Orthopaedic Trauma in the Austere Environment Juan de Dios Robinson,2016-05-19 Orthopaedic trauma represents 75% of the casualties in a disaster. Many of these patients will be cared for by international volunteers, but good intentions are not always matched by good preparation. This book explains how best to prepare for missions, how to deal with injuries in austere conditions, how to ensure a positive legacy, and the need for cultural, political, and legal awareness. All of the

most common orthopaedic presentations encountered in the austere environment are covered. In addition to evidence-based research, cases and actual experiences from the authors' missions are included to illustrate and bring to life key points. This book, written by a team of international experts with extensive experience of challenging field missions, will be an ideal practical guide for volunteers and health care workers, helping them to deal with confusing, chaotic, and distressing situations with greater confidence and efficacy.

Dynamic Industrial Policy in Africa United Nations. Economic Commission for Africa,2014 For millions of Africans, growth is yet to translate into jobs and better living conditions. Africa's largely commodity- driven growth has not been matched by the much needed structural change that can lead to economic transformation, employment, and reduced poverty. Market failures necessitate industrial policy interventions. Yet, in the absence of the right processes and institutions, good industrial policies will fail. Indeed, weak institutions and poor policy design have hindered industrial policy. This report gives a framework for getting the policy process right to foster industrialization. It uses 11 country case studies to assess the critical ingredients for spurring industrialization - innovative institutions, effective processes and flexible mechanisms - and structural transformation.
