Building a House Charles Simpson, Barry Hodgson, 1997

Building a House: Footing Systems TAFE Holmesglen, Charles Simpson, Barry Hodgson, 2008-08-21 This is an Australian book that examines in detail the 'wet' processes involved in constructing a house. It covers footing systems used in various types of house construction and has been written to current Australian Standards. Both slab on ground construction and the setting out and construction requirements for concrete strip footings are covered, including practical information on: site classification slab types step by step design and plan detailing setting out strip footings for a brick house the slump and compression tests constructing a slab on the ground, step-by-step calculating quantities and costing There are over 150 detailed drawings complementing the easy-to-read text. Trade terms are defined as they are encountered. The book is suitable for training in VET programs both on and off the job. It is ideally suited to all trade courses related to building construction, from Certificate and Advanced Certificate courses in building construction and building surveying and associated Diploma courses in architectural drawing. It is also a valuable resource for the owner/builder.

Fundamental Building Materials K. Ward-Harvey, 2009 Written by an architect with many years' experience in practice and teaching, this book is a well-illustrated introduction to the great range of materials used in much of the world's building and construction. It is the only book of its type on the market, and suitable for anyone teaching or studying for building trades, architecture, building, landscape design, structural engineering, and allied disciplines. When first published, a reviewer commented, This book has filled a large gap in publications available to both students and the building professions. The Fourth (2009) Edition is now available, incorporating many references to current standard codes, research, manufacturers, and other authoritative information on the internet, to expand content further if needed.

Australian Residential Property Development Ron Forlee,2012-01-06 Australians have long had a love affair with residential property. We have one of the highest rates of homeownership in the world and investing in residential real estate is a popular route to financial security. In this fascinating, practical book, successful property developer, architect and writer Ron Forlee shows how, through careful planning and development, returns on property investment can be considerably enhanced. Readers are taken—step-by-step—from site selection, sourcing development finance, getting advice, working with contractors, councils, consultants and solicitors, costing, monitoring and managing risk, and marketing, to finally selling the improved property. Including tables, checklists and drawings, Australian Residential Property Development offers a huge amount of information evolving from the author's own education and experience.
