**Our Earth Matters** Bharat H. Desai, 2021-06-15 On 21 May 2019, it was officially recognized that we are now living in the Anthropocene, our earth's latest geological epoch, named for the 'unmistakable imprint of human activities'. This announcement came almost 60 years after the publication of Rachel Carson's landmark work of environmental writing, *Silent Spring*, and next year (2022) it will be 50 years since the first UN Conference on the Human Environment, held in Stockholm in June 1972. This book, *Our Earth Matters: Pathways to a Better Common Environmental Future*, is a special issue of the journal *Environmental Policy and Law*, which was first published in 1975. It presents 21 invited contributions by outstanding scholars from around the world, which examine existing global regulatory approaches, processes, instruments and institutions for the protection of the global environment. The articles are grouped under four headings: Prognoses, Processes, Problematique and Prospects, and in them the authors have sought to explore answers to the existential environmental crisis. They urge us to ponder our reckless destruction of natural spaces, endangering of plant and animal species, poisoning of the environment, and general disturbance of our essential ecological processes. The primary objective of the book is to raise the awareness of the global audience by inspiring scholars and decision-makers to re-examine current global approaches to environmental issues and explore the future trajectory with new ideas and frameworks for international environmental governance in the 21st century and beyond. The book will be of interest to all those working to secure the sustainable future of the human race on our only abode, planet Earth. Bharat H. Desai is Professor of International Law and Jawaharlal Nehru Chair in International Environmental Law, Centre for International Legal Studies, School of International Studies, Jawaharlal Nehru University, New Delhi; Editor-in-Chief of the journal *Environmental Policy & Law* (Amsterdam: IOS Press) and of the *Yearbook of International Environmental Law* (Oxford: OUP).

**Coming Home to Earth** Mark S. Bocker, 2016-09-13 As a young Norwegian Lutheran teenager in rural Wisconsin, Bocker lay awake one night worrying whether he believed in Jesus enough to get to heaven. This getting-to-heaven anxiety reflected an excessive focus on individual salvation and a loss of concern for the well-being of the Earth community. A faith journey that leaves Earth behind is misguided. Ever since those early teen years Bocker has been on a journey to come home to Earth. *Coming Home to Earth* makes the case that there is no salvation apart from Earth and that Earth care is at the core of our identity and mission as followers of Jesus. The ecological consequences of a loss of concern for the well-being of Earth have been devastating. Bocker is especially concerned to determine what will motivate followers of Jesus to make radical changes in our way of life so that we can participate in the healing of wounded Earth and all of its inhabitants, both human and nonhuman. We are far more likely to make needed sacrifices for our fellow creatures if we share God's delight in

and affection for them, and cherish Earth as our home.

*Operation Just Cause* Thomas Donnelly, Margaret C. Roth, Caleb Baker, 1991 The authors visited each major battle site to write this authoritative and vivid account of Operation Just Cause--and offer a firsthand account of the planning, execution, and aftermath of the U.S. invasion of Panama, and the fall of General Noriega, in December, 1989.
