing on the didactics of landscape education, this fully illustrated handbook presents and discusses pedagogy, teaching

traditions, experimental teaching methods and new teaching principles. The book is structured into three parts: reading the landscape, representing the landscape and transforming the landscape. Contributions from leading experts in the field, such as Simon Bell, Marc Treib, Jörg Reikittke and Susan Herrington, explore landscape analysis, history and theory, design visualisation, creativity and art, planning studio teaching, field trips and site engineering. Aimed at engaging academic researchers and instructors across disciplines such as landscape architecture, geography, ecology, planning and archaeology, this book is a must-have guide to landscape pedagogy as it stands today.

Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl Avery Library, 1993

Visioning Technologies Graham Cairns, 2016-12-08 Visioning Technologies brings together a collection of texts from leading theorists to examine how architecture has been, and is, reframed and restructured by the visual and theoretical frameworks introduced by different 'technologies of sight' – understood to include orthographic projection, perspective drawing, telescopic devices, photography, film and computer visualization, amongst others. Each chapter deals with its own area and historical period of expertise, organized sequentially to mark out and analyse the historical evolution of how architecture has been transformed by technologically induced shifts in human perception from the 15th century until today. This book underlines the way in which architectural forms and design processes have developed historically in conjunction with the systems of sight we manufacture technologically and suggests this continues today. Paradoxically, it is premised on the argument that these technological systems tend, in their initial formulations, to obtain ever greater realism in our visualizations of the physical world.

Projects Review , 1985

□□□□. □□□, **1983-1993** □□□□, 1994

La Villette, 1971-1995 Alain Orlandini, 2004 The derelict slaughterhouse of La Villette, located in the then notoriously rough northern Paris, became the unlikely focal point of every major architecture firm in the world when in 1971, the Paris city council decided to finance a major makeover. Recalling the genesis of one of the most ambitious architectural and social challenges in recent history, this book features exclusive interviews with the likes of Christian de Portzamparc and Rem Koolhaas, and offers numerous illustrations. It will please architecture lovers, but also appeal to socially-conscious readers interested in learning how a slum became a major cultural venue. A brilliant and unusual essay about architecture at its best, it is also a powerful political statement unafraid to tackle the burning issue of urban wastelands and how to give them a revitalized future.

The World of Architecture Francisco Asensio Cerver,2000 Translated from Spanish Cover title: The world of contemporary architecture.

Paris, Contemporary Architecture Andrea Gleininger, Gerhard Matzig, Sebastian Redecke, 1997 Paris - Contemporary Architecture focuses on buildings erected in the past ten years including projects which are still under construction. These are not just the internationally acclaimed architectural masterpieces such as Le Grand Louvre, the Parc de la Villette or the Bibliotheque Francois Mitterrand, but also major context-related planning schemes such as the Bercy or the Andre Citroen parks. Projects designed to meet the everyday requirements of city-dwellers, such as government housing schemes and community developments have also been selected for inclusion. Paris - Contemporary Architecture provides a critical analysis of both older and more recent developments in the Parisian cityscape in relation to their historical background, and reveals the impressive panorama of present-day, exemplary, architectural projects.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc.
