The Essex Serpent Sarah Perry, 2017-06-06 NOW AN APPLE TV+ SERIES A Washington Post Notable Work of Fiction \* Winner of the British Book Awards Fiction Book of the Year and overall Book of the Year \* A Kirkus Reviews Best Book of the Year \* Waterstones Book of the Year \* Costa Book Award Finalist “A novel of almost insolent ambition—lush and fantastical, a wild Eden behind a garden gate...it’s part ghost story and part natural history lesson, part romance and part feminist parable. I found it so transporting that 48 hours after completing it, I was still resentful to be back home.” —New York Times

London, 1893. When Cora Seaborne’s brilliant, domineering husband dies, she steps into her new life as a widow with as much relief as sadness: her marriage was an unhappy one, and she never suited the role of society wife. Seeking refuge in fresh air and open space, she leaves the metropolis for coastal Essex, accompanied by her inquisitive and obsessive eleven-year-old son, Francis, and the boy’s nanny, Martha, her fiercely protective friend. Once there, they hear rumors that after nearly three hundred years, the mythical Essex Serpent, a fearsome creature that once roamed the marshes, has returned. When a young man is mysteriously killed on New Year’s Eve, the community’s dread transforms to terror. Cora, a keen amateur naturalist with no patience for religion or superstition, is immediately enthralled, certain that what locals think is a magical sea beast may be a previously undiscovered species. Eager to investigate, she is introduced to parish vicar William Ransome, who is equally suspicious of the rumors but for different reasons: a man of faith, he is convinced the alarming reports are caused by moral panic, a flight from the correct and righteous path. As Cora and William attempt to discover the truth about the Essex Serpent’s existence, these seeming opposites find themselves inexorably drawn together in an intense relationship that will change both of them in ways entirely unexpected. And as they search for answers, Cora’s London past follows her to the coast, with striking consequences. Told with exquisite grace and intelligence, *The Essex Serpent* masterfully explores questions of science and religion, skepticism and faith, but it is most of all a celebration of love, and the many different—and surprising—guises it can take.

London, 1893. When Cora Seaborne's controlling husband dies, she steps into her new life as a widow with as much relief as sadness. Along with her son Francis - a curious, obsessive boy - she leaves town for Essex, in the hope that fresh air and open space will provide refuge. On arrival, rumours reach them that the mythical Essex Serpent, once said to

roam the marshes claiming lives, has returned to the coastal parish of Aldwinter. Cora, a keen amateur naturalist with no patience for superstition, is enthralled, convinced that what the local people think is a magical beast may be a yet-undiscovered species. As she sets out on its trail, she is introduced to William Ransome, Aldwinter's vicar, who is also deeply suspicious of the rumours, but thinks they are a distraction from true faith. As he tries to calm his parishioners, Will and Cora strike up an intense relationship, and although they agree on absolutely nothing, they find themselves at once drawn together and torn apart, affecting each other in ways that surprise them both. The Essex Serpent is a celebration of love, and the many different shapes it can take.

The Culture of Building Howard Davis,2006-05-12 The Culture of Building describes how the built world, including the vast number of buildings that are the settings for peoples everyday lives, is the product of building cultures--complex systems of people, relationships, building types, techniques, and habits in which design and building are anchored. These cultures include builders, bankers, architects, developers, clients, contractors, craftspeople, building inspectors, planners, and many others. The product of these cultures, which operate building after building, is the built world of cities and settlements. In this book, Howard Davis uses historical, contemporary, and cross-cultural examples to describe the nature and influence of these cultures. He shows how building cultures reflect the general cultures in which they exist, how they have changed over history, how they affect the form of buildings and cities, and how present building cultures, which are responsible for the contemporary everyday environments, may be improved. Following the development of the idea of building cultures using several historical examples, the book lays out a framework that puts such topics as craft and professionalism, the vernacular and nonvernacular, and design and construction in common frameworks. Although the book ranges widely over different cultures and historical periods, it emphasizes the transformations that took place in architecture and building practice from the late eighteenth century to the present. Finally, the book uses a series of contemporary examples that demonstrate the building culture as a living concept. These examples, which include built work as well as innovative processes that go beyond the work of architects alone, are described as the seeds that can help the emergence of a better build world. This beautiful book features over 260 color and black-and-white illustrations, most from the authors extensive collection of slides, and includes photographs, prints, and drawings from historical archives and contemporary architectural offices.

*Land Abandoned to the Sea* Stuart Oliver,2021-04-08 Significant changes are affecting coastlines around the world due to economic pressures and climate change. This book addresses the social, cultural and political context of the process of managed coastal realignment, the strategic abandonment of the coast, as a means of coping with these changes. With a specific focus on the Blackwater Estuary in Essex, Stuart Oliver analyses the cultural and social implications of managed retreat and proposes managed realignment as a practical way in which society can rethink itself, addressing the new realities of the environment and a move towards developing a more sustainable relationship with it.
