Maria Montessori

Maria Montessori Renato Foschi, 2020-03-01 En las primeras décadas del siglo XX, la italiana Maria Montessori se convirtió internacionalmente en el icono de una nueva pedagogía que propone una educación progresista a la medida de los niños. Pero, a pesar de la importancia del personaje, existen relativamente pocas biografías intelectuales dedicadas a ella, y menos aún que no sean de corte hagiográfico. Renato Foschi aborda en este libro un análisis crítico, con referencias a fuentes publicadas y no publicadas, para insertar la biografía de Montessori dentro de las culturas en las que trabajó, al tiempo que analiza los fundamentos de su pedagogía en relación con la evidencia teórica y científica que aportan las últimas investigaciones sobre esta pedagogía de la libertad. Esta obra resalta la novedad del método Montessori a la luz de las ciencias humanas y sociales contemporáneas, poniendo el énfasis en la relevancia que ciertas posiciones científicas pueden desempeñar en el desarrollo de la sociedad civil cuando se entrelazan con la historia de las instituciones políticas y la organización del Estado social. Aquí se encuentran, en fin, nuevas claves de lectura para comprender la obra de Maria Montessori y la relevancia de su método pedagógico.

Children, Spaces and Identity Margarita Sánchez Romero, Eva Alarcón García, Gonzalo Aranda Jiménez, 2015-10-31 How do children construct, negotiate and organize space? The study of social space in any human group is fraught with limitations, and to these we must add the further limits involved in the study of childhood. Here specialists from archaeology, history, literature, architecture, didactics, museology and anthropology build a body of theoretical and methodological approaches about how space is articulated and organized around children and how this disposition affects the creation and maintenance of social identities. Children are considered as the main actors in historic dynamics of social change, from prehistory to the present day. Notions on space, childhood and the construction of both the individual and the group identity of children are considered as a prelude to papers that focus on analyzing and identifying the spaces which contribute to the construction of children's identity during their lives: the places they live, learn, socialize and play. A final section deals with these same aspects, but focuses on funerary contexts, in which children may lose their capacity to influence events, as it is adults who establish burial strategies and practices. In each case authors ask questions such as: how do adults construct spaces for children? How do children manage their own spaces? How do people (adults and children) build (invisible and/or physical) boundaries and spaces?

The Praeger Handbook of Education and Psychology Raymond Horn, Joe Kincheloe, 2006-12-30 Cognition, mind, counseling psychology, lesson plans, learning styles, and Vygotsky are just a few of the many subjects discussed in this exciting work. Educators, students, counselors, parents, and others will find new understanding as they read and browse. How does the immigrant experience affect student outcomes? What are the effects of poverty on standardized testing? How can a teacher or parent develop study skills in the special needs learner? What is the effect of the school environment on students? What are the larger issues at work in educating students of diverse races, cultures, and classes. This work, a rethinking of school psychology, will be an essential resource for anyone who is interested in teaching and learning. It combines effective, traditional knowledge with contemporary insights into the nature of today's schools and students.

The Montessori Method - Scientific Pedagogy as Applied to Child Education Maria Montessori, 2016-08-18 In the period that has elapsed between the publication of the Italian and American editions, I have had, with my pupils, the opportunity to simplify and render more exact certain practical details of the method, and to gather additional observations concerning discipline. The results attest the vitality of the method and the necessity for an [Pg viii]extended scientific collaboration in the near future, and are embodied in two new chapters written for the American edition. I know that my method has been widely spoken of in America, thanks to Mr. S. S. McClure, who has presented it through the pages of his well-known magazine. Indeed, many Americans have already come to Rome for the purpose of observing personally the practical application of the method in my little schools. If, encouraged by this movement, I may express a hope for the future, it is that my work in Rome shall become the centre of an efficient and helpful collaboration. To the Harvard professors who have made my work known in America and to McClure's Magazine, a mere acknowledgment of what I owe them is a barren response; but it is my hope that the method itself, in its effect upon the children of America, may prove an adequate expression of my gratitude. Maria Montessori.

The Montessori Method Maria Montessori, 2023-04-30 The Montessori Method is a book written by Maria Montessori that describes her educational philosophy and teaching method. The book focuses on the developmental needs of children, and how the Montessori Method is designed to meet those needs. Montessori believed that children should be allowed to learn at their own pace and in their own way and that the role of the teacher is to guide and facilitate this process. The book covers a wide range of topics, including the organization of the classroom, the use of Montessori materials, the importance of practical life skills, and the role of play in learning. It also discusses the development of language, reading, and writing skills, as well as the importance of sensorial experiences in early childhood education. Overall, The Montessori Method presents a comprehensive and innovative approach to education that has had a significant impact on early childhood education around the world.

En conmemoración de los 70 años de la muerte de Montessori, la Universidad Pedagógica Nacional dedicó un año académico de la Cátedra Doctoral en el Doctorado Interinstitucional de Educación a su figura. La obra aborda la relevancia histórica de Montessori no solo como innovadora pedagoga, sino también como una de las mujeres pioneras que desafió las barreras de género en un contexto educativo dominado por los hombres. La primera parte se enfoca en la obra de Montessori, presentando estudios contemporáneos sobre su influencia en la educación inclusiva, la cognición infantil y los principios filosóficos de su pensamiento. La segunda parte explora contribuciones de otras mujeres destacadas en el ámbito educativo, como Martha Nussbaum y Olga Lucía Zuluaga. A través de un análisis exhaustivo, el texto profundiza en los principios fundamentales del método Montessori, como la autonomía, el respeto y la observación, situándolos dentro del contexto histórico y social que marcó su época.

Bootlegging Lee Marshall,2005-08-10 By examining the centrality of Romantic authorship to both copyright and the music industry, the author highlights the mutual dependence of capitalism and Romanticism, which situates the individual as the key creative force while challenging the commodification of art and self. Marshall reveals how the desire for bootlegs is driven by the same ideals of authenticity employed by the legitimate industry in its copyright rhetoric and practice and demonstrates how bootlegs exist as an antagonistic but necessary component of an industry that does much to prevent them.

This book will be of great interest to researchers and students in the sociology of culture, social theory, cultural studies and law.

Filosofia Da Educação John Carth,2016-12-13 Este trabalho é um levantamento sucinto das contribuições de cientistas educacionais que ousaram enfrentar o ostracismo de uma educação tacanha, estagnada e muitas vezes, prejudicial ao estudante, mormente, da primeira infância ou das séries iniciais. Para tanto, foram de encontro, enfrentaram estruturas rígidas e situações sociais adversas, guerras, preconceitos, abandono social, orfandade e desesperança. Considero-os aqui como sendo os “experimentalistas”, ou seja, pessoas que transcenderam a si mesmos e as condições adversas para inovar, trazendo para o campo educacional elementos que não eram considerados à época. De alguma forma, em algum sentido ou em vários deles, apesar das proximidades ou distâncias (geográfica, temporal, social), esses que aqui comporão o miolo deste trabalho, dialogam com perfeição como se sempre estivessem sentados à mesma mesa para confabular em favor das crianças e sua importante formação. São eles: Johann Heinrich Pestalozzi, Friedrich Wilhelm Augusto Fröbel, Jean-Jacques Rousseau, Célestin Freinet e Maria Tecla Artemisia Montessori. Sim eles dialogam, trazem para a frente dos holofotes os interesses das crianças, para eles elas são o princípio, o meio e o fim do trabalho com educação.
