**Chess Improvement** Peter Wells, Barry Hymer, 2020-10-16 Written by Barry Hymer and Peter Wells, Chess Improvement: It's all in the mindset is an engaging and instructive guide that sets out how the application of growth mindset principles can accelerate chess improvement. With Tim Kett and insights from Michael Adams, David Howell, Harriet Hunt, Gawain Jones, Luke McShane, Matthew Sadler and Nigel Short. Foreword by Henrik Carlsen, father of world champion Magnus Carlsen. Twenty-first-century knowledge about skills development and expertise requires us to keep such mystical notions as fixed 'talent' in perspective, and to emphasise instead the dynamic and malleable nature of these concepts. Nowhere is this more apparent than in chess, where many gifted players fall prey to plausible but self-defeating beliefs and practices - and thereby fail to achieve the levels their 'natural' abilities predicted. Happily, however, the reverse can be true too; through learned dispositions such as grit, risk-taking, strategic thinking and a capacity for sheer hard work, players of apparently modest abilities can achieve impressive results. Blending theory, practice and the distinct but complementary skills of two authors - one an academic (and amateur chess player) and the other a highly regarded England Chess Olympiad coach (and grandmaster) - Chess Improvement is an invaluable resource for any aspirational chess player or coach/parent of a chess player. Barry and Peter draw on interviews conducted with members of England's medal-winning elite squad of players and provide a template for chess improvement rooted in the practical wisdom of experienced chess players and coaches. They also include practical illustrative descriptions from the games and chess careers of both developing and leading players, and pull together themes and suggestions in a way which encourages readers to create their own trajectories for chess improvement.

**The ASTD E-learning Handbook** Allison Rossett,2002 The entire training industry is undergoing dramatic change, as training is moved out of traditional classrooms and onto the Web. Training publications and conferences are now dominated by speakers, writers, and vendors talking about e-Learning. The e-Learning revolution is forcing companies to spend millions on new technology and new web-based courseware, threatening the role of traditional classroom trainers, and saving companies millions of dollars in housing and travel costs because trainees no longer need a plane ticket and 3 nights' accommodation to attend a corporate training program - the training can be delivered to each learner's desktop over the Web. But because e-Learning is still in the revolution stage, there are no clear standards and models for how to create and deliver e-Learning successfully. Everyone is asking the same questions: how does web-based training fit in with traditional classroom based training? What are the standards for designing high-quality e-Learning? How much interaction with an instructor do e-Learning participants need? What is the role of the instructional designer in online learning? The ASTD e-Learning Yearbook will be the first annual refe
