Blast, Corrupt, Dismantle, Erase Brett Josef Grubisic, Gisèle M. Baxter, Tara Lee, 2014-06-16 What do literary dystopias reflect about the times? In *Blast, Corrupt, Dismantle, Erase*, contributors address this amorphous but pervasive genre, using diverse critical methodologies to examine how North America is conveyed or portrayed in a perceived age of crisis, accelerated uncertainty, and political volatility. Drawing from contemporary novels such as Cormac McCarthy's *The Road*, Neil Gaiman's *American Gods*, and the work of Margaret Atwood and William Gibson (to name a few), this book examines dystopian literature produced by North American authors between the signing of NAFTA (1994) and the tenth anniversary of 9/11 (2011). As the texts illustrate, awareness of and deep concern about perceived vulnerabilities—ends of water, oil, food, capitalism, empires, stable climates, ways of life, non-human species, and entire human civilizations—have become central to public discourse over the same period. By asking questions such as “What are the distinctive qualities of post-NAFTA North American dystopian literature?” and “What does this literature reflect about the tensions and contradictions of the inchoate continental community of North America?” *Blast, Corrupt, Dismantle, Erase* serves to resituate dystopian writing within a particular geo-social setting and introduce a productive means to understand both North American dystopian writing and its relevant engagements with a restricted, mapped reality.

Absent Rebels: Criticism and Network Power in 21st Century Dystopian Fiction Annika Gonnermann,2021-04-19

Absent Rebels: Criticism and Network Power in 21st Century Dystopian Fiction focuses on the relationship between literary dystopia, network power and neoliberalism, explaining why rebellion against a dystopian system is absent in so many contemporary dystopian novels. Also, this book helps readers understand modern power mechanisms and shows ways how to overcome them in our own daily lives.

Collision of Realities Lars Schmeink,Astrid Böger,2012-05-29 Even though the fantastic (in its most inclusive definition) has been a part of our culture for as long as it exists, it has not been a prominent feature of European academic interest. With its inherent transgressive moment the fantastic allows for an ideal space of the cultural negotiation of political, social and physical boundaries, which should place it at the center of popular cultural research, not as is the case, at its periphery. But the commencing boom of fantastic themes in contemporary media production has facilitated a paradigmatic change in research, prompting a wide interest in the fantastic in all its forms, from fantasy to horror, from fairy tale to science fiction. This volume addresses this growing interest by reviewing the status of research on the fantastic in Europe so far and by providing a necessary outlook for the future. In the essays current trends, such as the liminality debate, as well as established discourses, as for example on genre theory, are brought together to show interested researchers a network of interdisciplinary (from literary, media and social studies) approaches towards the fantastic.

Reimagining Science Fiction Gary Westfahl,2025-10-31 In the first decades of the twenty-first century, science fiction literature has been transformed in many ways, as the genre has reacted to the dominating influence of films, television, and video games, the growing popularity of fantasy, the rise of young adult science fiction and graphic novels, the impact of the internet and social media, and the increasing diversity of the authors, characters, and often non-Western settings. The essays making up this volume address these and other changes in two ways. Some consider new critical approaches to science fiction in response to changing circumstances, including analyses of how evolutionary psychology explains today's science fiction, the emerging subgenre of cli-fi exploring the effects of climate change, the use of science fiction in different areas of the college curriculum, and a statistical method for identifying works of science fiction. Others examine significant new authors such as Nalo Hopkinson, Charles Stross, Paolo Bacigalupi, Suzanne Collins, Mira Grant, John Sandford, and David Mura. Contributors include science fiction author Howard V. Hendrix and experts in the fields of Chinese studies, gender studies, literature, philosophy, and religion.

M.T. Anderson: Exclusive Candlewick Press Sampler M.T. Anderson,2015-11-05 The sampler includes chapters from three of M. T. Anderson's satirical novels: Feed, Thirsty, and Burger Wuss. Feed M. T. Anderson's not-so-brave new world is a smart, savage satire that has captivated readers with its view of an imagined future that veers unnervingly close to the here

and now. Thirsty A savagely funny tale of terror, teen angst, suspense, and satire Burger Wuss M. T. Anderson cooks up a story of love and betrayal, with a side order of revenge—and serves it all with comedic relish.
