Balanced Automation Systems for Future Manufacturing Networks Ángel Ortiz Bas, Rubén Dario Franco, Pedro Gomez Gasquet, 2010-06-29 Manufacturing and operations management paradigms are evolving toward more open and resilient spaces where innovation is driven not only by ever-changing customer needs but also by agile and fast-reacting networked structures. Flexibility, adaptability and responsiveness are properties that the next generation of systems must have in order to successfully support such new emerging trends. Customers are being attracted to be involved in Co-innovation Networks, as - proved responsiveness and agility is expected from industry ecosystems. Renewed production systems needs to be modeled, engineered and deployed in order to achieve cost-effective solutions. BASYS conferences have been developed and organized as a forum in which to share visions and research findings for innovative sustainable and knowledge-based products-services and manufacturing models. Thus, the focus of BASYS is to discuss how human actors, emergent technologies and even organizations are integrated in order to redefine the way in which the value creation process must be conceived and realized. BASYS 2010, which was held in Valencia, Spain, proposed new approaches in automation where synergies between people, systems and organizations need to be fully exploited in order to create high added-value products and services. This book contains the selection of the papers which were accepted for presentation at the BASYS 2010 conference, covering consolidated and emerging topics of the conference scope.

República Dominicana: Promover las exportaciones para mejorar la calidad de vida Juan Labraga, Elka Scheker, Pavel Isa Contreras, 2017-07-11 A lo largo de la última década y media, el desempeño exportador y la atracción de inversiones extranjeras en República Dominicana (RD) ha estado muy por debajo de su potencial, lo que ha generado un bajo aporte al crecimiento económico. Por tanto modernizar la actuación del ecosistema de promoción de las exportaciones y captación de inversiones se constituye en una medida necesaria e imprescindible para que una economía pequeña y abierta como RD pueda desarrollar medidas y programas tendientes a mejorar la calidad de vida de la población. En base a un diagnóstico riguroso, a las mejores prácticas internacionales y a las entrevistas con expertos, en este trabajo se propone el perfeccionamiento del marco normativo e institucional en materia de promoción de las exportaciones y de captación de inversiones. También se identifican y cuantifican los significativos impactos económicos en materia de comercio exterior, inversiones y empleo -directo e indirecto- de aplicar las recomendaciones de política que suponen una mejora sustantiva en el entramado institucional del comercio exterior y de la inversión. Posteriormente se plantean algunas propuestas y un plan de acción. El punto fundamental de este trabajo es la propuesta de modernización del CEI-RD, a fin de convertirla en una agencia de 4a generación, con vocación de servicio al sector privado, y con la agilidad, el conocimiento, el equipo y los instrumentos adecuados.
