

How To Make Kozyrev Mirror

RM Cervero

Apocalypse 2012 Lawrence E. Joseph, 2007 In this provocative work, Joseph reveals the curious fact that 2012 has been pinpointed as a pivotal, perhaps cataclysmic, year in human history by ancient sources and contemporary science alike.

Tales of the Turing Church: Hacking religion, enlightening science, awakening technology Giulio Prisco, 2020-02-07 This book explores intersections of science and religion, spirituality and technology, engineering and science fiction, mind and matter, and outlines a new cosmic, transhumanist religion. Hacking religion, enlightening science, awakening technology.

Travel and Identity: Studies in Literature, Culture and Language Jakub Lipski, 2018-02-19 This book presents a selection of research papers dealing with the notions of travel and identity in Anglophone literature and culture. Collectively, the chapters ponder such notions as self and other, race, centre and periphery, thus shedding new light on a number of issues that are highly relevant in the context of the ongoing migration crisis. The contributors employ a diverse range of theoretical standpoints – from close reading to deconstruction, from historically informed approaches to linguistic analysis – and thus offer a nuanced panorama of these issues, especially from the nineteenth century onwards.

Demonic origins Adam Joseph Hanrahan, 2025-11-28 *Demonic Origins: Understanding the Ancient Roots and Modern Reality of Spiritual Warfare* What if the battles you're fighting in your mind, your relationships, and your daily life aren't just "in your head" — but echoes of an ancient war that started long before human history? In *Demonic Origins*, Adam Joseph Hanrahan tears back the veil on spiritual warfare, tracing today's oppression, confusion, and mental torment back to their cosmic source. Drawing on Scripture, ancient texts, and lived experience, this book maps out the hidden conflict that runs through heavenly realms, human culture, and the intimate battleground of the human mind and heart. Inside, you'll explore: The ancient roots of demonic activity: Watchers, Nephilim, fallen angels, and the unseen hierarchy behind today's oppression How the unseen realm intersects with our reality — and why your mind is often the front line of attack The three-fold battleground: cosmic, cultural, and personal arenas where darkness strategizes against human flourishing The "open doors" that give spiritual oppression a foothold: trauma, generational patterns, mental strongholds, and moments of extreme vulnerability The tactics of darkness — deception, accusation, fear, and subtle influence — and how to recognize them before they take root A raw, honest personal testimony of descent into oppression and the long climb back into freedom Practical strategies for victory, discernment, and walking in spiritual authority without slipping into paranoia or sensationalism This is

not a book of horror stories or superstition. It is a sober, compassionate field guide for anyone who has ever wondered: “Am I going crazy?” “Why does this darkness keep circling my life?” “Is there a spiritual side to what I’m going through — and if so, what can I actually do about it?” Whether you are a believer, a seeker, a survivor of deep trauma, or someone who has simply sensed “something is wrong beneath the surface of this world,” *Demonic Origins* offers language, framework, and hope. Come face to face with the reality of spiritual warfare—not to fear the dark, but to finally understand it, confront it, and walk in the light.

On The Way To Understanding The Time Phenomenon: The Constructions Of Time In Natural Science, Part 2

A P Levich,1996-05-15 Time is considered as an independent entity which cannot be reduced to the concept of matter, space or field. The point of discussion is the “time flow” conception of N A Kozyrev (1908-1983), an outstanding Russian astronomer and natural scientist. In addition to a review of the experimental studies of “the active properties of time”, by both Kozyrev and modern scientists, the reader will find different interpretations of Kozyrev's views and some developments of his ideas in the fields of geophysics, astrophysics, general relativity and theoretical mechanics.
