Psychoanalytic Responses to Children's Literature Lucy Rollin, Mark I. West, 2008-04-01 With the growing emphasis on

theory in literary studies, psychoanalytic criticism is making notable contributions to literary interpretation. Sixteen chapters in this work explore the psychological subtexts of such important children's books as Carlo Collodi's *Pinocchio*, Roald Dahl's *James and the Giant Peach*, Kenneth Grahame's *The Wind in the Willows*, Louise Fitzhugh's *Harriet the Spy*, Mark Twain's *The Prince and the Pauper*, and E.B. White's *Charlotte's Web*. Drawing on the ideas of such psychoanalytic theorists as Sigmund Freud, Alice Miller, D.W. Winnicott and Jacques Lacan, it analyzes the psychological development of characters, examines reader responses, and studies the lives of authors and illustrators such as Beatrix Potter and Jessie Willcox Smith.

The Important Books Joseph Stanton, 2005-08-18 *The Important Books* takes a look at some of the most significant and talked about authors, illustrators, and titles in the genre, including Maurice Sendak, Margaret Wise Brown, William Joyce, and Chris Van Allsburg. While focusing on those books that are distinguished by some degree of originality in both word and image, the author points out that the importance of picture books is not primarily pedagogical--they are not intended to serve as dumbed down versions of young adult or adult novels--and the audience for these great books is not solely children. Because the children's picture book is designed to provide the context for an intimate transaction involving the imaginations of both parent and child, there is a social value to the form that lends a special poignancy to the pleasure it provides.

Thinking and Learning through Children's Literature Miriam G. Martinez, Junko Yokota, Charles Temple, 2017-04-18 Much of teachers' attention these days is focused on having students read closely to ferret out the author's intended meaning and the devices used to convey that meaning. But we cannot forget to guide students to have moving engagements with literature, because they need to make strong personal connections to books of merit if they are to become the next generation of readers: literate people with awareness of and concern for the diversity of human beings around them and in different times and places. Fortunately, guiding both students' personal engagement with literature and their close reading to appreciate the author's message and craft are not incompatible goals. This book enthusiastically and intelligently addresses both imperatives, first surveying what is gained when students are immersed in literature; then celebrating and explicating the main features of literature students need to understand to broaden their tastes and deepen their engagement, at the same time they meet external standards; then presenting a host of active methods for exploring all major genres of children's books; and finally presenting suggestions for interdisciplinary teaching units grounded in literature. Created by noted leaders in the fields of children's literature and literacy, the book is enlivened by recurring features such as suggested reading lists, issues for discussion, links to technology, and annotations of exemplary books.
