*Total Memory Makeover* Marilu Henner, 2012-04-24 If you could remember the confidence you felt when your prom date said yes, could it embolden you to ask for a raise today? Could the thrill you felt fitting into your skinny jeans five years ago inspire you to skip the doughnuts this morning? Would the details of your early days with a heartbreaking ex help you recognize the potential red flags in a sexy new romance? Marilu Henner says, "YES!" In this revolutionary new book, the New York Times bestselling author, renowned health advocate, actress, performer, and memory expert helps you develop the ability to remember more of your past, to recall it more clearly, and most of all, to understand your memories as a blueprint for the extraordinary life you were meant to have! Marilu is gifted with Highly Superior Auto-biographical Memory (HSAM), a rare and incredible ability that allows her to vividly recall every detail of her life since childhood. While most of us may prefer to keep the unhappy times buried in the past, Marilu has discovered that only by remembering what happened then can we change our lives for a better now. The past is prelude to the future. But how much of our lives do most of us really remember? And what would our memories tell us if they could? Get ready to harness the power of your autobiographical memory. *Total Memory Makeover* is unlike any memory book ever written. It's not about using mnemonic devices or unusual strategies to remember lists, definitions, names, or numbers. The simple, practical (and fun!) exercises in this unique book will help you: · Stop turning painful memories into emotional baggage · Discover your personal memory Track · Unlock repressed memories that are holding you back · Understand the four types of memory retrieval—Horizontal, Vertical, Mushrooming, and Sporadic—and determine which works best for you · Recall memories faster and stop them from fading · Teach your kids to have great memories · Turn your newfound memories into a treasure map to a successful future! Are you ready? Let's get started on your *Total Memory Makeover*!

**Shock Therapy** Edward Shorter, David Healy, 2007-09-27 Shock therapy is making a comeback today in the treatment of serious mental illness. Despite its reemergence as a safe and effective psychiatric tool, however, it continues to be shrouded by a longstanding negative public image, not least due to films such as the classic *One Flew over the Cuckoo's Nest*, where

the inmate of a psychiatric clinic (played by Jack Nicholson) is subjected to electro-shock to curb his rebellious behavior. Beyond its vilification in popular culture, the stereotype of convulsive therapy as a dangerous and inhumane practice is fuelled by professional posturing and public misinformation. Electroconvulsive therapy, or ECT, has in the last thirty years been considered a method of last resort in the treatment of debilitating depression, suicidal ideation, and other forms of mental illness. Yet, ironically, its effectiveness in treating these patients would suggest it as a frontline therapy, bringing relief from acute symptoms and saving lives. In this book, Edward Shorter and David Healy trace the controversial history of ECT and other shock therapies. Drawing on case studies, public debates, extensive interviews, and archival research, the authors expose the myths about ECT that have proliferated over the years. By showing ECT's often life-saving results, Shorter and Healy endorse a point of view that is hotly contested in professional circles and in public debates, but for the nearly half of all clinically depressed patients who do not respond to drugs, this book brings much needed hope.

The Poetics of Memory Thomas Wägenbaur,1998 The contributors to this volume share a Poetics of Memory as the constant shift between representation in different kinds of cultural archives and its performance in various acts of cultural

recollection. They are engaged in four main projects of mnemonic inquiry: The first deals with the history of the subject and the moment of recollection. The second opens the scope of an aesthetic reading of literary texts towards cultural memory in general. The third examines the nature of (literary) memory as such. The final group of contributors delimits the literary text towards intertextuality and electronic hypertext which challenges but also confirms the proposed Poetics of Memory

*On the Sea of Memory* Jonathan Cott, 2005 Rolling Stone contributing editor Jonathan Cott uses the devastating effects that electroshock therapy had on his memory as the catalyst for a far-reaching exploration of the realms of memory and identity.

Begging to Differ David S. Thatcher, 1999 The frequent inconsistencies in Shakespeare's work, particularly in plot and characterization, have long attracted the attention and even ire of his commentators. Based largely on four plays - Hamlet, Measure for Measure, The Winter's Tale and Henry V - this study is a detailed exploration of some modes of discrepancy as they relate to three specific areas of Shakespeare's dramaturgy: plot and narrative; language and text; and reasoning and proof. Professor Thatcher examines the nature and causes of real and apparent inconsistencies and suggests whether or not they may be seen to have artistic or dramatic justification. *Begging to Differ* includes the first comprehensive treatment of a neglected topic, discrepant quotations within Shakespeare's text.
