America's Fight Over Water Kevin Wehr,2005-01-01 This book inquires into the relations between society and its natural environment by examining the historical discourse around several cases of state building in the American West: the construction of three high dams from 1928 to 1963.

Fraternity and Politics Fred E. Baumann,1998-10-30 Baumann examines the recurring efforts to establish fraternal relations in modern societies by political, and in particular, radical means. He proceeds by examining a series of related examples, beginning with a brief discussion of the metaphor for fraternity itself, and then he turns to a consideration of the historical development of the quest for fraternity. He first examines the quest for fraternity among the Students for a Democratic Society in the 1960s. Baumann then turns to the sans-culottes before and during the period of the French Revolution. The third analysis is philosophical, rather than historical, and treats Jean-Paul Sartre's attempt to understand radically and thus justify the relation of fraternity to terror. His conclusion sums up the argument about the necessary self-contradiction and failure of the pursuit of political fraternity and points to the long-discarded concept of aesthetic education developed as an alternative to the political pursuit of fraternity by the poet and philosopher Friedrich Schiller.

Historical Dictionary of the French Revolution Paul R. Hanson,2015-01-15 The French Revolution remains the most examined event, or period, in world history. It was, most historians would argue, the first “modern” revolution, an event so momentous that it changed the very meaning of the word revolution, from “restoration,” as in the Glorious Revolution of 1688 in England, to its modern sense of connoting a political and/or social upheaval that marks a decisive break with the past, one that moves a society in a forward, or progressive, direction. No revolution has occurred since 1789 without making reference to this first revolution, and most have been measured against it. One cannot utter the date 1789 without thinking of revolution, and so significant were the changes unleashed in that year that it has come to mark the dividing line between early modern and late modern European history. This second edition of *Historical Dictionary of the French Revolution* covers its history through a chronology, an introductory essay, and an extensive bibliography. The dictionary section has over 400 cross-referenced entries on the causes and origins; the roles of significant persons; crucial events and turning points;

important institutions and organizations; and the economic, social, and intellectual factors involved in the event that gave birth to the Declaration of the Rights of Man and Citizen. This book is an excellent access point for students, researchers, and anyone wanting to know more about this period.

Search for a Method Jean-Paul Sartre,1968-08-12 From one of the 20th century's most profound philosophers and writers, comes a thought provoking essay that seeks to reconcile Marxism with existentialism. Exploring the complicated relationship the two philosophical schools of thought have with one another, Sartre supposes that the two are in fact compatible and complimentary towards one another, with poignant analysis and reasoning. An important work of modern philosophy, Search for a Method has a major influence on the current perceptions of existentialism and Marxism. "This is the most important philosophical work by Sartre to be translated since Being and Nothingness."—James Collings, America

Dystopia Gregory Claeys,2016-11-17 Dystopia: A Natural History is the first monograph devoted to the concept of dystopia. Taking the term to encompass both a literary tradition of satirical works, mostly on totalitarianism, as well as real despotisms and societies in a state of disastrous collapse, this volume redefines the central concepts and the chronology of the genre and offers a paradigm-shifting understanding of the subject. Part One assesses the theory and prehistory of 'dystopia'. By contrast to utopia, conceived as promoting an ideal of friendship defined as 'enhanced sociability', dystopia is defined by estrangement, fear, and the proliferation of 'enemy' categories. A 'natural history' of dystopia thus concentrates upon the centrality of the passion or emotion of fear and hatred in modern despotisms. The work of Le Bon, Freud, and others is used to show how dystopian groups use such emotions. Utopia and dystopia are portrayed not as opposites, but as extremes on a spectrum of sociability, defined by a heightened form of group identity. The prehistory of the process whereby 'enemies' are demonised is explored from early conceptions of monstrosity through Christian conceptions of the devil and witchcraft, and the persecution of heresy. Part Two surveys the major dystopian moments in twentieth century despotisms, focussing in particular upon Nazi Germany, Stalinism, the Chinese Cultural Revolution, and Cambodia under Pol Pot. The concentration here is upon the political religion hypothesis as a key explanation for the chief excesses of communism in particular. Part Three examines literary dystopias. It commences well before the usual starting-point in the secondary literature, in anti-Jacobin writings of the 1790s. Two chapters address the main twentieth-century texts usually studied as representative of the genre, Aldous Huxley's Brave New World and George Orwell's Nineteen Eighty-Four. The remainder of the section examines the evolution of the genre in the second half of the twentieth century down to the present.
