The Dragon Takes Flight Derek A. Levine,2015-06-24 *The Dragon Takes Flight: China's Aviation Policy, Achievements, and International Implications* analyzes China's journey toward the development of its C-919 large passenger aircraft. Through the use of primary sources in English and Chinese, including interviews with important players in China's aviation industry, Levine builds on Michael Porter's Diamond Model to explore the underlying question of whether or not China will successfully develop a competitive large passenger aircraft. The model serves as a blueprint for determining what China is doing right and what areas need to improve. This study also looks at the potential implications the success of the C-919 may have on Boeing and Airbus and the ways in which both companies might prepare to meet the challenges they face.

The Resolution of Inter-State Disputes in Civil Aviation Luping Zhang,2022 This book explores the International Civil Aviation Organization Council, created through the Convention on International Civil Aviation laying the foundations for dispute resolution in international civil aviation. Due to technological advancements, the book considers if resolution mechanisms should be modernised and what changes might be needed.

International Organizations Kelly-Kate S. Pease,Dani Belo,2025-07-21 Drawing on mainstream and critical theoretical approaches, *International Organizations* offers a comprehensive examination of the role of international organizations in world politics. This text details the types and activities of international organizations and provides students with the conceptual tools needed to evaluate their effectiveness. Surveying key issue areas including security, trade, development, the environment and human rights, *International Organizations* looks at global governance from a broad range of perspectives. New to the Seventh Edition Inclusion of "narratives" to complement theoretical approaches to show how facts are used to frame reality and interpret world events. Narratives are used to advocate and build support for particular policies and strategies. Expanded analysis of International Security. New chapter on Global Public Health with systematic treatment of the COVID-19 pandemic and the role of international organizations in identifying and managing the pandemic. New sections on global finance and international humanitarian law. Updated case studies on Iran and Ukraine. Discussion questions to help students reflect on each chapter's content.

Financial Accounting Jamie Pratt,Michael F. Peters,2020-12-15 *Financial Accounting*, 11th Edition, provides students

with a clear understanding of financial accounting by framing accounting processes in the context of real-world business practices. Concepts are presented in an engaging story-telling approach and help answer key questions such as why, what, and how financial accounting connects to business success. By building a solid foundation in the mechanics of preparing and analyzing financial statements, performance measurement (Return on Equity), and decision-making with the help of data analytics, Financial Accounting, 11th Edition helps students better prepare to be effective and successful business professionals.

Empirical Studies of Strategic Trade Policy Paul Krugman, Alasdair Smith, 2007-12-01 Since the 1980s, economists have used the concept of strategic trade policy, which takes account of imperfect competition and increasing returns in the international marketplace, to criticize conventional views about free trade. According to the new view, a government can take strategic steps to raise its income at another country's expense—by subsidizing exports or erecting trade barriers, protecting certain firms from foreign competition, or promoting the development of new industries. This volume looks at the experience of specific industries in order to determine the effectiveness of strategic trade policy in promoting economic growth. The nine papers cover the U.S. and European auto industries, the U.S. steel industry, the commercial aircraft industry, airline deregulation in Scandinavia, and labor and industrial policy in Korea and Taiwan. The authors refine the basic techniques for measuring policy effectiveness, extend them to encompass industry dynamics, and test the implications of new trade models. International economists and trade experts in government and business will find important new insights into the role of strategic trade policy in international competitiveness.

EBOOK: Principles of Economics Moore McDowell, Rodney Thom, Ivan Pastine, Robert Frank, Ben Bernanke, 2012-01-16 With an accessible approach, the third European edition of Principles of Economics provides students with the tools to analyze current economic issues. The book is underpinned by a focus on seven Core Principles, which help students to make the link between economic theory and practice. The 'economic naturalist' approach, supported by exercises, problems and examples, encourages students to employ economics principles to understand and explain the world around them. Developed from the well-regarded US textbook by Frank and Bernanke, it presents an intuitive approach to economics and is suitable for all students taking a Principles of Economics course.

Global Business Daniel Johannes Venter, Johan Hough, Ernst Neuland, Ronel Erwee, Riaan De Lange, 2007 This book aims to increase the understanding of global business issues and helps to develop a global business mindset for managers of small, medium and large companies.

Crisis and Renewal John Van Oudenaren, 2021-09-22 This clear and comprehensive introduction to the European Union considers its development through the theme of crisis and renewal. John Van Oudenaren describes EU institutions and policies, both historically and as they relate to current events. He traces the renewal of the EU that was underway at the end

of the 2010s following the euro, migration, and Brexit crises and the health, economic, and political crisis that subsequently hit the Union with unexpected force in the coronavirus pandemic of 2020–2021. Exploring how institutions and policies are adapting to unprecedented political, economic, and geopolitical challenges, the author focuses on two key EU priorities—digitization and the transition to a carbon neutral future. These, he argues, are both intrinsic policy goals and the means by which the Union hopes to ensure its revitalization and its emergence as a “sovereign” power, taking its place alongside the United States and China as one of the big three players in global politics. Explaining the different theoretical perspectives used to understand the EU, the book gives students the tools they need to assess whether the Union is on a path to recovery and renewal.
