Learner Choice, Learner Voice Ryan L Schaaf,Becky Zayas,Ian Jukes,2022-06-15 *Learner Choice, Learner Voice* offers fresh, forward-thinking supports for teachers creating an empowered, student-centered classroom. Learner agency is a major topic in today's schools, but what does it mean in practice, and how do these practices give students skills and opportunities they will need to thrive as citizens, parents, and workers in our ever-shifting climate? Showcasing authentic activities and classrooms, this book is full of diverse instructional experiences that will motivate your students to take an agile, adaptable role in their own learning. This wealth of pedagogical ideas - from specific to open-ended, low-tech to digital, self-expressive to collaborative, creative to critical - will help you discover the transformative effects of providing students with ownership, agency, and choice in their learning journeys.

Scaffolding the Language of Power Kathryn Strom,2024-12-30 *Scaffolding the Language of Power: An Apprenticeship in Doctoral Level Writing* offers an accessible, practical, hands-on guide to developing the skills needed to successfully write a doctoral dissertation or thesis. This textbook-workbook hybrid can be used both as a program/course text and as a supplement for individual doctoral students in education and related social science and humanities fields. The book is built on three main ideas. First, writing is fundamentally connected to issues of social justice. Doctoral-level writing is part of the "language of power" in academia, which builds on the linguistic patterns of the dominant culture and serves as a gatekeeping mechanism. Second, writing is genre-based. This means that doctoral level writing is a particular way of using language, or a specific genre, with distinct rules and structures that can be taught. And third, writing can be scaffolded. Approaching writing as a pedagogical act that supports readers' understanding through purposeful scaffolding is not just a way to successfully complete a doctoral dissertation—it is a way to make academic writing more accessible in general. In its first chapter, *Scaffolding the Language of Power* provides a general framework for the rules of the doctoral "language of power." Chapter two offers an in-depth look at organization and scaffolding as key features of academic writing at the doctoral level, with discussions and activities to practice drafting supportive headings, chunking text, creating road maps and topic sentences, and strategically linking sections, paragraphs, and sentences through transitions and connector phrases. Chapter

three provides lessons and exercises to develop argumentation, evidence use, synthesis skills, and academic voice. The remaining six chapters address each major task of the dissertation, including the problem statement, literature review, theoretical framework, methodology, findings, and discussion. Each of these chapters explicitly teaches the purposes and elements of its specific dissertation task, guiding students through warm-ups, annotated examples with elaborated explanations of writing moves, and carefully sequenced activities. Ultimately, these pedagogical features support students to build out the pieces of their doctoral dissertations or theses, chapter by chapter. This book is appropriate for any course on academic writing in EdD or PhD programs. It is also useful for courses that teach how to write a problem statement, literature review, and/or theoretical framework. Additional courses include: Qualitative Research; Qualitative Practicum/pilot study courses; and Dissertation seminar and support courses.

Powerful Teacher Learning David Allen, 2013-07-29 This book offers an innovative approach to understanding and supporting teacher inquiry groups, Critical Friends Groups, "PLCs," and other vehicles for the school-wide professional learning community. It takes the reader outside traditional sites of professional development for teachers and into the black box theatres and rehearsal studios of contemporary theatre companies. It investigates the methods and specific tools these theatre artists use to collectively create new works for performance. Drawing on these methods and tools, it provides a model for understanding and improving the practices of teacher learning groups, one that highlights the means, materials, and modes of engagement of a group's activity. Applying the model to elementary and high school teacher learning groups, it demonstrates how teachers, coaches, and administrators can use it to foster meaningful professional learning and instructional improvement. The book provides not only new ways of thinking about teacher learning in schools, but also frameworks and specific tools to bring teacher learning as collective creation to life.
