Mathematical Reasoning of Children and Adults Alina Galvão Spinillo,Síntia Labres Lautert,Rute Elizabete de Souza Rosa Borba,2021-05-24 This book adopts an interdisciplinary approach to investigate the development of mathematical reasoning in both children and adults and to show how understanding the learner's cognitive processes can help teachers develop better strategies to teach mathematics. This contributed volume departs from the interdisciplinary field of psychology of mathematics education and brings together contributions by researchers from different fields and disciplines, such as cognitive psychology, neuroscience and mathematics education. The chapters are presented in the light of the three instances that permeate the entire book: the learner, the teacher, and the teaching and learning process. Some of the chapters analyse the didactic challenges that teachers face in the classroom, such as how to interpret students' reasoning, the use of digital technologies, and their knowledge about mathematics. Other chapters examine students' opinions about mathematics, and others analyse the ways in which students solve situations that involve basic and complex mathematical concepts. The approaches adopted in the description and interpretation of the data obtained in the studies documented in this book point out the limits, the development, and the possibilities of students' thinking, and present didactic and cognitive perspectives to the learning scenarios in different school settings. *Mathematical Reasoning of Children and Adults: Teaching and Learning from an Interdisciplinary Perspective* will be a valuable resource for both mathematics teachers and researchers studying the development of mathematical reasoning in different fields, such as mathematics education, educational psychology, cognitive psychology, and developmental psychology.

The Theory of Mind Under Scrutiny Teresa Lopez-Soto, Alvaro Garcia-Lopez, Francisco J. Salguero-Lamillar, 2024-01-01 This book is a call to expand and diversify our approach to the study of the human mind in relation to the Theory of Mind. It proposes that it is necessary to combine cross-disciplinary methods to arrive at a more complete understanding of how our minds work. Seeking to expand the discussion surrounding the Theory of Mind beyond the field of psychology, and its focus on our capacity to ascribe mental states to other people, this volume collects evidence and research to point to a more holistic understanding of our own minds, the minds of others, behavior, language, and reasoning. This book therefore illuminates the conceptual intricacy underlying the Theory of Mind. It posits that a wide scope is necessary to make a breakthrough in scientific research towards a full understanding of the nature, function, and development of our capacity to converge on biological processes of the brain towards consciousness, emotion, awareness, and cognition. The volume presents methods, results, critiques, and models intended to provoke debates in various academic disciplines. It is of interest to scholars working in psychology, neuroscience, philosophy of mind, and artificial intelligence.

Investigaciones en neuropsicología y psicología educativa Ma. de la Cruz Bernarda Téllez Alanís, 2016-09-19 La psicología de la educación es una subdisciplina psicológica de gran tradición en la Facultad de Psicología de la UAEM y se han desarrollado investigaciones en dicha área desde 1980, que ha visto en últimos años un gran aumento en la producción científica y práctica, así como también en la diversificación de los temas estudiados. Por otro lado, la neuropsicología es un campo joven, sin embargo en la UAEM se adoptó y desarrolló con entusiasmo desde 1990 y se ha convertido en una de las subdisciplinas más fuertes y representativas. Este libro es evidencia de los avances que se han realizado en cada área, e involucra siempre a estudiantes y colaboradores de otras instituciones; su objetivo es mostrar la investigación básica, aplicada y monográfica que realiza el cuerpo académico Cognición y Afectos, cuyos integrantes, especialistas con experiencia en sus campos de acción, buscan además establecer el inicio de reflexiones y trabajos transdisciplinarios.
