Ritual and Archaic States Murphy, Joanne M,2016-08-24 While ritual and archaic states have both been prominent topics in recent archaeological studies, this is the first volume to combine both subjects by exploring the varying nature, expression, and significance of ritual in archaic states. It compares archaic rituals across many different cultures--Vijayanagara, Swahili Lamu, Venice, Asante, Aztec, Ming China, Oaxaca, Greece, Inca, Wari, and Chaco. The contributors posit that the nature of rituals, the level of investment in rituals, and their sociopolitical significance can vary greatly from state to state, even among societies with similar levels of social complexity, population, and spatial distribution. Highlighting the importance of ritual as an inherent part of a cultural narrative, and demonstrating how the study of ritual enables a better understanding of diverse social groups, this volume shows how the location, frequency, and role of ritual differed significantly across archaic states.

The Parks Belong to the People Joe Weber,Selima Sultana,2024-04 In examining the 424 units of the U.S. national park system, geographers Joe Weber and Selima Sultana focus attention on the historical geography of the system as well as its present distribution, covering the diversity of places under the control of the National Park Service (NPS). This includes the famous national parks such as the Grand Canyon, Yellowstone, and Yosemite and the lesser-known national monuments, memorials, lakeshores, seashores, rivers, recreation areas, preserves, reserves, parkways, historic sites, historic parks, and a range of battlefields, as well as more than twenty additional sites not fitting into any of these categories (such as the White House). The geographic view of The Parks Belong to the People sets it apart from others that have taken a solely historical approach. Where parks are located, what they are near, where their visitors come from, and how land use and activities are organized within parks are some of the fundamental issues discussed. The majority of units in the NPS are devoted to recreation areas or historic sites such as battlefields, archaeological sites, or sites devoted to a specific person, and this is reflected in the authors' approach. What we think of as a national park has changed over the years and will continue to change. Weber and Sultana emphasize changing social and political environments in which NPS units were created and the roles they serve, such as protecting scenery, providing wildlife habitats, preserving history, and serving as scientific laboratories and places for outdoor recreation. The authors also focus on parks as public facilities and sites of economic activities. National parks were created by people for people to enjoy, at great cost and with great benefit. They cannot be

understood without taking this human context into account.

Violent Utopia Jovan Scott Lewis,2022-08-08 In Violent Utopia Jovan Scott Lewis retells the history and afterlife of the 1921 Tulsa race massacre, from the post-Reconstruction migration of Black people to Oklahoma Indian Territory to contemporary efforts to rebuild Black prosperity. He focuses on how the massacre in Tulsa's Greenwood neighborhood—colloquially known as Black Wall Street—curtailed the freedom built there. Rather than framing the massacre as a one-off event, Lewis places it in a larger historical and social context of widespread patterns of anti-Black racism, segregation, and dispossession in Tulsa and beyond. He shows how the processes that led to the massacre, subsequent urban renewal, and intergenerational poverty shored up by nonprofits constitute a form of continuous slow violence. Now, in their attempts to redevelop resources for self-determination, Black Tulsans must reconcile a double inheritance: the massacre's violence and the historical freedom and prosperity that Greenwood represented. Their future is tied to their geography, which is the foundation from which they will repair and fulfill Greenwood's promise.
