Rebuilding Urban Places After Disaster Eugenie L. Birch, Susan M. Wachter, 2013-01-09 Disasters—natural ones, such as hurricanes, floods, or earthquakes, and unnatural ones such as terrorist attacks—are part of the American experience in the twenty-first century. The challenges of preparing for these events, withstanding their impact, and rebuilding communities afterward require strategic responses from different levels of government in partnership with the private sector and in accordance with the public will. Disasters have a disproportionate effect on urban places. Dense by definition, cities and their environs suffer great damage to their complex, interdependent social, environmental, and economic systems. Social and medical services collapse. Long-standing problems in educational access and quality become especially acute. Local economies cease to function. Cultural resources disappear. The plight of New Orleans and several smaller Gulf Coast cities exemplifies this phenomenon. This volume examines the rebuilding of cities and their environs after a disaster and focuses on four major issues: making cities less vulnerable to disaster, reestablishing economic viability, responding to the permanent needs of the displaced, and recreating a sense of place. Success in these areas requires that priorities be set cooperatively, and this goal poses significant challenges for rebuilding efforts in a democratic, market-based society. Who sets priorities and how? Can participatory decision-making be organized under conditions requiring focused, strategic choices? How do issues of race and class intersect with these priorities? Should the purpose of rebuilding be restoration or reformation? Contributors address these and other questions related to environmental conditions, economic imperatives, social welfare concerns, and issues of planning and design in light of the lessons to be drawn from Hurricane Katrina.

Laughing Your Way Through Alzheimers Savanna Jones,2017-11-10 When my mother was first diagnosed with Alzheimer's, everything seemed to be fine. Other than forgetting a few things here and there, her behavior appeared normal. But then I received a call from my sister telling me that when she got home, Mom had disappeared. She called the police and discovered that she had decided to take a late-night walk and was found three miles away from the house. It was then that we discovered she could no longer be left alone. Once people knew about my mother's condition, they suggested different movies for me to watch. After seeing these movies, had I been a candidate for suicide, I would have jumped right off the cliff. Watching my mom go from a thriving adult to a helpless child was heartbreaking enough. After spending months crying about my mom's condition, I had an epiphany. I could continue grieving over her, or I could look at the things that made me laugh about her instead of the things that made me cry. Looking at her disease from this perspective changed everything. Taking care of her was no longer a burden, but a joy. It was also a way for me to give back to someone who had spent their lifetime giving to me. This book is dedicated to caregivers everywhere. I hope it will inspire, encourage, and strengthen you as you take care of your loved ones. No matter what the disease, I hope your perspective will be to focus on the things that make you laugh instead of cry.
