Perfil del riesgo de residuos de plaguicidas Chaparro González, María Patricia, López Molinello, Alfredo, Otálvaro Álvarez, Ángela María, Prieto Contreras, Lena, Rey Rodríguez, Javier Francisco, 2018-05-23 La intoxicación por la presencia de residuos de plaguicidas en productos agrícolas ha sido reconocida como un problema de salud pública en el mundo. Estos residuos pueden encontrarse en los alimentos que se consumen, el agua que se bebe y el aire que se respira. En el caso particular de los alimentos contaminados con residuos de plaguicidas organofosforados, su procesamiento no garantiza la eliminación completa de estos, lo que expone a los consumidores al desarrollo de enfermedades crónicas por su acumulación y por la biomagnificación de algunas de estas moléculas a lo largo de la vida. Todas las especies de crucíferas son afectadas por problemas fitosanitarios que derivan en el uso intensivo de plaguicidas como medida de manejo.

Problemas de examen de Química General. Cómo resolverlos Concepción Parejo Prados, Julio Álvarez Santos, Sara Álvarez Parejo, 2023 El presente libro, recoge los problemas incluidos en los exámenes de la asignatura de Química General del primer curso de los Grados en Ingeniería Electrónica y Automática Industrial e Ingeniería Eléctrica, de la Universidad Miguel Hernández de Elche (UMH, desde el curso 2010-2011 hasta el curso 2019-2020. Cada uno de los diez capítulos que lo forman está dedicado a un curso académico y contiene los problemas de los exámenes correspondientes a las tres convocatorias (diciembre, febrero y septiembre) de ese curso y los problemas de los de los exámenes parciales, si es que se realizaron, de ahí que no todos los capítulos tengan el mismo número de problemas. Todos los problemas que aparecen en este libro contienen preguntas y apartados relacionados con varios temas de los incluidos en el temario de la asignatura. Esto, puede implicar una mayor dificultad a la hora de resolverlos, por lo que cada problema se inicia indicando los temas a los que hace referencia para facilitar su comprensión y posterior resolución. A continuación, se expone un planteamiento en el que se recogen las ideas básicas y la metodología llevada a cabo para resolver el problema. Después, se desarrolla la resolución propiamente dicha, explicando cada paso e indicando las ecuaciones utilizadas para llegar al resultado final. Es de esperar que este libro, en el que se recoge el trabajo de muchos años, cumpla con el objetivo para el que fue concebido y que no es otro que ayudar al estudiantado contribuyendo a su formación en química y/o en cualquier otra disciplina científica.

Pobreza y distribución del ingreso en México Julio Boltvinik, Enrique Hernández Laos, 1999 En el marco de la evolución de largo plazo de la distribución de la pobreza y la distribución del ingreso en México, se analizan los condicionantes macroeconómicos, la magnitud y las características de tales fenómenos en los años ochenta. Usando material empírico, los autores concluyen, entre otras cosas, que a partir de 1982 aumentan la pobreza y la desigualdad como consecuencia de la puesta en vigor del modelo neoliberal; que los grupos de pobres diversos evidencian lo inadecuado de una política única de lucha contra la pobreza, y que las diferencias de ingresos per cápita entre hogares pobres y no pobres se explican fundamentalmente por la inserción ocupacional de sus miembros, mientras los factores demográficos explican sólo una pequeña porción de tal diferencia.

Química: teoría y problemas José María Teijón, José Antonio García Pérez, 1996 Explica cada uno de los conceptos de la Química General y los aplica en más de 500 problemas resueltos. Incluye prácticas de laboratorio y tests de autoevaluación. También adecuado para COU-LOGSE.
