Summary of Ugly Love Alexander Cooper,2022-12-18 Ugly Love - A Comprehensive Summary When they first meet, Tate Collins is uninterested in Miles Archer, a pilot for an airline. She doesn't have time for him because he's haughty and conceited. They reach a compromise because they are unable to resist their attraction to one another. He doesn't want love, and she doesn't have time for love, so they are only interested in having sex. If Tate complies with the two instructions Miles has offered her, their setup might be fairly simple. They both understand, though, that this arrangement might not be as wonderful as they had thought as feelings start to surface. Tate Collins has just moved in with her pilot brother when she receives an unexpected visitor: a drunken man who is passed out next to the door. She makes an attempt to get around him but is unable, so she phones her brother Corbin, who asks his friend Miles for help. Miles turns out to be the inebriated man; she drags him inside and places him on the couch where he begins to cry over Rachel. She isn't a morning person, so Tate locks the door in his face as he and Miles Corbin remove all of her possessions from her car. Then, Miles and Tate make another introduction. To be continued... Data Analytics for Discourse Analysis with Python Dennis Tay,2024-04-19 This concise volume, using examples of psychotherapy talk, showcases the potential applications of data analytics for advancing discourse research and other related disciplines. The book provides a brief primer on data analytics, defined as the science of analyzing raw data to reveal new insights and support decision making. Currently underutilized in discourse research, Tay draws on the case of psychotherapy talk, in which clients' concerns are worked through via verbal interaction with therapists, to demonstrate how data analytics can address both practical and theoretical concerns. Each chapter follows a consistent structure, offering a streamlined walkthrough of a key technique, an example case study, and annotated Python code. The volume shows how techniques such as simulations, classification, clustering, and time series analysis can address such issues as incomplete data transcripts, therapist-client (a)synchrony, and client prognosis, offering inspiration for research, training, and practitioner self-reflection in psychotherapy and other discourse contexts. This volume is a valuable resource for discourse and linguistics researchers, particularly for those interested in complementary approaches to qualitative methods, as well as active practitioners.
