Exploring Research Impact in Academia and Why It Matters Andy Phippen, Louise Rutt, 2024-12-02 Posing fundamental questions around the worth of knowledge creation and the social value of in-depth research, this volume offers a novel approach by exploring why impact is important in academic research, rather than explaining how it should be conducted. Using qualitative data to unpack what research impact really constitutes, this book foregrounds the practicalities of achieving impactful, high-quality academic research, and argues for the importance of best practice in instilling public and reputational value of research for wider societal gain. Chapters unpack the concept of impact, and discuss how it can be made more tangible and realisable, particularly in the context of theoretical or pure research where research outcomes are often obscure. Calling for greater clarity in how to articulate the value of impact within research strategies, the book will ultimately argue for the central role of impact in core research processes and support the development of career researchers in their practical roles and identity formation. The book will be of interest to academics and postgraduate students involved with research methods, research policy, and higher education more broadly. Despite the predominantly UK-based context of the research, the volume will have resonance in countries where knowledge economy concepts have impacted on higher education policy and practice, and so research managers and higher education policy advisors may also find the book of interest.

Success in GCSE Drama (14-16) Phil Parker, Craig Boardman, 2005 Success in GSCE Drama is accompanied by its own DVD, which showcases practical demonstrations by students themselves of teaching and learning points from each of the four schemes of work.

Fieldwork for Healthcare Dominic Furniss, Rebecca Randell, Aisling Ann O’Kane, Svetlena Taneva, 2022-05-31 Conducting fieldwork for investigating technology use in healthcare is a challenging undertaking, and yet there is little in the way of community support and guidance for conducting these studies. There is a need for better knowledge sharing and resources to facilitate learning. This is the second of two volumes designed as a collective graduate guidebook for conducting fieldwork in healthcare. This volume brings together thematic chapters that draw out issues and lessons learned from practical

experience. Researchers who have first-hand experience of conducting healthcare fieldwork collaborated to write these chapters. This volume contains insights, tips, and tricks from studies in clinical and non-clinical environments, from hospital to home. This volume starts with an introduction to the ethics and governance procedures a researcher might encounter when conducting fieldwork in this sensitive study area. Subsequent chapters address specific aspects of conducting situated healthcare research. Chapters on readying the researcher and relationships in the medical domain break down some of the complex social aspects of this type of research. They are followed by chapters on the practicalities of collecting data and implementing interventions, which focus on domain-specific issues that may arise. Finally, we close the volume by discussing the management of impact in healthcare fieldwork. The guidance contained in these chapters enables new researchers to form their project plans and also their contingency plans in this complex and challenging domain. For more experienced researchers, it offers advice and support through familiar stories and experiences. For supervisors and teachers, it offers a source of reference and debate. Together with the first volume, *Fieldwork for Healthcare: Case Studies Investigating Human Factors in Computing systems*, these books provide a substantive resource on how to conduct fieldwork in healthcare. Table of Contents: Preface / Acknowledgments / Ethics, Governance, and Patient and Public Involvement in Healthcare / Ready the Researcher for Fieldwork in Healthcare / Establishing and Maintaining Relationships in Healthcare Fields / Practicalities of Data Collection in Healthcare Fieldwork / Healthcare Intervention Studies “In the Wild” / Impact of Fieldwork in Healthcare: Understanding Impact on Researchers, Research, Practice, and Beyond / References / Biographies

Mathematical Outreach: Explorations In Social Justice Around The Globe Hector Rosario, 2019-10-30 'The presentations gathered in this book offer plenty of ideas and advice for anyone seeking to start a program or affiliate with an existing one. In general, the authors do not compare their programs to those described in other chapters, but readers of the

whole volume will identify significant commonalities across the various audiences, processes, obstacles, and outcomes described. Summing up: Recommended. All readers.'CHOICE This groundbreaking anthology is a collection of accounts from leaders in mathematical outreach initiatives. The experiences range from prison education programs to alternative urban and Indian reservation classrooms across the United States, traversing the planet from the Americas to Africa, Asia, and the Indian subcontinent. Their common theme is the need to share meaningful and beautiful mathematics with disenfranchised communities across the globe. Through these stories, the authors share their educational philosophy, personal experiences, and student outcomes. They incorporate anecdotal vignettes since research articles in mathematics education often exclude them. The inclusion of these stories is an element that adds immeasurable value to the larger narratives they tell.
