Models of Social Intervention and Constructionism Laura Karina Castro Saucedo, Fernando Bruno, César Arnulfo De León Alvarado, 2023-08-25 This book takes a new, critical, and multidisciplinary look at experiences and meanings of social intervention in different social contexts, taking the approaches of social constructionism as a theoretical approach. The volume collects the results of theoretical-practical experiences that social science professionals with critical and

constructionist visions linked to social work intervention have carried out in different spaces. It considers the way social work intervention models are built, their foundation, and their application. It provides the findings on tested intervention models built according to the basis of social constructionism in specific social scenarios, providing interesting findings that show intervention alternatives beyond traditional approaches. The social intervention strategies discussed take place in diverse situations, including health recovery and reconstruction in breast cancer, family abandonment issues of institutionalized adolescents, institutional care of refugee families, women caregivers of children with disabilities, men who exercise violence, and more.

Human Dignity Edward Sieh, Judy McGregor, 2017-05-02 This book examines the concept of dignity from a variety of global perspectives. It scrutinizes how dignity informs policy and practice, and is influenced by international and domestic law, human rights values, and domestic politics. An exciting collection of essays, this edited volume provides an analysis of human rights as they are experienced by real people who have in many cases been forced to take action to further their own interests. Readers will discover an extensive range of issues discussed, from the internet, climate change and disabilities, to globalization, old-age, and migrants' rights. The last section deals with the impact of various issues on indigenous and migrant populations, specifically violence in Columbia, border issues in Tijuana, women's and children's rights violations, and the complex problems experienced by refugees, particularly in regards to citizenship. The interdisciplinary nature of this work makes it an invaluable read for scholars of Health Studies, Law, Human Rights, Sociology and Politics.

In Pursuit of World-Class Universities Marcelo Rabossi, K.M. Joshi, Saeed Paivandi, 2018-03-10 The pursuit to construct “world-class” universities is an ongoing global obsession across the world, which lays emphasis on the development of competitive higher education and research systems as core national economic approach. The portrayal “world-class” is more contextual rather than absolute, the expression “world-class university” has an irrefutable cachet. There is no solo, clear-cut definition of what organises a world-class university (WCU), but there are few common attributes that majority of the experts point towards. The three attributes stated by Philip Altbach and Jamil Salmi that focus on a high concentration of talent, abundant resources and favourable governance have been widely discussed in writings and practice. Both in developing and developed countries, policymakers and higher education leaders are attempting to identify and outline their desires and plans aimed at achieving global ranking for their university/universities. Despite condemnation of the methodology, the choice of indicators and weightings, and the reliability and quality of data used for comparing performance, the obsession for constructing world-class universities has increased over the period of time. But how much do we really discern or comprehend regarding the ranking systems? What do the rankings really measure? Do rankings measure the quality and help in attaining the broad assignment of higher education? Does the competition as outcome of ranking raise standards? Is the ranking system an apposite instrument to frame higher education policies? This edited volume tries to look at the concept of

world-class universities in milieu of different countries of the world and explore their experiences either in existing WCUs or constructing WCU or attempting to create WCU. The country-based chapters show differentiated paths of achievements and their approach towards the concept of WCU.

Migration, Gender and Social Justice Thanh-Dam Truong, Des Gasper, Jeff Handmaker, Sylvia I. Bergh, 2013-09-06 This book is the product of a collaborative effort involving partners from Africa, Asia, Europe and Latin America who were funded by the International Development Research Centre Programme on Women and Migration (2006-2011). The International Institute of Social Studies at Erasmus University Rotterdam spearheaded a project intended to distill and refine the research findings, connecting them to broader literatures and interdisciplinary themes. The book examines commonalities and differences in the operation of various structures of power (gender, class, race/ethnicity, generation) and their interactions within the institutional domains of intra-national and especially inter-national migration that produce context-specific forms of social injustice. Additional contributions have been included so as to cover issues of legal liminality and how the social construction of not only femininity but also masculinity affects all migrants and all women. The resulting set of 19 detailed, interconnected case studies makes a valuable contribution to reorienting our perceptions and values in the discussions and decision-making concerning migration, and to raising awareness of key issues in migrants' rights. All chapters were anonymously peer-reviewed. This book resulted from a series of projects funded by the International Development Research Centre (IDRC), Canada.

Saltar el torniquete Marisol Alé Tapia, Claudio Duarte, Daniel Miranda, 2021-01-13 A partir del viernes 18 de octubre, la juventud estudiantil que había estado una semana saltando los torniquetes del Metro en protesta por el alza del pasaje, abrió las compuertas de lo que sería una de las mayores movilizaciones populares de la historia de Chile. Ese fin de semana y en los meses que vinieron, personas de diversas edades, sectores sociales y organizaciones civiles salieron a las calles para expresar su cansancio y reclamar dignidad, agradeciendo a las y los jóvenes por “ayudarlos a despertar”. En paralelo, el desconcierto y vacío interpretativo del mundo político e intelectual, y de los medios de comunicación, era evidente. Con el ánimo de profundizar y enriquecer el debate, y sobre todo de abordar una realidad compleja desde diferentes disciplinas y enfoques, este libro permite visibilizar a las y los protagonistas de la movilización, conocer sus anhelos y frustraciones, sus ideas y espacios de acción política, y la manera en que aspiran a vivir en comunidad. Saltar el torniquete. Reflexiones desde las juventudes de octubre se nutre tanto de testimonios como de investigaciones académicas, de tal modo que en sus páginas se genera un riquísimo y original cruce de miradas y experiencias sobre un hito que cambió —y está cambiando— el rumbo de Chile.

Power, Politics, and People Charles Wright Mills, 1963 Collects the major writings of the distinguished sociologist concerned with the relation of power to responsibility in the twentieth century.

The Sociological Imagination C. Wright Mills, 2000-04-13 C. Wright Mills is best remembered for his highly acclaimed work *The Sociological Imagination*, in which he set forth his views on how social science should be pursued. Leading sociologist Todd Gitlin brings this fortieth anniversary edition up to date with a lucid introduction in which he considers the ways social analysis has progressed since Mills first published his study in 1959. A classic in the field, this book still provides rich food for our imagination.
