No More Heart Disease Louis J. Ignarro, 2025-10-16 Dr. Louis Ignarro discovered the atom of cardiovascular health--a tiny molecule called Nitric Oxide. NO, as it is known by chemists, is a signaling molecule produced by the body, and is a vasodilator that helps control blood flow to every part of the body. Dr. Ignarro's findings led to the development of Viagra. Nitric Oxide has a beneficial effect on the cardiovascular system as well. NO relaxes and enlarges the blood vessels, prevents blood clots that trigger strokes and heart attacks, and regulates blood pressure and the accumulation of plaque in the blood vessels. Dr. Ignarro's current research indicates that Nitric Oxide may help lower cholesterol by facilitating the actions of statin drugs like Lipitor. The goal of the regimen presented in NO More Heart Disease is to age proof the cardiovascular system, keeping the vascular network clean and elastic through enhanced NO productivity. The plan is easy-to-follow without extreme lifestyle adjustments, involving taking supplements to stimulate Nitric Oxide production, incorporating NO friendly food into the diet, and a moderate exercise program.

Dr. NO Louis Ignarro, 2022-02 In 1998, Dr. Louis J. Ignarro was awarded a rare and coveted Nobel Prize for his groundbreaking discovery of nitric oxide (NO) and its many critically important biological actions. But his work goes far beyond the development of Viagra. It has never been more urgently relevant to the world than it is today, as clinical trials are underway that involve using inhaled NO to treat patients suffering from COVID-19. Most Nobel laureate books have focused on the science. But in this fascinating and timely memoir, Dr. Ignarro opens up and shares intimate details about himself and his journey, his amazing accomplishments and heartbreaking setbacks, both in science and in life. This isn't just a scientist's story, it's a quintessentially American story. Only in America could the child of uneducated Italian immigrants start out a struggling student barely able to speak English, and go on to win the Nobel Prize.

Medicine After the Holocaust Sheldon Rubenfeld,Holocaust Museum Houston,2010-02-12 In an effort to create the Master Race, Nazi physicians and bioscientists, using American legislative models, money, and moral support, sterilized 400,000 and euthanized 200,000 German citizens while developing the gas chambers and crematoria used to murder 6,000,000 Jews. Rubenfeld and the contributors to this collection posit that German physicians betrayed the Hippocratic Oath when they chose knowledge over wisdom, the state over the individual, a führer over God, and personal gain over professional ethics. This groundbreaking work questions whether, since the best physicians of the early twentieth century

could abandon their patients, the best physicians of the twenty-first century can be certain that they will not do the same.
