Fostering Development in Midlife and Older Age Irina Catrinel Crăciun,2023-02-22 This handbook integrates and discusses a growing evidence base concerning individual development across middle and late adulthood. The book includes a comprehensive analysis of what growth implies within midlife and older age and considers how different developmental areas are intertwined (i.e., physical, cognitive, social and emotional development as well as personality growth). As the gap between theory and practice still constitutes an issue in developmental research, the handbook also aims to provide illustrative examples of prevention and intervention from a positive psychology perspective. These were selected to represent a variety of topics, relevant for individual development where research informs practice, ranging from happiness, grandparenthood, love and sexuality to loneliness, depression, anxiety, suicide prevention and coping with death. This handbook is a must-have resource for students and researchers working in developmental psychology, health psychology, gerontology and, public health. It will also be of interest to practitioners such as counsellors, life coaches, psychotherapists, organizational psychologists, health professionals, social workers or public health planners.

Advances and Challenges in Pain Measurement Kenneth Craig, Loren Martin, Kai Karos, 2023-08-18 Lord Kelvin (William Thompson) “To measure is to know.” “If you cannot measure it, you cannot improve it.” Pain has proven elusive to definitive measurement in research and clinical settings. While the experience is familiar to virtually everyone, it also is recognized as complex and multidimensional. Critiques of the field advise that pain is often unrecognized, inadequately assessed and underestimated. Unidimensional scales relying upon self-report are commonly used both clinically and in research settings, but they are vulnerable to presentation bias and they fail to capture the complexity of this multidimensional phenomenon. In consequence, there has been considerable interest and effort devoted to the generation of measures capable to capturing the experience for both research and clinical purposes. Both behavioral and physiological approaches have been pursued. Verbal behavior is represented by self-report scales that vary in dimensionality, typically seeking to represent sensory, affective and cognitive features of the experience. The status of self-report scales as the gold standard for pain assessment has been questioned. Nonverbal measures seek to capture behavioral activity ranging from facial expression through limb movements and gestures to posture. Physiological measures are similarly wide-ranging capitalizing on recent developments in brain imaging and novel approaches to autonomic regulation. There also are efforts to fuse behavioral and physiological measures as a means of capturing the complexity of pain. This series of papers seeks to represent the most recent conceptual and empirical advances in the important and rapidly advancing field of pain assessment and measurement. We invite both reviews of the literature and research investigations advancing the field.

The Memory Thief Lauren Aguirre, 2021-06-01 FINALIST FOR THE 2022 PEN/E.O. WILSON LITERARY SCIENCE WRITING AWARD Aguirre writes clearly, concisely, and often cinematically. The book succeeds in providing an accessible yet substantive look at memory science and offering glimpses of the often-challenging process of biomedical

investigation.”—Science Sometimes, it’s not the discovery that’s hard – it’s convincing others that you’re right. The Memory Thief chronicles an investigation into a rare and devastating amnesia first identified in a cluster of fentanyl overdose survivors. When a handful of doctors embark on a quest to find out exactly what happened to these marginalized victims, they encounter indifference and skepticism from the medical establishment. But after many blind alleys and occasional strokes of good luck, they go on to prove that opioids can damage the hippocampus, a tiny brain region responsible for forming new memories. This discovery may have implications for millions of people around the world. Through the prism of this fascinating story, Aguirre recounts the obstacles researchers so often confront when new ideas bump up against conventional wisdom. She explains the elegant tricks scientists use to tease out the fundamental mechanisms of memory. And finally, she reveals why researchers now believe that a treatment for Alzheimer’s is within reach.

About My Father's Business Workbook John L. Donelson,2025-10-24 About My Father's Business is more than a book—it's a blueprint for building a life and business rooted in divine purpose. Designed as a hands-on workbook, this guide equips faith-based entrepreneurs to align their ventures with biblical principles, spiritual clarity, and personal calling. Through seven foundational questions—Who am I? Why am I here? What can I do? When am I most effective? Where am I from? Where am I going? How will I get there?—You'll uncover the spiritual architecture that supports your identity, unlocks your potential, and clarifies your promise. This book challenges the myth that life is random or that God's ways are unknowable. Instead, it reveals how predictable patterns emerge when you practice the principles laid out in His Word. If you're ready to do business by the Book, this workbook will help you build a foundation that lasts—in this life and beyond.
