Our Dogs, Ourselves Alexandra Horowitz, 2019-09-03 From the #1 New York Times bestselling author of *Inside of a Dog* and *The Year of the Puppy*, an eye-opening, informative, “entertaining, and enlightening” (BookPage) celebration of the human-canine relationship for the curious dog owner and science-lover alike. We keep dogs and are kept by them. We love dogs and (we assume) we are loved by them. We buy them sweaters, toys, shoes; we are concerned with their social lives, their food, and their health. The story of humans and dogs is thousands of years old but is far from understood. In *Our Dogs, Ourselves*, Alexandra Horowitz explores all aspects of this unique and complex relationship that “dog lovers will savor and absorb” (Shelf Awareness). As Horowitz considers the current culture of dogdom, she reveals the odd, surprising, and contradictory ways we live with dogs. We celebrate their individuality but breed them for sameness. Despite our deep emotional relationships with dogs, legally they are property to be bought, sold, abandoned, or euthanized as we wish. Even the way we speak to our dogs is at once perplexing and delightful. In thirteen thoughtful and charming chapters, *Our Dogs, Ourselves* affirms our profound affection for this most charismatic of animals—and makes us “see canine companions in new ways” (Science News).

On Looking Alexandra Horowitz, 2013 *On Looking* begins with inattention. It is about attending to the joys of the unattended, the perceived 'ordinary.' Horowitz encourages us to rediscover the extraordinary things that we are missing in our ordinary activities. Even when engaged in the simplest of activities like taking a walk around the block, we pay so little attention to most of what is right before us that we are sleepwalkers in our own lives.

The Year of the Puppy Alexandra Horowitz, 2022-09-20 “What Mr. Rogers was to children, Alexandra Horowitz is to dogs: a wise and patient observer who seeks to intimately know a creature... Her chapters, packed with close observations about canine cognition and behavior, are mini-mood lifters. —NPR, Maureen Corrigan on *Fresh Air* What is it like to be a puppy? Author of the classic *Inside of a Dog*, Alexandra Horowitz tries to find out, spending a year scrutinizing her puppy’s daily existence and poring over the science of early dog development Few of us meet our dogs at Day One. The dog who will, eventually, become an integral part of our family, our constant companion and best friend, is born without us into a family of her own. A puppy's critical early development into the dog we come to know is usually missed entirely. Dog researcher Alexandra Horowitz aimed to change that with her family's new pup, Quiddity (Quid). In this scientific memoir, she charts

Quid's growth from wee grub to boisterous sprite, from her birth to her first birthday. Horowitz follows Quid's first weeks with her mother and ten roly-poly littermates, and then each week after the puppy joins her household of three humans, two large dogs, and a wary cat. She documents the social and cognitive milestones that so many of us miss in our puppies' lives, when caught up in the housetraining and behavioral training that easily overwhelms the first months of a dog's life with a new family. In focusing on training a dog to behave, we mostly miss the radical development of a puppy into themselves—through the equivalent of infancy, childhood, young adolescence, and teenager-hood. By slowing down to observe Quid from week to week, *The Year of the Puppy* makes new sense of a dog's behavior in a way that is missed when the focus is only on training. Horowitz keeps a lens on the puppy's point of view—how they (begin to) see and smell the world, make meaning of it, and become an individual personality. She's there when the puppies first open their eyes, first start to recognize one another and learn about cats, sheep, and people; she sees them from their first play bows to puberty. Horowitz also draws from the ample research in the fields of dog and human development to draw analogies between a dog's first year and the growing child—and to note where they diverge. *The Year of the Puppy* is indispensable for anyone navigating their way through the frustrating, amusing, and ultimately delightful first year of a puppy's life.

Our Dogs, Ourselves -- Young Readers Edition Alexandra Horowitz, 2020-08-04 This middle grade adaptation of *Our Dogs, Ourselves* is an eye-opening, entertaining, and beautifully illustrated look about humans' complicated and sometimes contradictory relationship with man's best friend by New York Times bestselling author of *Inside of a Dog—Young Readers Edition*. We keep dogs and are kept by them. We love dogs and (we assume) we are loved by them. Even while we see ourselves in dogs, we also treat them in surprising ways. On the one hand, we let them into our beds, we give them meaningful names, make them members of our family, and buy them the best food, toys, accessories, clothes, and more. But we also shape our dogs into something they aren't meant to be. Purebreeding dogs has led to many unhealthy pups. Many dogs have no homes, or live out their life in shelters. How is it possible we can treat the same species in these two totally different ways? In *Our Dogs, Ourselves Young Readers Edition*, bestselling author of *Inside of a Dog*, Alexandra Horowitz reveals the odd, surprising, and contradictory ways we live with dogs.

On Looking Alexandra Horowitz, 2014-01-01 You are missing at least eighty percent of what is happening around you right now. You are missing what is happening in your body, in the distance, and right in front of you. In marshalling your attention to these words, you are ignoring an unthinkably large amount of information that continues to bombard all of your

senses. This ignorance is useful: indeed, we compliment it and call it concentration. It enables us to not just notice the shapes on the page, but to absorb them as intelligible words, phrases, ideas. Alas, we tend to bring this focus to every activity we do. In so doing, it is inevitable that we also bring along attention's companion: inattention to everything else. This book begins with that inattention. It is not a book about how to bring more focus to your reading of Tolstoy; it is not about how to multitask, attending to two or three or four tasks at once. It is not about how to avoid falling asleep at a public lecture, or at your grandfather's tales of boyhood misadventures. It is about attending to the joys of the unattended, the perceived 'ordinary'. Even when engaged in the simplest of activities - taking a walk around the block - we pay so little attention to most of what is right before us that we are sleepwalkers in our own lives. This book is about that walk around the block, and how to rediscover the extraordinary things that we are missing in our ordinary activities.

The Year of the Puppy Alexandra Horowitz, 2024-04-16 What is it like to be a puppy? What's going on in their minds? In this adaptation for young readers, Alexandra Horowitz answers those questions all kids have--and more! Few people get to meet their dogs on the dog's actual first birthday. Most of us missed the day our puppy opened her eyes, the first sweet sounds she made, or watching her learn to walk, bark, and play with her siblings. But the dog scientist Alexandra Horowitz got to. She met a litter of newborn pups, and traces their journey through their first year of life. In this adaptation for young readers, follow along as one of the litter, Quiddity, grows from a sweet potato-sized puppy who can't lift her head to a member of Horowitz's family. Equal parts scientific and adventurous, Alexandra Horowitz's delightful study of her own puppy's developing personality is an enticing read that will answer every question a reader could have during a puppy's first year.

The 7 Transdisciplinary Cognitive Skills for Creative Education Danah Henriksen, 2017-07-22 This book focuses on rethinking creativity for 21st century education. The specific emphasis examines the way that creativity spans disciplines, through a set of common thinking skills that the most accomplished thinkers in any field use. These seven transdisciplinary thinking skills are rooted in historical exemplars of creativity across disciplines. We examine these skills in more detail, chapter by chapter, to offer examples of what each skill looks like in disciplines ranging from art to science, or music to math, and beyond. This set of thinking skills reflects the way that creativity may look different across fields, yet there are common paths of creative thinking that cut across disciplinary boundaries. Beyond this each chapter also considers applications for such skills in 21st century educational contexts, with an eye toward creative teaching and technology. In all of this, the book weaves together broad cultural examples of creativity and the seven transdisciplinary skills, alongside

specific application-based examples from technology and teacher education.

The Purest Bond Jen Golbeck, Stacey Colino, 2023-11-14 This feel-good, comprehensive exploration of the profound bond between humans and dogs from Jen Golbeck, the “internet’s dog mom” behind the massive social media platform The Golden Ratio, and award-winning science writer Stacey Colino “will bring something magical and meaningful into your life” (Daniel J. Siegel, MD, New York Times bestselling author). Dogs have been considered people’s best friend for thousands of years, but never has the relationship between humans and their canine companions been as vitally important as it is today. With all of the seismic shifts in today’s world, rates of anxiety and depression have been skyrocketing, and people have been turning to their dogs for solace and stability. Amidst these dire realities, something wonderful has taken shape. In the United States alone, dog adoptions doubled during the COVID-19 pandemic. As people have brought furry friends into their lives for the first time or seized this opportunity to deepen the connections they already have, they are looking to understand how owning a dog can change their lives. Weaving together groundbreaking research and touching real-life stories, *The Purest Bond* is an “informative and fun” (Publishers Weekly) exploration of not just the social benefits of owning a dog but the science of how dogs improve our emotional and physical health, mental acuity, and our ability to focus and absorb information. Most importantly, they remind us of what’s right in the world—love, trust, affection, playtime, fresh air, and sunshine—even when so much feels wrong.

Dog politics Mariam Motamedi Fraser, 2024-01-30 Do dogs belong with humans? Scientific accounts of dogs' 'species story,' in which contemporary dog-human relations are naturalised with reference to dogs' evolutionary becoming, suggest that they do. *Dog politics* dissects this story. This book offers a rich empirical analysis and critique of the development and consolidation of dogs' species story in science, asking what evidence exists to support it, and what practical consequences, for dogs, follow from it. It explores how this story is woven into broader scientific shifts in understandings of species, animals, and animal behaviours, and how such shifts were informed by and informed transformative political events, including slavery and colonialism, the Second World War and its aftermath, and the emergence of anti-racist movements in the twentieth and twenty-first centuries. The book pays particular attention to how species-thinking bears on 'race,' racism,

and individuals. An electronic edition of this book is freely available under a Creative Commons (CC BY-NC-ND) licence.

Critical Terms for Animal Studies Lori Gruen, 2018-10-23 Alexandra Horowitz, Peter Singer, Barbara King, Christine Korsgaard, and others explore the core concepts of this interdisciplinary field: "Recommended." —Choice Animal Studies is a rapidly growing interdisciplinary field devoted to examining, understanding, and critically evaluating the complex relationships between humans and other animals. Scholarship in Animal Studies draws on a variety of methodologies to explore these multi-faceted relationships in order to help us understand the ways in which other animals figure in our lives and we in theirs. Bringing together the work of a group of internationally distinguished scholars, *Critical Terms for Animal Studies* offers distinct voices and diverse perspectives, exploring significant concepts and asking important questions. What do we mean by anthropocentrism, captivity, empathy, sanctuary, and vulnerability, and what work do these and other critical terms do in Animal Studies? How do we take non-human animals seriously, not simply as metaphors for human endeavors, but as subjects themselves? Sure to become an indispensable reference for the field, *Critical Terms for Animal Studies* not only provides a framework for thinking about animals as subjects of their own experiences, but also serves as a touchstone to help us think differently about our conceptions of what it means to be human, and the impact human activities have on the more than human world. "The subject of animal studies is at a crucial stage, still being mapped out and defining itself, and this volume is very useful, given its conciseness, its all-star cast of contributors, and its breadth in providing a guide to some of the key ideas." —Colin Jerolmack, New York University

Adventures in Statistics Robert T. Stewart, 2024-07-08 This book is about how statistics play a role in life, whether in business, psychology, biology, economics, or just about anything short of basket weaving. You cannot make a trip to the doctor, watch a football game, or even go to the grocery store without some statistic staring you down. Your age, weight, and cholesterol make you a high risk for diabetes ... the chance that your team will win the game is 12.5 percent ... 4 out of 5 dentists like this toothpaste. What does it all mean? *Adventures in Statistics: How We Live in a World of Numbers* tells you what all those numbers mean. But the book does not spit out a bunch of mathematical formulas; the book tells stories. Stories that explain statistics through popular culture, sports, and history. You're confused about that false positive warning in that drug commercial, the 2007 comedy *Juno* explains how medical tests – including pregnancy tests – fail and why. Not clear about what your coworkers are talking about when they say, 'black swans.' the 1997 blockbuster *Titanic* makes sense of the concept. *Adventures in Statistics: How We Live in a World of Numbers* shows how professionals in medicine, business, politics, sports, and many other fields use numbers. So, just about everyone would gain from reading this book, perhaps even basket weavers.
