Infrastructure Finance in Europe Youssef Cassis, Giuseppe De Luca, Massimo Florio, 2016 The social returns of investment in water, roads, and railways are apparent in the long run, but this distant horizon poses problems to governments and investors. This volume explores the different historical paths to solving the problem of infrastructure finance in Europe, from the fall of the Roman Empire to the end of the 20th century.

Revolutionary Spring Christopher Clark, 2024-06-11 New York Times Book Review Editors' Choice • From the bestselling author of *The Sleepwalkers* comes an epic history of the 1848 revolutions that swept Europe, and the charismatic figures who propelled them forward "Refreshingly original . . . Familiar characters are given vibrancy and previously unknown players emerge from the shadows."—The Times (UK) A BEST BOOK OF THE YEAR: New Yorker, The Economist, Financial Times As history, the uprisings of 1848 have long been overshadowed by the French Revolution of 1789 and the Russian revolutions of the early twentieth century. And yet in 1848 nearly all of Europe was aflame with conflict. Parallel political tumults spread like brush fire across the entire continent, leading to significant changes that continue to shape our world today. These battles for the future were fought with one eye kept squarely on the past: The men and women of 1848 saw the urgent challenges of their world as shaped profoundly by the past, and saw themselves as inheritors of a revolutionary tradition. Celebrated Cambridge historian Christopher Clark describes 1848 as "the particle collision chamber at the center of the European nineteenth century," a moment when political movements and ideas—from socialism and democratic radicalism to liberalism, nationalism, corporatism, and conservatism—were tested and transformed. The insurgents asked questions that sound modern to our ears: What happens when demands for political or economic liberty conflict with demands for social rights? How do we reconcile representative and direct forms of democracy? How is capitalism connected to social inequality? The revolutions of 1848 were short-lived, but their impact on public life and political thought throughout Europe and beyond has been profound. Meticulously researched, elegantly written, and filled with a cast of charismatic figures, including the social theorist Alexis de Tocqueville, the writer George Sand, and the troubled priest Félicité de Lamennais, who struggled to reconcile his faith with politics, *Revolutionary Spring* offers a new understanding of 1848 that suggests chilling parallels to our present moment. "Looking back at the revolutions from the end of the first quarter of the twenty-first century, it is impossible not to be struck by the resonances," Clark writes. "If a revolution is coming for us, it may look something like

1848.”

La regeneración técnica Francisco Villacorta Baños, 2012 Salir del ensimismamiento, experimentar las potencialidades de la formación y la cultura, abrir caminos por el mundo, tales podrían ser los enunciados de una de las más fructíferas líneas del movimiento regenerador surgido de la gran crisis española de final del siglo XIX. Algunos de sus resultados son ya bien conocidos, entre los cuales destaca con luz propia el de las pensiones en el extranjero, muy en particular de las gestionadas por la JAE desde 1907. El presente libro aborda esa misma temática en el campo de la formación y el desarrollo de la ciencia aplicada. Desde esa misma fecha, en efecto, iniciativas semejantes cristalizaron en pensiones de ampliación de estudios para ingenieros y de formación en nuevas técnicas y procedimientos empíricos para obreros manuales procedentes de fábricas, talleres y granjas nacionales. Su organización fue confiada poco después a un organismo estatal autónomo, la Junta de Patronato de Pensiones de Ingenieros y Obreros en el Extranjero (JPIOE), que desarrollará su obra ininterrumpidamente, bajo diferentes nombres, hasta más acá de la guerra civil. Pero sobre este esqueleto básico, el trabajo se adentra además en un amplio espectro de cuestiones que le son inseparables. Como telón de fondo está todo el desarrollo de la enseñanza profesional, la eclosión de las políticas sociales desarrolladas desde 1920 por el nuevo Ministerio de Trabajo, la aparición de un nuevo tipo de reflexiones sobre la gestión del Estado y sobre la manera de abordar los problemas de la productividad del trabajo y su organización ante las nuevas exigencias de competitividad de la segunda revolución industrial, las vicisitudes de la innovación técnica y de su transferencia y adaptación a nuevos contextos y, en fin, los interrogantes más generales acerca de las relaciones entre educación y desarrollo económico.

Historia mínima de la expansión ferroviaria en América Latina Sandra Kuntz Ficker, 2015 Este volumen estudia, desde la perspectiva de la historia económica, el proceso de expansión del transporte ferroviario que tuvo lugar en América Latina y el Caribe entre 1870 y 1930. La obra se concentra en el estudio de la era dorada del ferrocarril, en la cual la vida económica de estos países se vio súbitamente transformada por un medio de transporte que superaba las barreras del tiempo y la distancia, ofreciendo un traslado seguro, rápido y barato a lugares lejanos del propio terruño.
