**General Chemistry: The Essential Concepts** Raymond Chang, Dr.,Kenneth Goldsby, Professor,2013-01-07 The seventh edition of General Chemistry continues the tradition of presenting only the material that is essential for a one-year general chemistry course. It strikes a balance between theory and application by incorporating real-world examples; helping students visualize the three-dimensional atomic and molecular structures that are the basis of chemical activity; and developing problem-solving and critical thinking skills. Although the seventh edition incorporates many impressive features, such as conceptual idea review, animations correlated to the text, and hand-sketched worked examples, General Chemistry is still 200 to 300 pages shorter and much less expensive than other two-semester textbooks. Dr. Chang and Dr. Goldsby' concise-but-thorough approach will appeal to efficiency-minded instructors and value-conscious students.

**General Chemistry** Raymond Chang, 2004-04 The third edition of General Chemistry: The Essential Concepts continues the tradition of presenting only the material that is essential for a one-year general chemistry course. As before, the text includes all the core topics that are necessary for a solid foundation in general chemistry without sacrificing depth, clarity, or rigor. The third edition features new Spartan molecular models, animations correlated to the text, the addition of molecular orbital theory and more. General Chemistry: The Essential Concepts is 200 to 300 pages shorter than traditional two-semester textbooks and is much less expensive. Dr. Chang's concise-but-thorough approach will appeal to efficiency-minded instructors and will please value-conscious students.

Essential Concepts of Chemistry Alan Sherman, 1999-01-01

**Essentials of General Chemistry** Darrell Ebbing, Steven D. Gammon, Ronald O. Ragsdale, 2005-02-01

Essentials of General Chemistry is the ideal choice for instructors who want a shorter, less expensive core text that still supports a typical one- or two-semester general chemistry course. The text covers the same topical scope as Ebbing/Gammon, General Chemistry, and retains all of its hallmark qualities, including its focus on quantitative problem solving, conceptual understanding, and visualization skills. The new technology program reinforces the approach of the text and provides a complete solution for teaching and learning. The Second Edition retains the hallmark pedagogical features of the text and builds upon its conceptual focus. In addition, figures and interactive animations in the updated art program help students connect molecular-level activity to macro-scale phenomena. The new technology program offers access to tutoring, assessment, and presentation tools through the comprehensive Eduspace Course Management tool?instructors can also choose selected resources for use separately via CD or the Web. Conceptual understanding is further emphasized throughout the Second Edition and its technology program with a separate section of new Conceptual Problems appearing in the printed and computerized Test Bank. Answer Checks follow selected Examples throughout the chapters in the text. They appear after the Solution and are designed to help students evaluate their answer to ensure that it is reasonable. Figures, drawings, and photos in the art program help students connect molecular-level activity to macro-scale phenomena. Animations in the student and instructor technology supplements also enhance students' ability to visualize molecular behavior. Based on instructor feedback, 60?70 percent of the material from Chapter 13, Materials of Technology and from Chapter 23, The Transition Elements and Coordination Compounds has been divided into two new chapters: Chapter 21, Chemistry of the Metals and Chapter 22, Chemistry of the Nonmetals. A suite of integrated technology tools for students and instructors includes materials (except restricted testing items) that are web accessible, with passwords included in the media guides. In addition, to meet instructor needs, the Media Integration Guide for Instructors includes CDs containing all teaching resources. To ensure that students devote more time to their study of chemistry, key elements of the technology are assignable. In the classroom, instructors can gauge student progress through a Classroom Response System. Online homework within Eduspace?using either end-of-chapter questions or practice exercises based on in-text examples?can be tracked and graded. Even new animations?now with skill-building exercises?can be assigned. To support you and your students as you use our technology, we offer implementation services from our TeamUP support staff, as well as media integration guides for both students and instructors, along with textbook web sites. Eduspace (powered by Blackboard) includes problems that cover all key concepts in the text. Through the Eduspace program, instructors can create their own

assignments and post them for students to complete at a designated time. The problems in Eduspace include algorithmic end-of-chapter questions, exercises based on the in-text examples, and Test Bank questions to ensure consistency of level and coverage. Questions can be graded and entered into the online gradebook automatically. Eduspace also includes additional course management and interactive communication tools. WebCT and Blackboard course cartridges include all the material on both the student and instructor web sites, as well as the HM Testing Test Bank.

General Chemistry S. Ekambaram, 2012 General Chemistry presents the fundamental concepts of general chemistry in a precise and comprehensive manner for undergraduate students of chemistry and life science at all Indian universities. Adhering strictly to the UGC curriculum, the contents are written in a simple and lucid language enriched with a large number of examples and illustrations.

*Basic Concepts of Chemistry 7th Edition with Math Survival Guide and Student Survey Set* Leo J. Malone, 2006-10 In photochemical reactions, such as photosynthesis, light energy initiates a chemical reaction. In the jellyfish we have just the opposite situation. That is, light energy is produced by a chemical reaction. The production of light energy by a chemical reaction is known as chemiluminescence. If it is produced by living organisms, such as the jellyfish, it is known as bioluminescence. This text emphasizes the relevance of chemistry to the world around us. Both within the text and in the essays entitled Making It Real you will find discussions of how the abstract subject of chemistry relates to the reality of our everyday lives. The Making It Real essay in Chapter 13 discusses bioluminescence that was first noticed in fireflies. Discover a fascinating, living science From the mysteries of dark matter to the power of lightning, few subjects are more fascinating and relate more directly to everyday life than chemistry. Now redesigned and revised to promote visualization and enhance understanding, the new Seventh Edition of Leo Malone's Basic Concepts of Chemistry captures the excitement of this dynamic field, and presents it in a way that is easy to learn. Covering all the essential topics in a student-friendly style, this best-selling preparatory chemistry text provides students with all the help they need to master basic concepts, overcome common math difficulties, and develop strong problem-solving skills. Highlights of the Seventh Edition \* NEW Making It Real sections relate the subject at hand to high-interest topics that demonstrate applications and motivate learning. \* NEW Redesigned artwork enhances visualization of key topics and illustrates the molecular nature of chemistry. \* NEW The book's

Web site includes a new bonus chapter on Biochemistry as well as the chapter on Organic Chemistry. \* NEW eGrade, Wiley's online quizzing and homework management program, allows students to do practice tests and email assignments directly to the instructor. \* The author's student-friendly writing style is enhanced with easy-to-understand analogies and examples of current topics of interest. \* Frequent testing through in-chapter Checking It Out sections, end-of-chapter problems (100 new to this edition ), and cumulative tests reinforces concepts and study skills on an ongoing basis. \* Interactive Learning problems on the Web show how to set up and solve problems, and provide immediate feedback. \* Extensive appendices help ease math anxieties and provide a quick and effective review of the mathematical concepts used in introductory chemistry.
