Aprendizaje de habilidades matemáticas fundamentales en estudiantes de grado tercero de Colombia mediante aplicativos en Excel MARCO TULIO MORALES, GUSTAVO DELGADO, ERIKA ANAY RODRÍGUEZ, 2024-07-31 La presente obra es de una investigación doctoral donde se analizó si el uso de aplicativos diseñados en la hoja de cálculo Excel ayuda al aprendizaje de habilidades matemáticas fundamentales, en una muestra de 60 estudiantes de grado tercero de la Institución Educativa Barrio Olaya Herrera, distribuidos en 30 estudiantes del grupo experimental y otros 30 estudiantes del grupo de control, en la cual se plantea un proceso de investigación desde un enfoque cuantitativo, con diseño cuasiexperimental, estudio transversal y alcance correlacional. Para ello, se hizo un análisis estadístico de los resultados obtenidos en la preprueba y la posprueba utilizando como instrumento las pruebas EGMA (Early Grade Maths Assesment) para obtener los datos que permitieran comprobar la incidencia de los aplicativos diseñados en la hoja de cálculo Excel en el aprendizaje de las habilidades matemáticas fundamentales. Los resultados mostraron un impacto positivo en el grupo experimental al obtener puntajes significativamente mayores respecto al grupo de control, demostrando que los aplicativos en la hoja de cálculo fortalecieron las habilidades matemáticas fundamentales, generando interacción tecnológica, al tiempo que motivó el aprendizaje desde la autonomía, autogestión, resignificación y adaptabilidad a un contexto socioeconómico con pocas oportunidades de acceso a las TIC.

Handbook of International Research in Mathematics Education Lyn D. English, David Kirshner, 2015-07-30 This third edition of the Handbook of International Research in Mathematics Education provides a comprehensive overview of the most recent theoretical and practical developments in the field of mathematics education. Authored by an array of internationally recognized scholars and edited by Lyn English and David Kirshner, this collection brings together overviews and advances in mathematics education research spanning established and emerging topics, diverse workplace and school environments, and globally representative research priorities. New perspectives are presented on a range of critical topics including embodied learning, the theory-practice divide, new developments in the early years, educating future mathematics education professors, problem solving in a 21st century curriculum, culture and mathematics learning, complex systems, critical analysis of design-based research, multimodal technologies, and e-textbooks. Comprised of 12 revised and 17 new chapters, this edition extends the Handbook's original themes for international research in mathematics education and remains in the process a definitive resource for the field.

Competencias básicas Berta Marco Stiefel, 2008-10-27 BASIC COMPETENCES. Toward a new educational paradigm - Starting from the presentation of the basic competences in the documents emanating from the Organic Law of Education (LOE, 2006), the book takes us through the international organisms that have been in charge of the topic of competences and through the work of those experts that have intervened in the clarification of its choice and contents, to find the genesis of the eight basic competences present in the Law. Once the term is explained in its educational sense, the book is centered on the understanding of each one of the competences and its interrelation, a very important point in trying to understand what type of person this group of competences presents and its acceptance in the society which receives it, with its new challenges. An interesting aspect of the book is the close link between competences and the context and the best way of proceeding so as to make effective the mobilization of knowledge and the transfer of learning, illustrated in the book with numerous suggestions, activities and resources. Finally, the programming of the stages is attended to, including the competences among other curricular elements.

Reformas educativas del siglo XXI para un aprendizaje más profundo Fernando M. Reimers, 2022-01-31 Existe un consenso amplio en el plano internacional sobre el doble desafío que la pandemia del Coronavirus dejará tras de sí: la mejora necesaria de la calidad de la educación y las restricciones de recursos disponibles para financiarla. El primero de ellos supone ampliar la perspectiva de la educación, orientándolo hacia aprendizajes más profundos o competencias para el siglo XXI. El segundo, plantea el cómo asegurar una buena utilización de los recursos educativos disponibles para implementar, de un modo efectivo, reformas ambiciosas en contextos de restricciones financieras. La obra, partiendo de un análisis internacional comparado, presenta la experiencia de seis países diversos con capacidades institucionales y financieras muy diferentes, lo que permite ampliar el horizonte de la comparación. Para ello, examina: - Sistemas educativos con niveles muy diferentes de gasto por estudiante. - Reformas sistémicas, que han prestado una especial atención al fortalecimiento de la capacidad para enseñar los aspectos básicos del currículo, como en Ontario (Canadá) y el Punjab (Pakistán). - Reformas que han buscado desarrollar capacidades para enseñar un conjunto de competencias y destrezas mucho más amplio, como en Kenia, México, Singapur y Zimbabue. - Reformas emprendidas en momentos distintos del ciclo de implementación de las políticas, en algunos casos apenas incipientes, como Kenia y Zimbabue; en otros, como México, luchando por sobrevivir a una transición gubernamental; y aún en otros, como Ontario, Punjab y Singapur, donde esos ciclos existen desde hace tiempo. A partir del estudio comparado de todo lo anterior, se extraen algunas lecciones sobre la puesta en práctica de reformas educativas orientadas a enseñar las competencias del siglo XXI en entornos diversos. A la vista de los diferentes análisis, se advierte que la educación del siglo XXI sigue siendo un objetivo huidizo, abrazado de forma retórica por reformas de los sistemas educativos en diversas fases de implementación, pero que todavía no se refleja en la aplicación de estrategias capaces de estar a la altura de las expectativas generadas. El libro pretende promover el diálogo social sobre cómo compensar los costes educativos que dejará tras de sí la pandemia y sobre cómo lograr que, a su término, hayamos sido capaces de construir mejores sistemas educativos alrededor del mundo.

Educación: Una Cuestión de Seguridad Nacional Manuel Mansilla Moya, 2014-12-22 Trabajo de Investigación del año 2014 en el tema Derecho - Otros, Nota: 100.00, , Materia: Métodos y Técnicas de Investigación Jurídica, Idioma: Español, Resumen: En México, el concepto de seguridad nacional se ha enfocado principalmente en la seguridad territorial, y su protección ha sido depositada en las fuerzas armadas mexicanas. Sin embargo, argumentamos que el concepto de seguridad nacional en el país debe ser más amplio para abarcar áreas que son estratégicas en esta materia, pero que actualmente no son consideradas como tal. Asimismo, se argumenta que el fundamento de la seguridad nacional es la educación; se hace un análisis de la situación de la misma en el país, y se hacen propuestas para mejorarla y darle un sentido dirigido a la protección de la seguridad nacional.
