Unlocked John Scalzi,2018-07-24 Discover the history of Haden's Syndrome, the virus that created the world of John Scalzi's inventive near-future thrillers Lock In and Head On, in the prequel novella Unlocked. Not long from now, a virus will sweep the globe. Most will suffer no worse than flu-like symptoms, but an unlucky one percent will be changed forever. Hundreds of millions become locked in, awake, aware, but completely unable to control their bodies. This is the story of the doctors, scientists, engineers, politicians, and heroes who remade the world. It is the story of the chaotic outbreak, the fight for a cure, the changes that followed. It is an oral history, straight from the mouths of those who survived the most dynamic period in human history.

Consciousness and Science Fiction Damien Broderick, 2018-11-30 Science fiction explores the wonderful, baffling and wildly entertaining aspects of a universe unimaginably old and vast, and with a future even more immense. It reaches into that endless cosmos with the tools of rational investigation and storytelling. At the core of both science and science fiction is the engaged human mind--a consciousness that sees and feels and thinks and loves. But what is this mind, this aware and self-aware consciousness that seems unlike anything else we experience? What makes consciousness the Hard Problem of philosophy, still unsolved after millennia of probing? This book looks into the heart of this mystery - at the science and philosophy of consciousness and at many inspiring fictional examples - and finds strange, challenging answers. The book's content and entertaining style will appeal equally to science fiction enthusiasts and scholars, including cognitive and neuroscientists, as well as philosophers of mind. It is a refreshing romp through the science and science fiction of consciousness.

Horror Culture in the New Millennium Daniel W. Powell, 2018-11-23 *Horror Culture in the New Millennium: Digital Dissonance and Technohorror* explores the myriad ways in which technology is altering the human experience as articulated in horrific storytelling. The text surveys a variety of emerging trends and story forms in the field, through both a series of critical essays and personal interviews with scholars, editors, authors, and artists now creating and refining horror stories in the new millennium. The project posits a rationale for the presence of technohorror as a defining concern in contemporary horror literature, marking a departure from the monstrous and spectral traditions of the twentieth century in its depictions of frightful narratives marked by the qualities of plausibility, mundanity, and surprise as we tell stories about what it means to be human. As our culture explores the dichotomies of the born/made, natural/artificial, and human/computer—all while subsumed within a paradigm shift predicated on the transition from the traditions of print to emerging digital communications practices—these changes form the basis for horrific speculations in our texts and technologies. Ultimately, *Digital Dissonance: Horror Culture in the New Millennium* explores that paradoxical human attraction for peering into the darkness as translated through our lived experiences in an era of rapidly evolving technologies.
