Nomenclatura y formulación de compuestos inorgánicos María Isabel López Solera,Elena Villaseñor Camacho,Antonio Fermín Antiñolo García, Este libro recoge un resumen de las actualizaciones de la IUPAC de 2005 para la nomenclatura de sustancias inorgánicas, con el objetivo de simplificar el número de nombres aceptables para cada sustancia y heterogeneizar la enseñanza de dicha nomenclatura en los centros de enseñanza.

Cálculo matricial de estructuras Federico París Carballo,José Cañas Delgado,Alfonso Fernández Canteli,2006 Aunque se siga considerando oportuno comprender y aplicar puntualmente los métodos del cálculo estructural clásico, por su interés pedagógico y conceptual, la necesidad de un ventajoso tratamiento generalizado de información mediante computador, típica del cálculo numérico, hace del cálculo matricial de estructuras una etapa de aprendizaje, natural y obligada, para comprender y manejar los métodos numéricos actuales de cálculo estructural, en particular el método de los elementos finitos. Este texto se entiende como material de apoyo y ayuda didáctica de clase para los alumnos y, por tanto, está limitado a los aspectos fundamentales del cálculo matricial. En él se pretende conseguir una comprensión sólida de los conocimientos a través de una presentación elemental de los conceptos teóricos y la incorporación de ejercicios ilustrativos, basados en una estructura simple, que permite centrar la atención en el problema concreto a resolver.

El Libro español ,1981

Por la senda de la nueva contabilidad José María Gay, 2008-11-25 Por la senda de la nueva contabilidad ... Analizando e interpretando el NPGC, marca un hito en la literatura contable española, un antes y un después. Sus autores, los profesores Oriol Amat y José Ma Gay, imprimen a esta obra lo mejor de sus respectivos estilos. Rigor académico, ortodoxia contable, pronunciamientos profesionales se combinan con la aplicación eminentemente práctica, con una narración directa y personal de situaciones económicas y financieras, que van desmenuzando punto por punto no solo las entrañas del Nuevo Plan General de Contabilidad sino profundizando en el ideario y en los postulados de lo que se da en llamar la Nueva Contabilidad, tomando como referencia constante la fuente en la que bebe la reforma española: las Normas Internacionales de Contabilidad/Normas Internacionales de Información Financiera (NIC/NIIF). Los postulados teóricos se ejemplarizan en todo momento con la vista puesta en compañías y entidades de gran notoriedad. Desde las grandes constructoras hasta los más ilustres clubes de fútbol, pasando por inmobiliarias y empresas de servicios. Los ejemplos y supuestos contables de corte clásico, los de toda la vida, se adaptan a las nuevas medidas contables. De súbito, irrumpe en la exposición un informe de

auditoría o el estudio de una parte concreta de las cuentas anuales de determinada compañía para interpretar adecuadamente los conceptos que se presentan y desarrollan. En fin, Por la senda de la nueva contabilidad ... Analizando e interpretando el NPGC constituye una interesante contribución a la reformada contabilidad española, a través de un enfoque distinto, animado, vivaz, coloquial, irónico en ocasiones, a fondo, pero siempre ajustado a los rigores universitarios y empresariales.
