Instead, it's all about How To: How to download and install EaseUS Todo How to create an image backup How to create an emergency disk How to restore an image backup How to schedule backups How to keep from running out of space How to test your backups and more. Everything you need to protect your computer and your data. Safety Starts with a Backup and that's the first thing we'll do - take a backup of your machine right now so that you know, no matter what, you can recover to the state your machine is in today. Then we'll make that backup happen automatically without your needing to do a thing. We'll cover exactly how you'll use your backup - from recovering a single file or two, to restoring your entire machine to a backup image - you'll be prepared. Malware Recovery the Easy Way Backups are great for more than just hardware problems. Why spend hours scouring the internet for instructions on how to remove that virus that somehow made it past your anti-malware tools? And then, hoping that: the instructions work the process doesn't do even more damage the results don't leave your machine just as infected as before You'll remove malware the easy way instead: restore your machine to the state it was in before it was infected and you're done! The malware is gone. Backing Up - The Closest Thing to a Silver Bullet Having a proper and recent backup can save you from just about anything. In fact, there's very little that a good backup can't rescue you from. Malware infection? Restore from a backup and it's gone. Bad software update? Restore from a backup and it's removed. Need that file you deleted last week? Restore it from a backup. I could go on singing the praises of backups ... but hopefully by now you get the idea. You should backup. So why aren't you? Think about your data. Think about your most important data. Now, imagine that data gone - *poof* - in the blink of an eye due to a hard disk crash or other

catastrophic failure. Is that simply an inconvenience, or does it send chills down your spine? If the later, then you know you should be backing up. If you're not sure, then you probably should be backing up. And Saved! Backing Up With EaseUS Todo will help you get started.
