Adolescent Relapse Prevention Workbook Terence T. Gorski, 1996 Chemically dependent adolescents have a tendency to relapse because of problems they experience at home, school, and with their friends. These problems activate urges and cravings to use alcohol and drugs. The 'Adolescent Relapse Prevention Workbook' first reviews a list of common adolescent Relapse Warning Signs. The adolescent then selects and personalizes a warning sign that is likely to increase the risk of relapse and describes specific situations in which this warning sign might occur. The adolescent learns to identify the irrational thoughts, unmanageable feelings, self-destructive urges, and self-defeating behavior that leads to alcohol and drug use. New ways of thinking, feeling, managing urges, and behaving are learned that promote recovery and prevent relapse.-- Publisher description.
