

Tuan Yi Fu Space And Place

Emery N. Castle

Space and Place Yi-Fu Tuan, 1977 In the 25 years since its original publication, *Space and Place* has not only established the discipline of human geography, but it has proven influential in such diverse fields as theater, literature, anthropology, psychology, and theology. Eminent geographer Yi-Fu Tuan considers the ways in which people feel and think about space, how they form attachments to home, neighborhood, and nation, and how feelings about space and place are affected by the sense of time. He suggests that place is security and space is freedom: we are attached to the one and long for the other. Whether he is considering sacred versus biased space, mythical space and place, time in experiential space, or cultural attachments to space, Tuan's analysis is thoughtful and insightful.

Space and Place, 2001

Space, Place and Territory Fabio Duarte, 2017-01-12 Space, place and territory are concepts that lie at the core of geography and urban planning, environmental studies and sociology. Although space, place and territory are indeed polysemic and polemic, they have particular characteristics that distinguish them from each other. They are interdependent but not interchangeable, and the differences between them explain how we simultaneously perceive, conceive and design multiple spatialities. After drawing the conceptual framework of space, place and territory, the book initially explores how we sense space in the most visceral ways, and how the overlay of meanings attached to the sensorial characteristics of space change the way we perceive it - smell, spatial experiences using electroencephalography, and the changing meaning of darkness are discussed. The book continues exploring cartographic mapping not as a final outcome, but rather as an epistemological tool, an instrument of inquiry. It follows on how particular ideas of space, place and territory are embedded in specific urban proposals, from Brasília to the Berlin Wall, airports and infiltration of digital technologies in our daily life. The book concludes by focusing on spatial practices that challenge the status quo of how we perceive and understand urban spaces, from famous artists to anonymous interventions by traceurs and hackers of urban technologies. Combining space, place and territory as distinctive but interdependent concepts into an epistemological matrix may help us to understand contemporary phenomena and live them critically.

Dear Colleague Yi-fu Tuan, 2002 Eminent geographer Yi-Fu Tuan's letters to his friends and colleagues - distilling observations, ideas, and experiences - have carried Tuan's insights, and his reputation, far beyond his chosen field. Culling

the most characteristic thoughts and compelling moments from these prized letters, Dear Colleague at long last gives readers near and far the opportunity to share what Tuan's correspondents have already read - and to discover the pleasures of the underlined passages in a book of life at once edifying, entertaining, and exemplary.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. The Construction of Place in Amitav Ghosh's "The Hungry Tide" Marnie Hensler, 2020-10-09 Seminar paper from the year 2020 in the subject Literature - Asia, University of Freiburg (English Department), course: On the Beach: Narrating Littoral Space in Literature, language: English, abstract: This paper claims that the space of the tide country, as perceived by the protagonists in *The Hungry Tide*, is constructed through two major embedded narratives. The first narrative is the legend of the goddess Bon Bibi. Passed down orally from generation to generation, the rhythmic legend sediments itself in the minds of the tide country people, defines how they see their homeland and thus actively, and repeatedly, constructs and reconstructs the space of the tide country. The second narrative is Nirmal's recollection of his repeated adventures to Morichjhapi. Unlike the legend of Bon Bibi, his adventures are transmitted in writing through his notebook. Accessible to Kanai and the reader only, its content shapes and constructs how both character and reader perceive and construct the space of the historical island. However, it also works the other way around. The place of the tide country also influences the narratives that evolve around it. The Bon Bibi legend is as fluid as the tide country, being (re)interpreted from generation to generation. Nirmal's notebook as well reflects the main characteristics of the tide country as it travels on water (on the Megha) and ultimately also disappears in water (like the tide country eventually will as well). In this paper, a close textual analysis of both embedded narratives reveals how they manage to (re)construct the space of the tide country for both characters and readers (i.e. which narrative strategies are used etc.) and what distinct topographical characteristics of the tide country can be found within them. In sum, this paper claims that narratives have the ability to construct the space(s) we live in. Cultural geography examines how places and identities are produced. It looks into how people of a certain culture and place perceive their "homeland" or, inverse, how they construct it with the help of cultural artefacts. Cultural artefacts like folktales or songs can contribute to the construction of space since they describe and determine how people view and perceive the places around them. Whatever cultural artefacts people produce give insight into how they see their space. Narratives as cultural artefacts, for example, can thus show us how spaces are perceived by those who "tell" and "consume" them.

Space, Place and Poetry in English and German, 1960-1975 Nicola Thomas, 2018-07-13 Space, Place and Poetry in English and German, 1960-1975 examines the work of Paul Celan, J. H. Prynne, Derek Mahon, Sarah Kirsch, Edwin Morgan and Ernst Jandl, bringing together postwar English- and German-language poetry and criticism on the theme of space, place and landscape. Nicola Thomas highlights hitherto underexplored connections between a wide range of poets working across

the two language areas, demonstrating that space and place are vital critical categories for understanding poetry of this period. Thomas's analysis reveals weaknesses in existing critical taxonomies, arguing for the use of 'late modernist' as a category with cross-cultural relevance, and promotes methodological exchange between the Anglophone and German traditions of landscape, space and place oriented poetic criticism, to the benefit of both.

Edinburgh Companion to Children's Literature Clementine Beauvais, 2017-09-08 This collection takes informed and scholarly readers to the utmost frontier of children's literature criticism, from the intricate worlds of children's poetry, picturebooks and video games to the new theoretical constellations of critical plant studies, non-fiction studies and big data analyses of literature.

Interpreting Our World Joseph J. Kerski, 2016-10-17 This important book demonstrates why geography matters in the modern-day world through its examination of 100 moments throughout history that had a significant impact on the study of geography-literally, writing about the earth. Geography is not simply accounts of the lands of earth and their features; it's about discovering everything there is to know about our planet. This book shows why geography is of critical importance to our world's 21st-century inhabitants through an exploration of the past and present discoveries that have been made about the earth. It pinpoints 100 moments throughout history that had a significant impact on the study of geography and the understanding of our world, including widely accepted maps of the ancient world, writings and discoveries of key thinkers and philosophers, key exploration events and findings during the Age of Discovery, the foundations of important geographic organizations, and inventions in digital mapping. The book begins with a clear explanation of geography as a discipline, a framework, and a way of viewing the world, followed by coverage of each of the 100 discoveries and innovations that provides sufficient background and content for readers to understand each topic. The book concludes with a concise synopsis of why it all matters and a look forward to 10 possible future discoveries in the next 50 years of geography. Students will gain a clear sense of what is truly revolutionary about geography, perhaps challenging their preconceived notion of what geography actually is, and grasp how important discoveries revolutionized not only the past but the present day as well.

Environment, Space, Place - Volume 3, Issue 2 (Fall 2011) Gary Backhaus, 2011-01-01

Coming Home to China Yi-Fu Tuan, 2007 In the summer of 2005, distinguished geographer Yi-Fu Tuan ventured to China to speak at an international architectural conference, returning for the first time to the place he had left as a child sixty-four years before. He traveled from Beijing to Shanghai, addressing college audiences, floating down the Yangtze River on a riverboat, and visiting his former home in Chongqing. In this enchanting volume, Tuan's childhood memories and musings on the places encountered during this homecoming are interspersed with new lectures, engaging overarching principles of human geography as well as the changing Chinese landscape. Throughout, Tuan's interactions with his hosts, with his colleague's children, and even with a garrulous tour guide, offer insights into one who has spent his life studying

place, culture, and self. At the beginning of his trip, Tuan wondered if he would be a stranger among people who looked like him. By its end, he reevaluates his own self-definition as a hyphenated American and sheds new light on human identity's complex roots in history, geography, and language. Yi-Fu Tuan is author of *Cosmos and Hearth*, *Dear Colleague*, and *Space and Place*, all from Minnesota. He retired from the University of Wisconsin-Madison in 1998.

Space and Place: Humanistic Perspective Yi-Fu Tuan, 1974

Space, Place, and Sex Lynda Johnston, Robyn Longhurst, 2010 This accessible and engaging book explores the ways that space, place, and sex are inextricably linked from the micro to the macro level, from the individual body to the globe. Drawing on queer, feminist, gender, social, and cultural studies, Lynda Johnston and Robyn Longhurst highlight the complex nature of sex and sexuality and how they are connected to both virtual and physical spaces and places. Their aim is to enrich our understanding of sexual identities and practices--whether they be lesbian, gay, bisexual, transsexual, asexual, queer, or heterosexual. They show that bodies are defined and connected through media such as television, movies, ads, and the Internet, as well as through real places such as homes, churches, sports arenas, city streets, beaches, and wilderness. Drawing on a diverse array of historical and contemporary examples, the authors argue convincingly that sexual politics permeate all places and spaces at every level of geographical scale. Thus, they illustrate, sexuality affects the way people live in and interact with space and place, as space and place in turn affect people's sexuality.

Civic Image and the Building of the Minneapolis Industrial Exposition Peter Ausenhus, 1996

At Home with Density Nuala Rooney, 2003 Through qualitative interviews with long-term residents of public housing, this book explores residents' experience of high-density space. It traces the development of Hong Kong housing forms and analyses how people's expectations of domestic space have been affected by social mobility and shifting cultural values of space, lifestyle, and design.

The Changing American Countryside Emery N. Castle, 1995 The literature on rural America, to the extent that it exists, has largely been written by urban-based scholars perpetuating out-of-date notions and stereotypes or by those who see little difference between rural and agricultural concerns. As a result, the real rural America remains much misunderstood, neglected, or ignored by scholars and policymakers alike. In response, Emery Castle offers *The Changing American Countryside*, a volume that will forever change how we look at this important subject. Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands. These authors examine the role of non-metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty, industry, the environment, education, family, social problems, ethnicity, race, religion, gender, government, public policy, and regional diversity. The authors are especially effective in demonstrating why rural America is so much more than just agriculture. It is in fact highly diverse, complex, and interdependent with urban America.

and the international market place. Most major rural problems, they contend, simply cannot be effectively addressed in isolation from their urban and international connections. To do so is misguided and even hazardous, when one-fourth of our population and ninety-seven per cent of our land area is rural. Together these writings not only provide a new and more realistic view of rural life and public policy, but also suggest how the field of rural studies can greatly enrich our understanding of national life.

The Sundance Writer Mark Connelly, 2000 The Sundance Writer is a comprehensive rhetoric/reader/research guide and grammar handbook all in one reasonably priced paperback text. This text's origin is the successful Sundance Reader by Mark Connelly and incorporates the majority of the reader's material into the reader portion of The Sundance Writer.

Red Lodge and the Mythic West Bonnie Christensen, 2002 Tracing the story of Red Lodge from the 1880s to the present, Christensen tells how a mining town managed to endure the vagaries of the West's unpredictable extractive-industries economy. She connects Red Lodge to a myriad of larger events and historical forces to show how national and regional influences have contributed to the development of local identities, exploring how and why westerners first rejected and then embraced western images, and how ethnicity, wilderness, and historic preservation became part of the identity that defined one town.--BOOK JACKET.

Great Plains Quarterly, 2011

Heritage on Stage Steven D. Hoelscher, 1998 The southwestern Wisconsin town of New Glarus--known internationally for its annual Wilhelm Tell festival, and for decades a favorite cultural destination of tourists and visitors to Wisconsin--comes vividly into focus in Steven D. Hoelscher's many-layered examination of the invention of ethnic place in America's Little Switzerland. Drawing on sociology, social history, ethnic studies, performance studies, geography, and history, Hoelscher opens up a timely, richly informative and provocative discussion of the ways in which landscape, heritage, and the search for authenticity create identity in a unique ethnic American community. The questions Hoelscher raises about the politics of culture, the role of memory, and the willful manipulation of the past will fascinate historians, geographers, and scholars of stage performance and cultural studies, and are sure to stimulate and challenge all readers interested in Wisconsin history. Both a sensitive portrait of a living community's special identity and a probing exploration of the ways this identity is invented, presented for the public, and sustained, *Heritage on Stage* is a ground-breaking work and a significant contribution toward the understanding of our nation's perception of itself and its ethnicity.

Promised Lands David M. Wrobel, 2002 Whether seen as a land of opportunity or as paradise lost, the American West took shape in the nation's imagination with the help of those who wrote about it; but two groups who did much to shape that perception are often overlooked today. Promoters trying to lure settlers and investors to the West insisted that the frontier had already been tamed--that the only frontiers remaining were those of opportunity. Through posters, pamphlets, newspaper

articles, and other printed pieces, these boosters literally imagined places into existence by depicting backwater areas as settled, culturally developed regions where newcomers would find none of the hardships associated with frontier life. Quick on their heels, some of the West's original settlers had begun publishing their reminiscences in books and periodicals and banding together in pioneer societies to sustain their conception of frontier heritage. Their selective memory focused on the savage wilderness they had tamed, exaggerating the past every bit as much as promoters exaggerated the present. Although they are generally seen today as unscrupulous charlatans and tellers of tall tales, David Wrobel reveals that these promoters and reminiscers were more significant than their detractors have suggested. By exploring the vast literature produced by these individuals from the end of the Civil War through the 1920s, he clarifies the pivotal impact of their works on our vision of both the historic and mythic West. In examining their role in forging both sense of place within the West and the nation's sense of the West as a place, Wrobel shows that these works were vital to the process of identity formation among westerners themselves and to the construction of a West in the national imagination. Wrobel also sheds light on the often elitist, sometimes racist legacies of both groups through their characterizations of Native Americans, African Americans, Mexican Americans, and Asian Americans. In the era Wrobel examines, promoters painted the future of each western place as if it were already present, while the old-timers preserved the past as if it were still present. But, as he also demonstrates, that West has not really changed much: promoters still tout its promise, while old-timers still try to preserve their selective memories. Even relatively recent western residents still tap into the region's mythic pioneer heritage as they form their attachments to place. *Promised Lands* shows us that the West may well move into the twenty-first century, but our images of it are forever rooted in the nineteenth.
